Autonomy Flexible Solutions To Ethnic Conflicts:

Autonomy Ruth Eschelbacher Lapidoth, Ruth Lapidoth, 1997 **Autonomy** Ruth Lapidoth, 1997 From Chechnya to Bosnia from the Kurds to the Palestinians demands for separatism are fueling bitter and bloody conflicts Yet as this innovative study demonstrates disputes between central governments and independence minded minorities need not always escalate into violence and secession Autonomy by virtue of its essential adaptability can offer a workable and peaceful compromise Ruth Lapidoth first dissects the concept of autonomy exploring its origins examining the roles it can play and distinguishing among its types With scrupulous objectivity she then presents more than a dozen richly documented case studies of autonomy in action Drawn from four continents and detailing failures as well as successes these studies underline autonomy's variety and versatility Lapidoth's pragmatic approach and impeccable scholarship frame the issues and lay out the factors likely to foster successful outcomes Autonomy, Self-governance and Conflict Resolution Marc Weller, Stefan Wolff, 2005 Conflicts over the rights of self defined population groups to determine their own destiny within the boundaries of existing states are among the most violent forms of inter communal conflict Many experts agree that autonomy regimes are a useful framework within which competing claims to self determination can be accommodated This volume explores and analyses the different options available The contributors assess the current state of the theory and practice of institutional design for the settlement of self determination conflicts and also compare and contrast detailed case studies on autonomous regimes in the former Yugoslavia the Crimea land Northern Ireland Latin America Indonesia and Vietnam Ethnic Conflict and Secessionism in South and Southeast Asia Rajat Ganguly, Ian Macduff, 2003-02-24 This book seeks to examine secessionist ethics in South and Southeast Asia in a theoretically informed way and from a comparative perspective Looking in depth at conflicts in such places as East Timor Kashmir and Mindanao this book is the first attempt to study secessionist ethnic conflicts systematically and comparatively in the Asian context *Managing and Settling Ethnic Conflicts* Ulrich Schneckener, 2004 Following a theoretical introduction experts in ethnopolitics provide in depth case studies covering each of the major approaches to conflict management and settlement in different geographic regions Contributions to the Study of Peacemaking United States Institute of Peace, 1991 Contributions to the Study of Peacemaking, 1995

Contributions to the Study of Peacemaking Amy Smith, 1999 **Managing and Settling Ethnic Conflicts** NA, 2016-09-27 Interest in the study of ethnic conflict has grown over the past decade This is partly due to its re emergence in Central and Eastern Europe after the collapse of communism as well as its prolonged and violent manifestation in Sri Lanka East Timor Ethiopia Eritrea the Middle East Corsica and the Spanish part of the Basque country Moreover events in Kosovo and East Timor prompted the international community to engage in controversial and often difficult peace making and peacekeeping operations This collection seeks to explore the issues surrounding this type of conflict Following a theoretical introduction recognized experts in ethnopolitics provide in depth case studies covering each of the major

approaches to conflict management and settlement in different geographic regions The conclusion summarizes the findings and assesses future prospects Thus a comprehensive picture of the state of the discipline emerges alongside an overview of current ethnic conflicts worldwide Radical Ethnic Movements in Contemporary Europe Stefan Troebst, Farimah Daftary, 2004-11-01 Nation states and minorities resort more and more to violence when safeguarding their political interests Although the violence in the Middle East has been dominating world politics for some time now European governments have had their share of ethnic violence to contend with as this volume demonstrates And as the case studies show ranging as they do from the Basque Country to Chechnya from Northern Ireland to Bosnia Herzegovina this applies to western Europe as much as to eastern Europe However in contrast to other parts of the world instances where political struggles for power and social inclusion between minorities and majorities lead to full fledged inter ethnic warfare are still the exception in the majority of cases conflicts are successfully de escalated and even resolved In a comprehensive conclusion the volume offers a theoretical framework for the development of strategies to deal with violent ethnic conflict Escaping the Self-Determination Trap Marc Weller, 2009-05-31 There is new movement in the discussion about self determination and statehood The contested declaration of independence by Kosovo and Russia s recognition of the purported independence of Abkhazia and South Ossetia have caused significant controversy These developments may well put an end to the attempt by governments to keep in place the highly restricted doctrine of self determination that has previously only been made available in the colonial context This monograph argues that classical self determination narrowly conceived in the colonial context cannot contribute to the resolution of the presently ongoing self determination conflicts around the world However this study finds that over the past few years a new practice of addressing self determination conflicts has emerged This practice significantly extends our understanding of the legal right to self determination and of the means that can be brought to bear in terminating secessionist conflicts **Unity in Diversity** Christophe van der Beken, 2012 This book argues that the development of federalism in Ethiopia fits in with a global trend towards increased attention to ethnic minority rights and to federalism as a mechanism for ethnic conflict prevention and management The Ethiopian federation is designed as a framework within which the Ethiopian ethnic groups can protect their rights and within which they are stimulated to develop a cooperative relationship To put it differently the constitutional objective of the federal structure is the creation of unity in diversity The book evaluates the capacity of Ethiopian federalism to achieve this objective by investigating the relevant historical political and legal aspects Series Recht und Politik in Afrika Law and Politics in Africa Vol 10 *Internal Self-Determination in International Law* Kalana Senaratne, 2021-08-05 A clear and accessible study of the principle of internal self determination in international law **Nationalism and Conflict Management** Eric Taylor Woods, Robert Schertzer, Eric Kaufmann, 2013-09-13 Ethno national conflict is one of the central issues of modern politics Despite the emergence of approaches to managing it from nation building to territorial autonomy in recent years the application of these

approaches has been uneven Old conflicts persist and new ones continually emerge The authors of this book contend that what is needed to drive forward the theory and practice of ethno national conflict management is a more nuanced understanding of ethnicity and nationalism The book addresses this issue by linking theories of ethnicity and nationalism to theories of conflict management Its contributors share a common goal of demonstrating that a nuanced understanding of ethnicity and nationalism can beneficially inform conflict management in theory and practice To do so they analyse both hot and cold conflict zones as well as cases that have been important in the development of the most widely used conflict management models The book is aimed at those interested in the theory and practice of ethno national conflict management as well as the study of ethnicity and nationalism It is well suited for undergraduate and advanced research students experts and policy makers This book was originally published as a special issue of Commonwealth and Comparative Politics

A Research Agenda for Federalism Studies John Kincaid, 2019-12-27 In this forward thinking book fifteen leading scholars set forth cutting edge agendas for research on significant facets of federalism including basic theory comparative studies national and subnational constitutionalism courts self rule and shared rule centralization and decentralization nationalism and diversity conflict resolution gender equity and federalism challenges in Africa Asia and the European Union More than 40 percent of the world's population lives under federal arrangements making federalism not only a major research subject but also a vital political issue worldwide

Peace through Self-Determination Felix Schulte, 2020-01-24 Bringing together comparative politics conflict research and social psychology this book presents a novel theory to explain the consolidation outcomes of post conflict autonomy arrangements It builds on Social Identity Theory and identifies a successful process of ethnic recognition as the key prerequisite for peaceful interethnic cohabitation through territorial self governance As this process is highly context dependent the study identifies relevant structural and actor centered factors and analyzes their occurrence in the consolidation periods of nineteen autonomy arrangements worldwide using Qualitative Comparative Analysis QCA The author concludes that elites accept autonomy reforms if they promise a high degree of self determination and at the same time ethnic recognition is not hindered by horizontal inequalities Bargaining efforts succeed within inclusive institutions involving non nationalist parties and international organizations Autonomy reforms fail if the degree of self rule offered is too low and strong inequalities generate new grievances Autocratic rule nationalist parties and a lack of international attention provide a breeding ground for further centrifugal activities In depth case studies on South Tyrol and the Chittagong Hill Tracts provide further evidence for the theoretical models
