masterpiece on metaphysics by Avicenna Ibn Sīnā d. 1037 C.E. one of the major exponents of Arabic philosophy the *Ilhiyyāt* Science of Divine Things of the *Kitāb al-If* Book of the Cure known in the Latin Middle Ages as *Liber de Philosophia Prima sive Scientia Divina* The first part of the book on the Arabic translations of the *Metaphysics* al-Kindī and al-Fārābī introduces the discussion of Avicenna's reshaping of the epistemological profile of the *Metaphysics* in Part II his account of the subject matter structure method and role of metaphysics in the system of sciences and the recasting of its contents in Part III The present volume provides the first systematic comparison of the *Ilhiyyāt* with the *Metaphysics* and a comprehensive account of this latter's transmission in pre-Avicennian Greek and Arabic philosophy     The Arabic, Hebrew and Latin Reception of Avicenna's Metaphysics Dag Nikolaus Hasse, Amos Bertolacci, 2011-12-23 Avicenna's *Metaphysics* in Arabic *Ilhiyyāt* is the most important and influential metaphysical treatise of classical and medieval times after Aristotle This volume presents studies on its direct and indirect influence in Arabic Hebrew and Latin culture from the time of its composition in the early eleventh century until the sixteenth century Among the philosophical topics which receive particular attention are the distinction between essence and existence the theory of universals the concept of God as the necessary being and the theory of emanation It is shown how authors such as Averroes Abraham ibn Daud Albertus Magnus Thomas Aquinas and John Duns Scotus react to Avicenna's metaphysical theories The studies also address the philological and historical circumstances of the textual tradition in three different medieval cultures The studies are written by a distinguished international team of contributors who convened in 2008 to discuss their research in the Villa Vigoni Italy     Aspects of Avicenna Robert Wisnovsky, 2001 By addressing some of the most fundamental issues in Avicenna's psychology epistemology natural philosophy and metaphysics this work aims to make Avicenna's thought more accessible to Latinists and Islamicists alike

**Natural Final Causality and Scholastic Thought** Corey Barnes, 2024-08-13 This book examines scholastic conceptions of final causality through the methods and concerns of historical theology It argues the history of final causality is most profitably understood according to the interplay of regularity order and intentionality as interpretive categories Within this analytic framework the author explores the history and theological implications of final causality from Aristotle to Nicole Oresme utilizing shifts in the dominant interpretive category to clarify how final causality could change from one of four co-equal explanatory strategies in Aristotle to the cause of causes in Avicenna to a merely metaphorical cause in Walter Chatton Theological debates ranging from questions of creation the relationship of primary and secondary causality and of the ultimate good to secondary goods the autonomy or instrumentality of nature and the compatibility of chance with providence motivated many of these changes The chapters examine final causality in Aristotle and the commentarial tradition from late antiquity to medieval Arabic sources and then consider in detail various scholastic understandings and uses of final causality The book will be of particular interest to scholars of historical theology systematic theology scholastic thought and medieval philosophy     *Necessary Existence and the Doctrine of Being in Avicenna's Metaphysics of the Healing* Daniel D. De

Haan,2020-08-10 In Necessary Existence and the Doctrine of Being in Avicenna's Metaphysics of the Healing Daniel De Haan explicates the central argument of Avicenna's metaphysical masterpiece De Haan argues that the most fundamental primary notion in Avicenna's metaphysics is neither being nor thing but is the necessary wājib which Avicenna employs to demonstrate the existence and true nature of the divine necessary existence in itself This conclusion is established through a systematic investigation of how Avicenna's theory of a demonstrative science is employed in the organization of his metaphysical science into its subject first principles and objects of enquiry The book examines the essential role the first principles as primary notions and primary hypotheses play in the central argument of Avicenna's metaphysics See inside the book [The Eudaimonist Ethics of al-Fārābī and Avicenna](#) Janne Mattila,2022-04-25 Now available in Open Access thanks to the support of the University of Helsinki Al-Fārābī and Avicenna are the two most influential authors of the classical period of Arabic philosophy yet their ethical thought has been largely overlooked by scholars In this book Janne Mattila provides the first comprehensive account of the ethics of these important philosophers The book argues that even if neither of them wrote a major ethical work their ethical writings form a coherent ethical system especially when understood in the context of philosophical psychology cosmology and metaphysics The resulting ethical theory is moreover not derivative of their classical predecessors in any simple way The book will appeal to those with interest in Arabic Islamic philosophy Islamic intellectual history classical philosophy and the history of moral philosophy

**Chance and Determinism in Avicenna and Averroës** Catarina Carriço Marques de Moura Belo,2007 This book addresses the issue of determinism in Avicenna and Averroës through an analysis of their views on chance matter and divine providence It sets the debate against the philosophical historical background of Aristotelianism Neoplatonism and Islamic theology

**Science and Religion in Mamluk Egypt** Nahyan Fancy,2013-06-03 The discovery of the pulmonary transit of blood was a ground breaking discovery in the history of the life sciences and a prerequisite for William Harvey's fully developed theory of blood circulation three centuries later This book is the first attempt at understanding Ibn al-Nafīs's anatomical discovery from within the medical and theological works of this thirteenth century physician jurist and his broader social religious and intellectual contexts Although Ibn al-Nafīs did not posit a theory of blood circulation he nevertheless challenged the reigning Galenic and Avicennian physiological theories and the then prevailing anatomical understandings of the heart Far from being a happy guess Ibn al-Nafīs's anatomical result is rooted in an extensive re-evaluation of the reigning medical theories Moreover this book shows that Ibn al-Nafīs's re-evaluation is itself a result of his engagement with post-Avicennian debates on the relationship between reason and revelation and the rationality of traditionalist beliefs such as bodily resurrection Breaking new ground by showing how medicine philosophy and theology were intertwined in the intellectual fabric of pre-modern Islamic societies Science and Religion in Mamluk Egypt will be of interest to students and scholars of the History of Science the History of Medicine and Islamic Studies

**The Elements of Avicenna's Physics** Andreas Lammer,2018-02-05 This study is the first

comprehensive analysis of the physical theory of the Islamic philosopher Avicenna d 1037 It seeks to understand his contribution against the developments within the preceding Greek and Arabic intellectual milieu and to appreciate his philosophy as such by emphasising his independence as a critical and systematic thinker Exploring Avicenna's method of teaching and learning it investigates the implications of his account of the natural body as a three dimensionally extended composite of matter and form and examines his views on nature as a principle of motion and his analysis of its relation to soul Moreover it demonstrates how Avicenna defends the Aristotelian conception of place against the strident criticism of his predecessors among other things by disproving the existence of void and space Finally it sheds new light on Avicenna's account of the essence and the existence of time For the first time taking into account the entire range of Avicenna's major writings this study fills a gap in our understanding both of the history of natural philosophy in general and of the philosophy of Avicenna in particular This monograph has been awarded the annual BRAIS De Gruyter Prize Kulturpreis Bayern in the Study of Islam and the Muslim World and the Iran World Award for Book of the Year 2020

Avicenna on the Necessity of the Actual Celia Kathryn Hatherly, 2022-09-28 According to Avicenna whatever exists while it exists exists of necessity Not all beings however exist with the same kind of necessity Instead they exist either necessarily per se or necessarily per aliud Avicenna on the Necessity of the Actual His Interpretation of Four Aristotelian Arguments explains how Avicenna uses these modal claims to show that God is the efficient as well as the final cause of an eternally existing cosmos In particular Celia Kathryn Hatherly shows how Avicenna uses four Aristotelian arguments to prove this very un-Aristotelian conclusion These arguments include Aristotle's argument for the finitude of efficient causes in *Metaphysics* 2 his proof for the prime mover in the *Physics* and *Metaphysics* 12 his argument against the Megarians in *Metaphysics* 9 and his argument for the mutual entailment between the necessary and the eternal in *De Caelo* 1-12 Moreover Hatherly contends when Avicenna's versions of these arguments are correctly interpreted using his distinctive understanding of necessity and possibility the objections raised against them by his contemporaries and modern scholars fail

*The Unity of Science in the Arabic Tradition* Shahid Rahman, Tony Street, Hassan Tahiri, 2008-07-15 the demise of the logical positivism programme The answers given to these questions have deepened the already existing gap between philosophy and the history and practice of science While the positivists argued for a spontaneous steady and continuous growth of scientific knowledge the post positivists make a strong case for a fundamental discontinuity in the development of science which can only be explained by extrascientific factors The political social and cultural environment the argument goes on to determine both the questions and the terms in which they should be answered Accordingly the sociological and historical interpretation involves in fact two kinds of discontinuity which are closely related the discontinuity of science as such and the discontinuity of the more inclusive political and social context of its development More precisely it explains the discontinuity of the former by the discontinuity of the latter subordinating in effect the history of science to the wider political and social history The underlying idea is that each historical and social context generates scientific and philosophical questions of its own From this point of view the question surrounding the nature of knowledge and its development are entirely new topics typical of the twentieth century social context reflecting both the level and the scale of the development of science Truth, Philosophers, and Prophets: a Critical Study of Isaac Albalag's Sefer Tiqqun ha-De'ot Bakinaz Khalifa Abdalla, 2024-12-02 This book focuses on Isaac Albalag's perspective on the relationship between religion and philosophy In Sefer Tiqqun ha-De'ot a Hebrew translation with a commentary of al-Farabi's Arabic philosophical encyclopedia Maq'id al-Falasifah Albalag indicates his adherence to what is known in scholarship as the double truth doctrine By analysing the Tiqqun against its philosophical background and its critical engagement with the Maq'id this book demonstrates Albalag's unyielding

commitment to Aristotelianism as known to him through Averroes's lens concluding that his apparent embrace of the double truth doctrine is merely a strategic tool to carve out a distinct space for philosophy independent of religious beliefs
