This prize monograph was a pioneering work among Marxist philosophers East and West twenty five years ago To our mind the work would have been received with respect and pleasure by philosophers of many viewpoints if it had been known abroad then Now revised for this English language edition by our dear and honored colleague Mihailo Markovic it is still admirable still the insightful and stimulating accomplishment of a pioneering philosophical and scientific mind still resonating to the three themes of technical mastery humane purpose political critique Markovic has always worked with the scientific and the humanist disciplines inseparably a faithful as well as a creative man of late twentieth century thought Reasoning is to be studied as any other object of investigation would be empirically theoretically psychologically historically imaginatively But the entry is often through the study of meaning in language and in life In his splendid guide into the work before us his Introduction Markovic shows his remarkable ability as the teacher motivating clarifying sketching the whole illuminating the detail Critically situating the problem within a practical understanding of the tool of language Physics

Experiments with Arduino and Smartphones Giovanni Organtini,2021-10-06 This book on the use of Arduino and Smartphones in physics experiments with a focus on mechanics introduces various techniques by way of examples The main aim is to teach students how to take meaningful measurements and how to interpret them Each topic is introduced by an experiment Those at the beginning of the book are rather simple to build and analyze As the lessons proceed the experiments become more refined and new techniques are introduced Rather than providing recipes to be adopted while taking measurements the need for new concepts is raised by observing the results of an experiment A formal justification is given only after a concept has been introduced experimentally The discussion extends beyond the taking of measurements to their meaning in terms of physics the importance of what is learned from the laws that are derived and their limits Stress is placed on the importance of careful design of experiments as to reduce systematic errors and on good practices to avoid common mistakes Data are always analyzed using computer software C like structures are introduced in teaching how to program Arduino while data collection and analysis is done using Python Several methods of graphical representation of data are used
