Beyond the Century of the Child Willem Koops, Michael Zuckerman, 2012-10-30 In 1900 Ellen Key wrote the international bestseller The Century of the Child In this enormously influential book she proposed that the world s children should be the central work of society during the twentieth century Although she never thought that her century of the child would become

a reality in fact it had much more resonance than she could have imagined The idea of the child as a product of a protective and coddling society has given rise to major theories and arguments since Key's time For the past half century the study of the child has been dominated by two towering figures the psychologist Jean Piaget and the historian Philippe Ariès Interest in the subject has been driven in large measure by Ariès's argument that adults failed even to have a concept of childhood before the thirteenth century and that from the thirteenth century to the seventeenth there was an increasing childishness in the representations of children and an increasing separation between the adult world and that of the child Piaget proposed that children's logic and modes of thinking are entirely different from those of adults In the twentieth century this distance between the spheres of children and adults made possible the distinctive study of child development and also specific legislation to protect children from exploitation abuse and neglect Recent students of childhood have challenged the ideas those titans promoted they ask whether the distancing process has gone too far and has begun to reverse itself In a series of essays *Beyond the Century of the Child* considers the history of childhood from the Middle Ages to modern times from America and Europe to China and Japan bringing together leading psychologists and historians to question whether we unnecessarily infantilized children and unwittingly created a detrimental wall between the worlds of children and adults Together these scholars address the question whether a hundred years after Ellen Key wrote her international sensation the century of the child has in fact come to an end

[Coral Lives](#) Michele Currie Navakas, 2023-07-11 In the eighteenth and nineteenth centuries coral specimens featured prominently in cabinets of curiosity and in literary work by writers from Herman Melville to Lydia Huntley Sigourney Children sang of coral in popular songs Women both free and enslaved wore coral beads Reef samples drew crowds to galleries and museums And coral's unique qualities as animal vegetable and mineral inspired countless Americans to praise the coral insect for creating what one author called the most wonder provoking of all natural objects In this account of coral's history as material and metaphor Michele Navakas argues that coral shaped the nation's thinking and became deeply entwined with the histories of slavery wage labor and women's reproductive and domestic work European slave traders used red coral to purchase persons along the coast of West Africa from the fifteenth through the eighteenth centuries while enslaved people performed the labor that brought raw coral from Caribbean Mediterranean and Pacific waters to European naturalists and coral traders In the nineteenth century U S Black and white women frequently compared their bodies to reef building polyps that silently and continually produced new beings and forged intergenerational bonds The book traces the global flows of labor production manufacture and trade that brought coral into the daily lives of nineteenth century Americans and discusses the cultural traditions surrounding coral in four major geographic regions Africa the Pacific the Caribbean and Europe that shaped early American understandings of coral It then examines works of literature and of natural history by a cross section of U S authors who used the analogy of coral to describe a system in which the labors of each individual enrich all but also as a body that grows only by silently entombing

the living bodies of its most essential workers A coda addresses the value of historically oriented environmental humanities scholarship at a time of climate crisis
