

I. Introduction and Basic Definitions

In Moore: Read beginning of Chapter 1 (pages 3 - 6), and page 202

Statistics is a science that involves the extraction of information from numerical data obtained during an experiment or from a sample. It involves the design of the experiment or sampling procedure and the collection of the data, the analysis of the data, and making inferences (statements) about larger groups based on the data that was collected.

Definitions:

1. **Population:** the entire group of individuals (subjects) about which the researcher wants information.

1. All U.S. citizens
2. All male students at this university
3. All sections of all courses taught this semester at this university

2. **Parameter:** some characteristic of the population that the researcher wants to measure.

1. Proportion of U.S. citizens who voted in the last Presidential election
2. Average (mean) height of all male students at this university
3. Proportion of all sections of all courses taught by adjunct (part-time) faculty

Typically parameters are denoted using Greek letters, and this convention will be used in the remainder of this book. For example, the mean (average) of a population is often denoted with the Greek letter μ (read mu) and the proportion of a population that are "successes" is often denoted with the
