The Language of Journalism Angela Smith,Michael Higgins,2013-06-20 The Language of Journalism aims to provide an accessible wide ranging introductory textbook for a range of students The book explores the significance of a range of linguistic practices occurring in journalism demonstrating and facilitating the use of analysis in aiding professional journalistic and media practice The book introduces the differences in language conventions that develop across media platforms It covers all the key journalistic mediums available today including sport online and citizen journalism alongside the more standard chapters on magazine newspaper and broadcast journalism Clearly written and structured this will be a key text for journalism students *Dark Revelations - The Role Playing Game - Monster Manual* Chris Constantin,Jason Cable Hall,2014-12-07 Dark Revelations The Role Playing Game Monster Manual Book of Danger The Hodgepocalypse is not a safe place to be and this book tells you why Almost 300 monsters to use with your adventures *Air Power and the Arab World, 1909-1955* David Nicolle,Gabr Ali Gabr,2024-02-20 This entry in the MiddleEast War series is illustrated with abundant photographs from previously unused or very rarely used private and official sources Air Power and the Arab World 1909 1955 Volume 10 continues the story of the men and machines of the first half century of military aviation in the Arab world It tells the story of the first two weeks of the first of the Arab Israeli Wars also known as the Palestine War in May 1948 Whilst part of an ongoing series this volume stands alone as a history of the period covered By that time in Egypt Iraq Transjordan newly independent Syria Lebanon and to a lesser extent Saudi Arabia significant efforts had already been made to strengthen these countries armed forces Where Egypt Iraq and Syria were concerned these efforts included a determination to improve or in the case of Syria to establish their air forces All three air forces were thrown into the First Phase of the Palestine War and in the view of most subsequent commentators or historians they had failed to perform as well as their government and populations had expected However closer investigation and the removal of layers of propaganda

which have obscured the realities of this first Arab Israeli War show that the Arab air forces performed better than is generally realized. Arguably they had their limitations and weaknesses and these had also become apparent as the fighting intensified and losses began to mount. All this was always clearly pointed out in Arabic sources both official and unofficial unpublished or published only with limited circulation. Volume 10 of *Air Power and the Arab World* focuses on day to day events on the ground in the air and at sea during this hard fought phase. It does so in remarkable detail because the authors have accessed previously unpublished Arab official military documents supplemented by translations from Arabic books and articles containing official and personal accounts by those involved. Perhaps the most remarkable such source is the Operational Diary of the Royal Egyptian Air Force's Tactical Air Force based at al Arish in north eastern Sinai. *Air Power and the Arab World* 1909-1955 Volume 10 is illustrated by abundant photographs from previously unused or very rarely used private and official sources and includes specially commissioned color artworks.

Battalion Commanders at War Steven Thomas Barry, 2013-05-23 Most histories of the U S Army in World War II view the Mediterranean Theater of Operations primarily as a deadly training ground for very green forces where lessons learned on the beaches of Oran in the hills of the Kasserine Pass area and at the collapse of the Tunis bridgehead all contributed to later success in Western Europe. Steven Barry however contends that victory in the MTO would not have materialized without the leadership of battalion level commanders. They operated at a high level despite the lack of combat experience for themselves and their troops ineffective leadership at higher levels and deficiencies in equipment organization and mobilization. Barry portrays these officers as highly trained adaptable and courageous in their first combat experiences in North Africa and Sicily. Their leadership he argues brought discipline maturity experience and the ability to translate common operational guidance into tactical reality and thus contributed significantly to battlefield success in North Africa and Sicily in 1942-1943. To explain how this happened he examines their prewar experiences including professional military education and unit training exercises personal factors such as calmness and physical resilience under fire and the ability to draw upon doctrine creatively apply the resources at their disposal and clearly define and communicate mission goals and means. He also reveals how battalion leaders incorporated technological innovations into combined arms maneuvers by employing tank capabilities and close air support doctrine. As Barry's assessment shows these battalion commanders were not the sole reason for the Allied triumph in North Africa and Sicily but victory would not have been possible without the special brand of military leadership they exhibited throughout those campaigns. Under their leadership even inexperienced units were able to deliver credible combat performance and without the regular army battalion leaders U S units could not have functioned tactically early in the war. One of the few studies to focus on tactical adaptation at the battalion level in conventional warfare Barry's book attests to the

pivotal value of professional military education and makes an important contribution to today's organizational learning debate while providing an in depth view of adaptation of U S infantry and armored forces in 1942 1943
