Aviations Golden Age Portraits From The 1920s And 1930s:

Engines and Innovation Virginia P. Dawson, 1991 The American Aviation Experience Tim Brady, 2000 This book is designed to be a primary text for courses in aviation history and development and aviation in America The seventeen chapters in *The American Aviation Experience* A History range chronologically from ancient times through the Wright brothers through both world wars culminating with the development of the U S space program Contributors also cover balloons and dirigibles African American pioneers in aviation and women in aviation These essayists leading scholars in the field present the history of aviation mainly from an American perspective *The American Aviation Experience* includes 335 black and white photographs two maps and an appendix Leonardo da Vinci and the Science of Flight **Expanding the Envelope** Michael H. Gorn, 2014-10-17 *Expanding the Envelope* is the first book to explore the full panorama of flight research history from the earliest attempts by such nineteenth century practitioners as England's Sir George Cayley who tested his kites and gliders by subjecting them to experimental flight to the cutting edge aeronautical research conducted by the NACA and NASA Michael H Gorn explores the vital human aspect of the history of flight research including such well known figures as James H Doolittle Chuck Yeager and A Scott Crossfield as well as the less heralded engineers pilots and scientists who also had the Right Stuff While the individuals in the cockpit often receive the lion's share of the public's attention *Expanding the Envelope* shows flight research to be a collaborative engineering activity one in which the pilot participates as just one of many team members Here is more than a century of flight research from well before the creation of NACA to its rapid transformation under NASA Gorn gives a behind the scenes look at the development of groundbreaking vehicles such as the X-1 the D-558 and the X-15 which demonstrated manned flight at speeds up to Mach 6.7 and as high as the edge of space **Spaceflight Revolution** James R. Hansen, 1995 **The Wind and Beyond**, 2003 Airline Executives and Federal Regulation Walter David Lewis, 2000 This book is a collection of eight case studies of relationships between airline executives and federal regulatory agencies from the passage of the Air Commerce Act in 1926 to the Airline Deregulation Act of 1978 By focusing on the lives and personalities of individual entrepreneurs W David Lewis and his contributors hope to explore the interaction between technology government regulation and entrepreneurship Each essay in the book focuses on a particular airline executive such as Eddie Rickenbacker Robert Six and Donald Nyrop Lewis has been careful to give a variety of perspective Airlines of various types are represented large and small scheduled and unscheduled Some of the executives profiled were known for having adversative relationships with federal regulators whereas others wholeheartedly accepted regulation and thrived under it There have been public calls for a return to airline regulation and Lewis thinks it is not inconceivable that regulation may ultimately return if problems continue and conditions deteriorate further But he says it is well to remember that deregulation occurred because there were flaws in the regulatory system it replaced This collection of essays scholarly and well documented but written in a lively style suitable for specialists and

nonspecialists alike provides a long range perspective on the issue of airline deregulation

The Airplane in American Culture Dominick Pisano, 2003 A fascinating account of America's relationship with the airplane

Aviation's Golden Age William Matthew Leary, 1989 Air Force Magazine, 1990 *Entrepreneurial Success and Failure in the Aviation Industry*

Howard G. Jones, 1999 This dissertation shows how the history of the Waco Aircraft Company reflects the transformation of the American economy in the twentieth century Beginning just after the First World War its entrepreneur Clayton J. Brukner developed a network of relationships within the aviation industry This allowed his company to develop significant competitive advantages in the private flying market Those advantages and the popular appeal of aviation helped Waco to become the largest manufacturer of civilian aircraft by 1929 The transformation of business government relations during the New Deal demanded changes in Brukner's business strategy The depression significantly cut sales of its popular biplanes but Waco kept its Troy, Ohio factory open and earned some profits during the downturn Brukner's involvement with the trade associations in the 1930s revealed the critical role the government the military in particular played in the development of aviation His flawed leadership in the changing context led to decisions that degraded the quality of its network signals and diminished Waco's effectiveness in crafting appropriate policies As the international situation grew increasingly tense throughout the 1930s Waco like other manufacturers turned to exports to enhance sales Contracts with foreign governments partially offset the setback the depression had caused domestically They did not however drive Brukner to evaluate sufficiently Waco's potential participation in the U.S. military market Only after the Munich Crisis in September 1938 when President Franklin D. Roosevelt decided to call for increased military spending did the Waco Aircraft Company position itself to receive defense contracts It was almost three years however before the Army Air Forces directed the company to design and manufacture transport aircraft and cargo gliders In the meantime Brukner had not developed the organizational capabilities needed to manage military contracts

Sovereign Skies Sean Seyer, 2021-03-23 This work is a history of US aviation regulation in the interwar period of the early twentieth century The author presents the Air Commerce Act as the institutionalization of a specific American regulatory ideology that arose in response to the technological nature of the airplane the US Constitution and the Paris Convention of 1919

Flying Down to Rio Rosalie Schwartz, 2004-10-11 In this book author Rosalie Schwartz uses the 1933 RKORadio Pictures production *Flying Down to Rio* to examine the interplay of technology and popular culture that shaped a distinctive twentieth-century sensibility The musical comedy connected airplanes movies and tourism ending spectacularly with chorus girls dancing on the wings of airplanes high above Rio de Janeiro Brazil The Hollywood fantasy capped three decades during which airplanes and movies engendered new expectations and redefined people's sense of wellbeing their personal satisfactions and their interpersonal relations Wilbur and Orville Wright flew their airplane in 1903 at the same time that filmmakers began to project edited filmed stories onto large screens Spectators found entertainment value in both airplane competitions and motion pictures and movie producers brought the

thrill of aviators antics to a rapidly expanding audience Meanwhile air shows and competitions attracted large crowds of tourists Mass tourism grew as a leisuretime activity stimulated in part by travelogues and feature films By 1930 the businessmen who envisioned transporting tourists to their destinations by airplane struggled to overcome the movieexaggerated association of flight with danger Schwartz weaves these threads into a story of human daring and persistence political intrigue and international competition From Wilbur and Orville to Fred and Ginger Schwartzs narrative follows the fortunes of aviation and movie pioneers and the foundations and growth of Pan American Airways and RKORadio Pictures the two companies that came together in *Flying Down to Rio* By the end of the twentieth century aviation movies and mass tourism had become powerful global industries contributing to an internationally connected entertainmentoriented culture What was once unthinkable had now become expected

The Journal of Air Traffic Control ,1990 *NASA's Contributions to Aeronautics: Flight environment, operations, flight testing, and research* ,2010 Two volume collection of case studies on aspects of NACA NASA research by noted engineers airmen historians museum curators journalists and independent scholars Explores various aspects of how NACA NASA research took aeronautics from the subsonic to the hypersonic era publisher description **Special Bibliography Series** ,1957 *Winged Crusade* ,2003 This bibliography lists a selected portion of the McDermott Cadet Library s holdings on the American experience of manned powered flight during the twentieth century Excluded are newspaper articles most pictorial works works dealing with lighter than air flight and studies of rotorcraft

The Wind and Beyond: A Documentary Journey Into the History of Aerodynamics in America, V. 2 James R. Hansen,National Aeronautics and Space Administration,2009-08-13 The airplane ranks as one of history s most ingenious and phenomenal inventions It has surely been one of the most world changing How ideas about aerodynamics first came together and how the science and technology evolved to forge the airplane into the revolutionary machine that it became is the epic story told in this six volume series *The Wind and Beyond A Documentary Journey through the History of Aerodynamics in America* Following up on Volume I s account of the invention of the airplane and the creation of the original aeronautical research establishment in the United States Volume II explores the airplane design revolution of the 1920s and 1930s and the quest for improved airfoils Subsequent volumes cover the aerodynamics of airships flying boats rotary wing aircraft breaking the sound barrier and more

The Wind and Beyond: The ascent of the airplane James R. Hansen,2003 *The Wind and Beyond: Reinventing the airplane* James R. Hansen,2003 ***NASA's Contributions to Aeronautics, Volume 2, Flight Environment ...***, NASA/SP-2010-570-Vol 2, 2010, * Richard P. Hallion,2010
