Whitehead, 2015-06-25 Excerpt from The Axioms of Descriptive Geometry This tract is written in connection with the previous tract No 4 of this series on Projective Geometry and with the same general aims In that tract after the statement of the axioms the ideas considered were those concerning harmonic ranges projectivity order the introduction of coordinates and cross ratio In the present tract after the statement of the axioms the ideas considered are those concerning the association of Projective and Descriptive Geometry by means of ideal points point to point correspondence congruence distance and metrical geometry. It has been my object in both tracts to extend the investigations just far enough to assure the reader that the whole of Geometry is really secured by the axioms stated My hopes for a comparative freedom from typographical errors are based upon my experience of the excellence of the University Press About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www forgottenbooks com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works The **Axioms of Descriptive Geometry** A.
