Autonomous Development Raff Carmen, 1996 Raff Carmen is one of the very few challenging and ground breaking thinkers who can change the way in which we perceive and practise development In this comprehensive book he succeeds in interweaving a vast panorama of theories and methodologies with practical case studies to bring complex issues dramatically to life His unerring commitment to bottom up development rooted in people's organizations and the power of culture is refreshing at a time of widespread disillusion Most importantly he convinces us that alternative approaches have worked and can work in the future Highly recommended for anyone who wants to challenge assumptions and broaden the horizon of development debate and practice

Autonomy for All Stanley Scott Jr , 2025-09-06 For most Americans the ability to drive is taken for granted a routine freedom exercised daily without a second thought Yet for nearly 61 million Americans living with disabilities and 54 million seniors over 65 this fundamental aspect of independence is often compromised or entirely unavailable According to the Ruderman Family Foundation's landmark study on autonomous vehicles and disability approximately 6 million Americans with disabilities have difficulty getting the transportation they need creating what researchers term a significant mobility gap Claypool et al 2017 This mobility gap represents one of the most significant yet under discussed inequalities in modern society This book proposes a revolutionary perspective autonomous vehicles are not primarily a convenience for the able bodied but rather a transformative accessibility tool for those currently excluded from our driver centric transportation system Self driving cars represent the potential to restore independence to millions who have lost or never had the ability to transport themselves freely

The Family and Social Change in Chinese Societies
Dudley L. Poston, Jr., Wen Shan Yang, Demetrea Nicole Farris, 2013-11-26 This book focuses on families and their changes in Taiwan and China Traditional notions of what constitutes a family have been changing in China Taiwan and other Asian countries The chapters in this book provide interesting methodological and substantive contributions to the discourse on family and social change in Chinese societies They also underscore the implications of the various social changes in Chinese families Written by Chinese and Western scholars they provide an unprecedented overview of what is known about the effects of social change on Chinese families One might think that defining a family is an easy task because the family is so significant to society and is universal The family is the first place we learn culture norms values and gender roles Families exist in all societies throughout the world but their constitution differs In the past several decades there have been many changes in the family in Taiwan and China For instance whereas in the West we use a bilineal system of descent in which descent is traced through both the mother's side and the father's side of the family in many parts of China descent is patrilineal although this is changing and China and Taiwan are starting to assume a family constitution similar to that in the West This and other issues are discussed in great detail in this book Indeed it is the very nature of the differences that motivated the writing of this book on changing families in Taiwan and China The chapters in Part I The Family in Taiwan and China focus on the basic family issues in Taiwan and China that provide the groundwork for many of the chapters that follow Chapter 1 is about the distribution of resources in the family in Taiwan Chapter 2 focuses on filial piety and the autonomous development of adolescents in the Taiwanese family and Chapter 3 explores the important issue of family poverty in Taiwan Chapter 4 moves away from Taiwan and looks at several issues of family growth and change in Hong Kong noting the interesting similarities and differences between Hong Kong and China Part II Issues of Marriage the Family and Fertility in Taiwan and China focuses specifically on marriage family and fertility In Chapter 5 the authors discuss the relationships between marital status socioeconomic status and the subjective well being among women in Hong Kong and Taiwan Chapter 6 describes patterns of sexual activity in China and the United States Chapter 7 considers gender imbalances in Taiwan and their impact on the marriage market Chapter 8 also focuses on Taiwan and examines the effects of mothers attitudes on daughters interaction with their mothers in law Chapter 9 compares female and male fertility trends and changes in Taiwan Part III Children and the Family in East Asia and in Western Countries consists of comparative studies of the family and children Chapter 10 examines the dynamics of grandparents caring for children in China Chapter 11 explores family values

and parent child interaction in Taiwan Chapter 12 examines the significant amount of diversity among families in contemporary Taiwan Chapter 13 describes adolescent development in Taiwan Chapter 14 examines the impact of son preference on fertility in China South Korea and the United States And Chapter 15 explores the determinants of intergenerational support in Taiwan The final chapter in our book the only chapter in Part IV The Family and the Future in Taiwan examines the future of the family in Taiwan with respect especially to the marriage market and aged dependency

Embryology of Flowering Plants: Terminology and Concepts, Vol. 3 T B Batygina, 2019-04-23 Plant embryology dealing with the regularities of initiation and the first stages of development of an organism is now flourishing because of the overall progress being made in natural sciences Such discoveries of the 20th century as production of plants from a single somatic cell experimental haploidy and parasexual hybridization were of general biological significance The combined efforts of embryologists geneticists and molecular biologists yielded the discovery of specific genes that control meiosis egg cell development and early stages of embryogenesis The tendency to synthesize data of embryology and genetics has become increasingly noticeable It is connected with the fact that the majority of problems connected with morphogenesis such as differentiation specialization the evaluation of features and the definition of the notions gene and feature and genotype and phenotype concern embryology and genetics embryogenetics in one way or another Evolutionary embryology has given rise to a new approach to the study of problems of adaptation in plants In connection with the problem of preserving biological diversity under conditions of ecological stress special attention is paid to ecological embryology revealing the critical periods in early ontogenesis and plasticity and tolerance of reproductive systems at the level of species and population The study of variability of morphogenesis and phenotype in population life cycle variations and the diversity of reproductive systems is the most important point in the population embryology of plants

Distant Hybridization of Crop Plants G. Kalloo,J.B. Chowdhury,2012-12-06 Wild taxa are invaluable sources of resistance to diseases insects pests nematodes temperature extremes salinity and alkalinity stresses and also of nutritional quality adaptation genetic diversity and new species Utilization of wild relatives of a crop depends largely upon its crossability relations with cultivated varieties Several wild species are not crossable with the commercial cultivars due to various isolation barriers Furthermore in a few cases hybridization is possible only in one direction and reciprocal crosses are not successful thus depriving the utilization of desired cytoplasm of many species However techniques have been developed to overcome many barriers and hybrid plants are produced New crop species have been developed by overcoming the F₁ sterility and producing amphidiploids and such crops are commercially being grown in the field The segregation pattern of F₁ hybrids produced by distant hybridization in segregating generations are different from the intervarietal hybrids In former cases generally unidirectional segregation takes place in early generations and accordingly selection procedures are adopted In most of the cases backcross or modified backcross methods have been followed to utilize wild species and thus numerous types of resistance and other economical attributes have been transferred in the recurrent parents Protoplast fusion has been amply demonstrated in a number of cases where sexual hybridization was not possible and as a result hybrids have been produced

American-Japanese Security Agreements, Past and Present Thomas A. Drohan,2015-01-28 What led two mortal enemies to become allies nine years after the end of World War II When the Allies began their occupation of defeated Axis countries many people favored a program of harsh reparation and demilitarization For the United States this was tempered with a desire not only to prevent such a war from happening again but to help the occupied countries rebuild their economic and political infrastructure This aspiration coupled with the rise of communist China and its perceived threat not only to Southeast Asia but the world formed the catalyst for a U S Japanese alliance The alliance between the United States and Japan persists in spite of changing political world views The changes which have affected world politics have often resulted in corresponding adjustments to the U S Japan security agreement From 1954 to the present day this volume takes an in depth look at the fundamental nature of the relationship The book addresses the historical origins of security relations in both countries and the ways in which these formed the basis for their postwar security cooperation and examines the negotiated set of shared military economic and political agreements and expectations which have shaped their relationship The work's main focus however is the way in which this alliance has evolved Four cases of significant policy change in 1960 1981 1987 and 1997 are analyzed along with a discussion of the relevant strategic and tactical realities of the time The reactions of the United States and Japan to recent events such as Iraq's Kuwait invasion and the 2001 terrorist attacks on America are also discussed Numerous tables are included
