A Concise Guide to the EU Anti-dumping/anti-subsidies Procedures Themistoklis K. Giannakopoulos, 2006-01-01 Unfair trading practices such as dumping and the granting of subsidies have long been identified as threats to open markets Yet despite decades of international trading rules global markets are still jeopardized by practices which can cause material injury to industries and put employment at risk The European Union has been a leader in its determination to ensure that its industries are not disadvantaged by such practices that Community interests are defended and that fair competition is restored where needed The basic texts which form the legal basis of anti dumping and anti subsidy investigations in the Community entered into force in 1996 and 1997 The procedures developed in these texts as amended and in their corresponding regulations are the subject of this extremely helpful guide Practitioners who must follow these often complex procedures will find precise guidelines for the substantive determinations that must be made such as calculating the material injury determining the cause of injury and applying the Community interest test and then be able to move confidently through every procedural step including the following Initial complaint Questionnaires Confrontation meetings and oral hearings Investigations by Commission official Offer and acceptance rejection of undertaking Commenting on the Commission s provisional decision Requesting review of measures and refunds and Judicial review Throughout the presentation the author

describes relevant cases and actual measures taken Tables of cases and measures as well as a bibliography are included Business people and their counsel whether engaged in trade within the EU or between any country and an EU Member State will benefit enormously from the detailed guidance offered in this incomparable volume The book will also be invaluable to academics and policymakers as an unclouded analysis of anti dumping anti subsidies procedures under EC law *E.C. Agreement on Anti-dumping K. D. Raju, 2008-01-01 The WTO Secretariat reports that during the period from 1995 to June 30 2007 WTO members initiated 3097 anti dumping investigations Of these 474 were put forward by India which made it the largest user of this measure among WTO Members The traditional argument of developing countries was that loopholes or absence of clear definitions in the anti dumping rules have increased the possibility of abuses and discretionary practices against them Now many developing countries like India have become frequent users of this measure For a better understanding of the various provisions of the WTO s Anti dumping Agreement ADA a critical investigation of the resulting jurisprudence is a necessity To that end this timely work has a fivefold aim and To explore the jurisprudence that has emerged around the anti dumping regime and how it affected developing countries and To assess how effectively and to what extent the WTO s Dispute Settlement Body DSB is able to analyze the violations of ADA provisions and To examine domestic compliance with DSB decisions and To study the Indian cases which come before the nation s Customs Excise andamp Sales Tax Appellate Tribunal various High Courts and the Supreme Court of India and and To offer recommendations for the improvement of the anti dumping regime from a developing country perspective *Anti-Dumping Regulations and Practice in Nigeria* Violet Aigbokhaevbo, 2022-09-16 This book is an attempt to examine the WTO GATT anti dumping regulations within the ambit of the peculiar developmental circumstances of developing countries with Nigeria in perspective A combination of descriptive analysis and deductions are utilised with reference to the Nigerian experience as a developing country seeking relevance in the global trading system where non conforming states are regarded as pariahs The non availability of industries to cater for the needs of their populaces has rendered these countries viable global dumping ground for fake substandard and adulterated products The conclusion here that as far as developing countries are concerned anti dumping regulations as provided by GATT in Nigeria is akin to providing shoes for a man with no feet **Safeguarding**

Media, Markets, and Democracy C. Edwin Baker, 2001-11-05 Government interventions in media markets are often criticized for preventing audiences from getting the media products they want A free press is often asserted to be essential for democracy The first point is incorrect and the second is inadequate as a policy guide Part I of this book shows that unique aspects of media products prevent markets from providing for audience desires Part II shows that four prominent but different theories of democracy lead to different conceptions of good journalistic practice media policy and proper constitutional principles Part II makes clear that the choice among democratic theories is crucial for understanding what should be meant by free press Part III explores international free trade in media products Contrary to the dominant American position it shows that Parts I and II s economic and democratic theory justify deviations from free trade in media products

Cumulative Digest of United States Practice in International Law, 1993 *Trade Remedies* Thomas Weishing Huang, 2003-01-01 As international trade turns increasingly toward China it is crucial for trade practitioners to grasp the law of trade remedies as practiced in that country Since China acceded to the World Trade Organization in 2002 its liberal and even enthusiastic interpretation of the WTO rules and exceptions on dumping subsidies and safeguards frequently noted in its rigorous antidumping enforcement activity has revealed China s adherence to the infant industry theory of international trade China s concerted use of trade remedies can be best understood as the government s support of its industries which not long ago were merely units in a centrally planned economy as they struggle toward competitive advantage However for trade professionals outside of China these specialized circumstances can give rise to serious legal difficulties It is in order to forestall such problems with keen analysis and informed insight that this book has been written The reader will find enormously helpful analysis of and information about such relevant details as the following among many more the role of the China State Economic and Trade Commission SETC and other official bodies how petitions for antidumping and anti subsidy investigations are filed normal value and constructed

value and their adjustments actionable and non actionable subsidies assistance to disadvantaged regions for reform activities and for environmental reasons indirect taxes injury criteria of dumping and subsidies fact patterns that give rise to safeguards subject matter jurisdiction of judicial review and administrative review Trade Remedies Law of Dumping Subsidies and Safeguards in China expertly covers an important area of practice where little or no reliable materials existed before In a world trade environment where China s significance is growing rapidly this book s value for legal practitioners trade officials trade policymakers and academics in international trade law anywhere in the world cannot be overstated

Regional and Global Regulation of International Trade Francis Snyder,2002-07-05 These essays written by leading scholars in international trade law argue the pros and cons of greater regional and global regulation *Who's Bashing Whom?* Laura D'Andrea Tyson,1993 Governments around the world This volume answers these questions on the basis of detailed and rigorous case studies of trade disputes between the United States Japan and Europe in aircraft semiconductors supercomputers telecommunications and other electronics products Tyson proposes a cautious activist policy agenda to promote US competitiveness in high technology sectors and to strengthen multilateral rules governing high technology trade

Injury and Causation in Trade Remedy Law James J. Nedumpara,2016-11-25 This book addresses injury and causation issues in the context of antidumping countervailing duty CVD and safeguard investigations that are covered under the WTO The book traces the origin and the negotiating history of injury and causation in trade remedy instruments and examines how this requirement evolved in the United States and more specifically in the GATT as part of the Kennedy Code the Tokyo Codes and later the Uruguay Round negotiating texts The book demonstrates that terms such as principal cause substantial cause and a cause in and of itself are not necessarily warranted in such instruments In the light of the experiences of key users of trade remedy instruments and the WTO Doha Round Rules negotiations the book argues that causation determination does not require mathematical precision Econometric or quantitative tools may be suggested but such tools need not undermine the policy laden nature of trade remedy instruments Accordingly the book suggests the use of weak necessity and strong sufficiency test as a potentially viable causative framework with regard to injury and causation in trade remedies *Circumvention and Anti-circumvention Measures* Yanning Yu,2008-01-01 The unfair trade practice of dumping has been regulated for many years Dumping distorts competition by selling exports at exceedingly low prices in foreign markets Over the years anti dumping measures designed to counter dumping through the imposition of duties have become the most effective and popular way employed to protect domestic industries under threat The 1980s however ushered in a counter measure circumvention As a means of avoiding anti dumping duties circumvention threatens the effectiveness of the anti dumping system by undermining the protection provided for domestic industries In response anti circumvention measures have been designed and implemented to combat those activities This is the first book to offer a detailed analysis of this significant issue in anti dumping practice
