The European Avant-Garde - A Hundred Years Later, 2024-01-08 The title of this book The European Avant Garde A Hundred Years Later implies the European avant garde took place a century ago that it is a thing of the past However it does not aim to consolidate this position but to question it It addresses temporality as the central dimension related to the notion of the avant garde The book brings forth original revisions of the theories of the avant garde the works of the avant garde the idea of the avant garde as being the vanguard the leading force of change It addresses the returning of the avant garde during the twentieth century and today Retracing Images Daniel Šuber, Slobodan Karamanic, 2012-01-05 Drawing on visual materials film art graffiti street art public advertisement memorials the essays of this collection offer detailed views on the cultural and political dynamics that preceded and emerged in the wake of the Yugoslav conflicts of the 1990s Avant Inke James M. Dorsey, 1993-07 Globalizing the Avant-Garde David Ayers, Joana Cunha Leal, Benedikt Hjartarson, Margarida Brito Alves, 2024-12-16 How has the process of globalization shaped artistic practices on the one hand and art history and theory on the other The contributions in this volume approach this question from a range of perspectives taking into account the role of travel for example or practitioners increasing knowledge of other cultures art s increasing awareness of itself as existing on a global level literary translation the advance of technology and the ever changing grand narratives of art history As well as reflections on European avant gardes and neo avant gardes the collection features discussions of Japan Latin America Africa Asia and the Pacific As a whole the volume engages with broader current discourses about cultural globalization and features input from leading scholars around the world as well as some important novel interventions by early career researchers The authors not only make a major contribution to the evolution of avant garde studies but also offer valuable original points of view to art history and to the cultural theory of globalization more broadly **Transitional Aesthetics** Uroš Cvorog, 2018-05-17 Using the way in which artists from the former Eastern bloc perceive the experience of EU integration and transition from a Soviet past as a conceptual launching pad this book explores how artists critically inhabit a permanent state of in between to capture the simultaneous existence of multiple and overlapping temporalities Transitional aesthetics are artistic strategies that disrupt and interrogate ideologically loaded trajectories of cultural social or political transition Examples of such trajectories include the movement from totalitarianism to democracy post socialism from war to freedom and reconciliation post conflict and from the edges of Europe to its centre inclusion in the European Union These transitional states include the future orientation of failed socialism and the perpetual present of global capital the history of unresolved past conflicts and reconciliation through transitional justice nationalist obsessions with the past and the cultural appeal of kitsch and retro objects in fashion film and music and the uncertain future promise of EU membership and resurgence of global right wing populism headed by figures like Berlusconi Le Pen and Trump Transitional Aesthetics shows that apprehending time in contemporary art is fundamental to capturing the lived

experience of a permanent state of instability particularly relevant to Europe in the contemporary moment In a world that has entered accelerated transition towards instability understanding this experience has broad and resonating relevance for politics art and society **Filozofski vestnik** ,2007 *International Directory of Little Magazines and Small Presses, 30th Ed, 1994-1995* Len Fukton,Len Fulton,1994-10 **Time Images** Tyrus Miller,2020-07-13 The concept of time image this book argues holds broad potential for the historical interpretation of cultural and aesthetic works Many works that would not ordinarily be thought to be historical artifacts reveal their intrinsic historical character in light of this innovative interpretative concept The book s first section Time Images as Theory and Historiography considers alternative temporalities underlying historicizing theories and specific practices of history Examples treated here include the notion of retro avantgardism works by the Frankfurt School on the interrelations of images and history and Mass Observation s dream documentation project The second section Time Images in Modernist and Postmodernist Literature considers literary instances in which alternative notions of historical time are engaged These include discussions of Wyndham Lewis and cultural revolution Theodor Adorno s reading of Samuel Beckett s Endgame and Pier Paolo Pasolini s use of Antonio Gramsci in the practice of poetry and philology The third section Moving Images of Time discusses questions of cinema including children s experience in films depicting traumatic historical events the Quay Brothers animated adaptation of Bruno Schulz s Street of Crocodiles and Sergei Eisenstein s and Charles Olson s engagements in Mexico with pictographic representation etymology and archeological time *Art as Capital* Polona Tratnik,2021-09-20 In global terms creative industries are on the rise as are new media investigations in art and initiatives that encourage innovation in the arts for end use in the economy However there is a significant lack of critical reflection on this form of creative production This important book points out the dangers and downfalls that accompany such a boom of the creative industries and the subordination of art to the economy and politics Specifically it shows that art as a mode of social and aesthetic practice is losing the very thing which it has striven for so desperately in the course of modernity its independence from other spheres of human activity

The Hidden Handshake Aleš Debeljak,2004-09-27 The Hidden Handshake uses four distinct yet intertwined essays to address the questions surrounding our notions of citizenship national identity and cosmopolitan belonging The violent

disintegration of Yugoslavia and the undercurrent of EU enlargement stand out as two contrasting movements that highlight the importance of having a national identification while also defying it to avoid both the rigidity of nationalist exclusivism and the blithe nonsense of global citizenship Through the exploration of sociohistorical material and artistic visions as well as the author's layered identity as a Slovene a Yugoslav a Central European and a European Ale_ Debeljak tries to show that it is possible to remain faithful to geography history and community even as one fosters links to global cultural movements Not surprisingly the book itself shares some of this hybrid identity It uses not only theoretical concepts and empirical data but also historical sketches on art national life and society along with poetic autobiographical reminiscences and personal anecdotes Ultimately the book calls for an adoption of liberal nationalism which is commensurate with democratic order and for a more ecumenical understanding of artistic visions that does not discriminate on the grounds of one's place of origin

Playgrounds And Battlefields Francisco Martínez, Klemen Slabina, Mihail Lotman, Siobhan Kattago, Kevin Ryan, Tom Frost, Flo Kasearu, Marcos Farias-Ferreira, Jaanika Puusalu, Dita Bezdičková, Emeli Theander, Patrick Laviolette, Alastair Bonnett, Oleg Pachenkov and Lilia Voronkova, Anne Vatén, Helena Holgersson, Patricia García Espín and Manuel García Fernández, Benjamin Noys, Kristina Norman, Madli Maruste, Pille Runnel and Ehti Järv, Alessandro Testa, Sean Homer, Tarmo Jüristo, 2014 This book explores whether the metaphors of playground and battlefield might be analytically meaningful terms for understanding contemporary society The duality of playgrounds and battlefields is presented as a space of continuous becoming related to the recreation domination and experience of a place as well as to corresponding practices of excess interaction and enjoyment We believe that a discussion about engagement and responsibility in a modern social setting is possible only through new concepts that avoid binary formulations Playgrounds and battlefields are thus used as a trigger enabling a fresh approach to a contemporaneity that is highly influenced by the way in which societies deal with their past and future In this sense the Playgrounds and Battlefields volume is a thematic one mapping the field and offering grammar of possibility

Liminal Spaces of Art between Europe and the Middle East Marina Vicelja Matijašić, Ivana Prijatelj Pavičić, 2019-01-24 This volume brings together essays from different fields of the humanities and social sciences that offer a fresh look at the complexity of artistic and cultural contacts transfers and exchanges between Europe and the Middle East The studies reach far beyond the geographical regions where Europe and the Middle East have met and interacted throughout their long histories such as the eastern Mediterranean the south Caucasus and the Balkans Their focus is on the variety of contact zones of the two worlds with specific artistic creativity characterized by dynamic processes of movement and interchange between various cultural entities in the broadest and most complex sense of the word The studies shed new light on diverse phenomena of the in between or liminal spaces in art and culture with special interest in artists and art works from ancient to modern times from fine arts and architecture to music and video

Art Work Katja Praznik, 2021-06-29 In *Art Work* Katja Praznik counters the Western understanding of art as a passion for self expression and

an activity done out of love without any concern for its financial aspects and instead builds a case for understanding art as a form of invisible labour Focusing on the experiences of art workers and the history of labour regulation in the arts in socialist Yugoslavia Praznik helps elucidate the contradiction at the heart of artistic production and the origins of the mystification of art as labour This profoundly interdisciplinary book highlights the Yugoslav socialist model of culture as the blueprint for uncovering the interconnected aesthetic and economic mechanisms at work in the exploitation of artistic labour It also shows the historical trajectory of how policies toward art and artistic labour changed by the end of the 1980s Calling for a fundamental rethinking of the assumptions behind Western art and exploitative labour practices across the world Art Work will be of interest to scholars in East European studies art theory and cultural policy as well as to practicing artists
