### WHAT IS THE MISSION OF YOUR BUSINESS?

At CGCC, we combine the strength of hope with the power of innovative therapies, one patient at a time.

### WHAT ARE YOU MOST PROUD OF ABOUT YOUR BUSINESS?

Central Georgia Cancer Care is proud to have recently received the Quality Oncology Practice Initiative (QOPI®) Certification and the American Society of Clinical Oncology's (ASCO) Patient-Centered Cancer Care Certification for high-quality cancer care in 2022. Leading the way in Georgia, we are the only oncology center in the state with both QOPI® and ASCO accolades!

### HOW DO YOU DEFINE "LIVING WELL?"

Living well means more than looking after your health. It means

understanding that you should find pleasure in small moments that may or may not be related to cancer. Staying strong can be challenging after you've been diagnosed with cancer. You want to do everything you can to empower your healing, but sometimes you just do not know what to do. At Central Georgia Cancer Care you are never alone. Your Care Team is here to answer your questions, to provide helpful information and to find the resources to support your care.

### WHAT ARE YOU MOST EXCITED ABOUT RIGHT NOW IN OUR COMMUNITY?

We are excited and honored to offer our community world-class, award-winning cancer care close to home. People don't have to leave the comforts of the Macon community to receive the best possible care. What's more exciting and comforting than that?

## **Awardwinning Cancer Cures:**

Cancer's Cause, Cancer's Cure: The Truth About Cancer, Its Causes, Cures, and Prevention Morton Walker, D.P.M., 2013-09-17 Cancer is an illness we all dread simply because it is very difficult to cure Massive amounts of money have been spent not only trying to find a cure but to help potential victims prevent the disease from occurring in the first place Following on the heels of the discovery of DNA's double helix Dr Mirko Beljanski a microbiologist at the Pasteur Institute discovered some fundamental truths about cancerous DNA and how carcinogens act on DNA In the course of his discoveries he also discovered highly powerful and scientifically proven botanical agents that kill cancer cells Beljanski found that his botanicals were selective they only harmed the cancerous cells but didn't harm healthy cells In the process Dr Beljanski was vilified by the French government but he continued on with his research and found that when his botanical agents are coupled with traditional chemo and radiation cancer therapies each becomes more effective thus finding a highly viable integrative cancer solution Current studies on Dr Beljanski's products have been conducted through the Cancer Treatment Centers of America and the Center for Holistic Urology at Columbia University There is more research that needs to be done to confirm Dr Mirko Beljanski's major breakthroughs in cancer treatments There is a way to make this most feared of diseases manageable The war on cancer is winnable but only if we all band together and demand that the research be done so that anyone who ever hears the dreaded words you have cancer doesn't feel like they've been handed a death sentence

**CANCER CURE AND MYSTRIES AND YOGA** Dr. NITIN UNKULE, 2010-08-01 In this book I have described significant patterns in the life histories and emotional responses of cancer patients which suggested to me the notion of a Cancer Personality and then I came to know where the real Cancer in our society is There should be a certain resonance between therapist and patient as a decisive factor in psychotherapy which triggers the natural healing process Thus my basic interest is in paranormal phenomena while dealing with cancer and heart patients simply because evolution in Biology is outdated now the talk is about evolution of consciousness Changing the patient's belief system about cancer and the belief systems of the patient and the physician are crucial to the success of the therapy and can be used effectively to support the patient's potential for selfhealing

Congress. Senate. Committee on Appropriations. Subcommittee on Departments of Labor, Health and Human Services, Education, and Related Agencies,1993      **Cancer-gate** Samuel Epstein,2019-08-22 Award winning author Samuel S Epstein M D whose 1978 book *The Politics of Cancer* shook the political establishment by showing how the federal government had been corrupted by industrial polluters has written a book that is sure to be of equal consequence *Cancer Gate* How to Win the Losing Cancer War is a groundbreaking new book It warns that contrary to three decades of

promises we are losing the winnable war against cancer and that the hand in glove generals of the federal National Cancer Institute NCI and the private nonprofit American Cancer Society ACS have betrayed us These institutions Epstein alleges have spent tens of billions of taxpayer and charity dollars primarily targeting silver bullet cures strategies that have largely failed while virtually ignoring strategies for preventing cancer in the first place As a result cancer rates have escalated to epidemic proportions now striking nearly one in every two men and more than one in every three women This translates into approximately 50 percent more cancer in men and 20 percent more cancer in women over the course of just one generation

**Novel Approach to Curing Cancer** Jianqing Wu, Ping Zha, 2019-08-11 In this book the authors make extensive comparison between medical treatments and health optimization methods an improved mind body model in order to determine their relative and TRUE benefits for cancer patients For the health optimization method they examine its use history acceptance and performance throughout its history and for medicine they examine medical treatment history leading cancer theories standard of care formation formation of legal frameworks and overwhelming performance data we could find from the massive medical literature We can show with irrefutable evidence why medicine cannot cure cancer and what role it is actually playing The book 1 discloses a systematic methodology for curing cancer in confidence 2 extensively discusses how to do right things to win a speed contest in fighting cancer 3 extensively discusses how to do right things to control cancer cell population a critical strategy for survival 4 provides detailed analysis of fatal common mistakes that have taken nine of ten cancer patient lives 5 exposes flaws in the cancer treatment models medical research model the foundation of medicine and 6 conduct a detailed analysis of four killer factors which are routinely found in nearly all cancer care The approach used is similar to one used in Health Optimization Engineering a new branch of health art The book teaches the decisive roles of SPEED NUMBER and MULTIPLE FACTORS and how to fight cancer by using a two way optimization methodology Those three terms and optimization method are not mentioned in medical books cancer research articles and are not part of the language used in hospitals Our simulation and our kinetic studies show that both cancer development and reversal processes would take many years The rates of reversals for cancer and all chronic diseases are so slow that medicine cannot accurately evaluate This is why medicine cannot recognize or refuses to acknowledge any cure that requires half a year to several years to accomplish The approach we use in this book is directly in conflict with three core concepts in medicine dualism reductionism and population based approach Moreover we found that medical treatments can partially neutralize and totally nullify the curative benefits of our optimization method Based on our own findings and the results from reanalyzing massive existing medical publications we inevitably found that medical treatments are primarily responsible for creating the cancer panic and the treatments shorten lives in a super majority of cases We try to analyze every issue in the most comprehensive way Our analysis covers medical model and its legal framework leading cancer theories treatment development histories formation of standard of care control selections in drug trials the massive cancer controversies and

mountains of actual performance data The most convincing evidence is the performance verdicts by recent medical studies and latest meta reviews We try to build a watertight case that precludes any of those arguments that have been made by proponents of the reductionist medical model

**Holland-Frei Cancer Medicine** 8 James F. Holland, 2010 Holland Frei Cancer Medicine serves as a quick reference to current information on an extensive list of cancers including breast lung thyroid colorectal ovarian prostate and gastric cancer to name but a few Presented as an accessible pocket sized handbook the chapters are organized in an outline format offering only the most essential information on the etiology staging including TNM staging and treatment for each cancer type Individual chapters are devoted to the molecular biology of cancer cancer prevention cancer screening the mechanisms of chemotherapy and diagnostic imaging in cancer Additionally each chapter lists all the major phase III clinical trials and therefore serves as an excellent reference of the major randomized controlled trials for each cancer reported to date Specific chapters are also dedicated to the discussion of oncologic emergencies pain and palliation and prescription complications At the conclusion of the book a glossary of oncologic terms and chemotherapeutic drug programs a table of common cancer incidences and an overview of the mechanisms common uses and related toxicities of various anti cancer agents are featured In addition performance status tables mathematical formulas and a listing of common biomedical cancer web sites are highlighted
