**Bedlam** Catharine Arnold, 2009-08-06 Originally published London Simon Schuster 2008 *Undertaker of the Mind* Jonathan Andrews, Andrew Scull, 2001-11-27 As visiting physician to Bethlem Hospital the archetypal Bedlam and Britain's first and for hundreds of years only public institution for the insane Dr John Monro 1715-1791 was a celebrity in his own day Jonathan Andrews and Andrew Scull call him a connoisseur of insanity this high priest of the trade in lunacy Although the basics of his life and career are well known this study is the first to explore in depth Monro's colorful and contentious milieu Mad doctoring grew into a recognized if not entirely respectable profession during the eighteenth century and besides being affiliated with public hospitals Monro and other mad doctors became entrepreneurs and owners of private madhouses and were consulted by the rich and famous Monro's close social connections with members of the aristocracy and gentry as well as with medical professionals politicians and divines guaranteed him a significant place in the social political cultural and intellectual worlds of his time Andrews and Scull draw on an astonishing array of visual materials and verbal sources that include the diaries family papers and correspondence of some of England's wealthiest and best connected citizens The book is also distinctive in the coverage it affords to individual case histories of Monro's patients including such prominent contemporary figures as the Earls Ferrers and Orford the religious enthusiast Alexander Cruden and the mad King George III as well as his crazy would-be assassin Margaret Nicholson What the authors make clear is that Monro a serious physician neither reactionary nor enlightened in his methods was the outright epitome of the mad trade as it existed then esteemed in some quarters and ridiculed in others The fifty illustrations expertly annotated and integrated with the text will be a revelation to many readers The Mental Anatomies of William Godwin and Mary Shelley William Dean Brewer, 2001 A number of their mental anatomies reflect the influence of Jean Jacques Rousseau's Confessions and his conceptions of mental transparency sincerity and environmental conditioning Because his primary focus is on Godwinian and Shelleyan perspectives on the mind and its operations Brewer avoids twentieth century psychological terminology and ideas in his discussions of their fiction *The Eight-Man Austin* Jonathan Waite, Sam Armitage, 2010-08-30 The Eight Man Austin tells the story of Kelleman's World a peaceful complacent isolationist world whose long held prejudices are challenged when eight star faring bunco artists descend upon it to play out an ancient ritual Greek Science in the Long Run Paula Olmos, 2012-03-15 Greek traditions relating to both the arts and sciences of life and health and those regarding the systematic development of theories of measurement and quantification enjoyed an incredibly long reputation and showed a kind of versatility that challenges any simplistic dogmatic or a priori viewpoint about the meaning and social function of systematic knowledge In this sense they allow us to focus on very specific traits of the multiple processes of production textual arrangement and transmission of the sciences Greek Science in the Long Run Essays on the Greek Scientific Tradition 4th c BCE 17th c CE offers a collection of essays in which renowned international experts in ancient medieval and early

modern history and culture and the history of science together with young researchers in these same fields reflect upon different aspects of this long standing prominence of Greek models and traditions in the changing configuration of the sciences The main aim of the volume is to revisit the different processes by which such doctrinal traditions originated were transmitted and received within diverse socio cultural contexts and frameworks The specialized scholars and academics contributing to the volume embrace advanced standpoints regarding these issues and ensure a successful and substantial contribution to one of the lines of research that has recently attracted the most attention within the field of humanities the interdisciplinary project of a historical epistemology seriously informed by an advanced history of epistemology or the sciences

**Van Gogh and the Art of Living** Anton Wessels,2013-08-09 Vincent van Gogh believed that one had to learn to read just as one had to learn to see and learn to live Van Gogh conveyed a message in his work about the path that he himself followed that was more true to life the path that human beings walk in their turbulent existence the pilgrimage along the various stages of the road of life He does not speak about the meaning of life but about the true art of living It is fascinating to see and read the moving way in which he wrestled with the deep human questions of the whence why and whither of life He did not see himself doing this on his own but acknowledged kindred spirits and allies in preachers preacher poets painters writers and other artists who also attempted to find their own way through life in a similar fashion Van Gogh was aware like no other of his duty and task in life his vocation as human being and artist That means that he was well acquainted with loneliness fear and despair including suicidal tendencies Nevertheless he understood himself as cut out for faith rather than resignation Human beings follow their life's path through storms and dangers on land and on sea where the star of the sea the Virgin Mary helps them and provides light Van Gogh rejected the unhealthy sickly forms of religion electing instead
