Awareness Of Dying

John C. Morgan, Richard L. Morgan

Awareness Of Dying:

Awareness Of Dying Barney Glaser,Anselm Leonard Strauss, Death as a social ritual is one of the great turning points in human existence but prior to this classic work it had been subjected to little scientific study American perspectives on death seem strangely paradoxical the brutal fact of death is confronted daily in our newspapers yet Americans are unwilling to talk openly about the process of dying itself *Awareness of Dying* using a highly original theory of awareness examines the dying patient and those about him in social interaction It gives readers a language and tools of analysis for understanding who knows what about dying under what circumstances and what difference it makes *Awareness of Dying*

Barney G. Glaser,Anselm L. Strauss,1965 Death as a social ritual is one of the great turning points in human existence but prior to this classic work it had been subjected to little scientific study American perspectives on death seem strangely paradoxical the brutal fact of death is confronted daily in our newspapers yet Americans are unwilling to talk openly

Awareness of Dying Barney G. Glaser,Anselm L. Strauss,2017-07-28 Should patients be told they are dying How do families react when one of their members is facing death Who should reveal that death is imminent How does hospital staff doctors nurses and attendants act toward the dying patient and his family **Awareness of Dying, by Barney G. Glaser and Anselm L. Strauss**

Barney G. Glaser,Anselm L. Strauss,1965 *Handbook of Death and Dying* Clifton D. Bryant,2003-10 Dying is a social as well as physiological phenomenon Each society characterizes and consequently treats death and dying in its own individual ways ways that differ markedly These particular patterns of death and dying engender modal cultural responses and such institutionalized behavior has familiar economical educational religious and political implications The *Handbook of Death and Dying* takes stock of the vast literature in the field of thanatology arranging and synthesizing what has been an unwieldy body of knowledge into a concise yet comprehensive reference work This two volume handbook will provide direction and momentum to the study of death related behavior for many years to come Key Features More than 100 contributors representing authoritative expertise in a diverse array of disciplines Anthropology Family Studies History Law Medicine Mortuary Science Philosophy Psychology Social work Sociology Theology A distinguished editorial board of leading scholars and researchers in the field More than 100 definitive essays covering almost every dimension of death related behavior Comprehensive and inclusive exploring concepts and social patterns within the larger topical concern Journal article length essays that address topics with appropriate detail Multidisciplinary and cross cultural coverage *Awareness of Dying* Barney G. Glaser,1966 *Awareness of Dying* Barney G. Glaser,Anselm Leonard Strauss,1975 *Time for Dying* Graham McAleer,Barney Glaser,2017-09-29 This book has been written for those who must work with and give care to the dying Our discussion is not simple narrative or description it is a rendition of reality informed by a rather densely woven and fairly abstract theoretical scheme This scheme evolved gradually during the course of our research The second audience for this volume is social scientists who are less interested in dying than they are in useful

substantive theory Our central concern is with the temporal aspects of work The theory presented here may be useful to social scientists interested in areas far removed from health medicine or hospitals The training of physicians and nurses equips them for the technical aspects of dealing with illness Medical students learn not to kill patients through error and to save lives through diagnosis and treatment But their teachers put little or no emphasis on how to talk with dying patients how or whether to disclose an impending death or even how to approach the subject with the wives husbands children and parents of the dying Students of nursing are taught how to give nursing care to terminal patients as well as how to give post mortem care But the psychological aspects of dealing with the dying and their families are virtually absent from training Although physicians and nurses are highly skilled at handling the bodies of terminal patients their behavior to them otherwise is actually outside the province of professional standards Much if not most nontechnical conduct toward and in the presence of dying patients and their families is profoundly influenced by common sense assumptions essentially untouched by professional or even rational considerations or by current advancement in social psychological knowledge The process of dying in hospitals is much affected by professional training and codes and by the particular conditions of work generated by hospitals as places of work A third important consideration in int Awareness of Dying, by B.G. Glaser & A.L. Strauss B. G. Glaser,1966 **Psychology of Death and Dying** John C. Morgan,Richard L. Morgan,2006-04-01 Sooner or later each one of us faces death our own or others we care about And yet few take time beforehand to think about these endings and in the process may lose the wisdom of the ages that comes after facing death Perhaps this explains why when Plato was asked to summarize his philosophy he reportedly said Practice dying He understood that dying is what each one of us does throughout our lives whether it is leaving home the first time to go to school or departing from this planet when our lives end If we learn how to die to let go and get our egos out of the way we will have gained wisdom about how best to live This brief yet comprehensive book deals not only with the philosophical and psychological meaning of death but its practical implications for our lives Written by two brothers who have taught philosophy ethics psychology and religion at community colleges and four year private colleges this book can be used in many learning situations whether part of courses in philosophy ethics psychology or counseling or for short term workshops or continuing education courses for students in human services health care social work or any of the helping professions Encyclopedia of Death and Dying Glennys Howarth,Oliver Leaman,2003-12-16 In recent years there has been a massive upsurge in academic professional and lay interest in mortality This is reflected in academic and professional literature in the popular media and in the proliferation of professional roles and training courses associated with aspects of death and dying Until now the majority of reference material on death and dying has been designed for particular disciplinary audiences and has addressed only specific academic or professional concerns There has been an urgent need for an authoritative but accessible reference work reflecting the multidisciplinary nature of the field This Encyclopedia answers that need The Encyclopedia of Death and Dying consolidates and

contextualizes the disparate research that has been carried out to date The phenomena of death and dying and its related concepts are explored and explained in depth from the approaches of varied disciplines and related professions in the arts social sciences humanities medicine and the sciences In addition to scholars and students in the field from anthropologists and sociologists to art and social historians the Encyclopedia will be of interest to other professionals and practitioners whose work brings them into contact with dying dead and bereaved people It will be welcomed as the definitive death and dying reference source and an essential tool for teaching research and independent study Anthropology of Dying Mira Menzfeld,2017-10-10 Mira Menzfeld explores dying persons experiences of their own dying processes She reveals cultural specificities of pre exital dying in contemporary Germany paying special attention to how concepts of dying un well are perceived and realized by dying persons Her methodological focus centers on classical ethnographic approaches Close participant observation as well as informal and semi structured conversations For a better understanding of the specificities of dying in contemporary Germany the author provides a refined definition catalogue of adequate terms to describe dying from an anthropological perspective **Making Sense of Dying and Death** Andrew Fagan,2004 Health illness and disease are topics well suited to interdisciplinary inquiry This book brings together scholars from around the world who share an interest in and a commitment to bridging the traditional boundaries of inquiry We hope that this book begins new conversations that will situate health in broader socio cultural contexts and establish connections between health illness and disease and other socio political issues This book is the outcome of the first global conference on Making Sense of Health Illness and Disease held at St Catherine s College Oxford in June 2002 The selected papers pursue a range of topics from the cultural significance of narratives of health illness and disease to healing practices in contemporary society as well as patients illness experiences Encyclopedia of Death & Human Experience Clifton D. Bryant,Dennis L. Peck,2009-07-15 This two volume Encyclopdia through multidisciplinary and international contributions and perspectives organizes defines and clarifies more than 300 death related concepts A Good Death: On The Value Of Death And Dying Sandman, Lars,2004-09-01 Sandman highlights how our changing ideas about the value of life shape the concept of a good death He explores the varying perspectives on the good death that come from friends family physicians spiritual carers and others close to the dying person Setting out a number of arguments for and against existing thinking about a good death this book links to the practice of palliative care in several key areas He concludes that it is difficult to find convincing reasons for any one way to die a good death and argues for a pluralist approach **A Practical Guide to Death and Dying** John White,2004-01-01 Many people are so afraid of death that they dont want to think about it hear about it or plan for it But death must be understood and prepared for otherwise we will live in fear and burden our loved ones with unanswered questions and unnecessary responsibilities In A Practical Guide to Death and Dying consciousness researcher John White provides a thorough compassionate look at death and explores the biology psychology and metaphysics of ones own demise

In addition to recounting the personal stories of those who have developed a healthy attitude toward death White also offers a program for personal action He provides information about the evidence of life after death how to eliminate fears about death how to plan for it practical exercises for learning how to die and where to find more help A Practical Guide to Death and Dying will benefit readers who are ill and those who are healthy readers who care for the dying and readers who are curious about what lies ahead The Private Worlds of Dying Children Myra Bluebond-Langner, 2020-05-05 Winner of the Margaret Mead Award A classic moving study of terminally ill children that emphasizes their agency and shows how we can relate to dying children more honestly The death of a child writes Myra Bluebond Langner poignantly underlines the impact of social and cultural factors on the way that we die and the way that we permit others to die In a moving drama constructed from her observations of leukemic children aged three to nine in a hospital ward she shows how the children come to know they are dying how and why they attempt to conceal this knowledge from their parents and the medical staff and how these adults in turn try to conceal from the children their awareness of the child's impending death In contrast to many parents doctors nurses and social scientists who regard the children as passive recipients of adult actions Bluebond Langner emphasizes the children's role in initiating and maintaining the social order Her sensitive and stirring portrait shows the children to be willful purposeful individuals capable of creating their own worlds The result suggests better ways of relating to dying children and enriches our understanding of the ritual behavior surrounding death **Death in Documentaries** Benjamin Bennett-Carpenter, 2017-11-13 Memento mori is a broad and understudied cultural phenomenon and experience The term memento mori is a Latin injunction that means remember mortality or more directly remember that you must die In art and cultural history memento mori appears widely especially in medieval folk culture and in the well known Dutch still life vanitas paintings of the sixteenth and seventeenth centuries Yet memento mori extends well beyond these points in art and cultural history In *Death in Documentaries: The Memento Mori Experience* Benjamin Bennett Carpenter suggests that documentaries are an especially apt form of contemporary memento mori Bennett Carpenter shows that documentaries may offer composed transformative experiences in which a viewer may renew one's consciousness of mortality and thus renew one's life Speaking of Dying Fred B. Craddock (Jr.), Fred Craddock, Dale Goldsmith, Joy V. Goldsmith, 2012-07 Lays out a practical theology of dying reminding the church of its own considerable resources for assisting those who are terminally ill
