Basic Psychopathology A Programed Text:

Basic Psychotherapeutics: A Programmed Text C.W. Johnson, J.R. Snibbe, Leonard A. Evans, 2012-12-06 This book provides instruction in applying basic treatment strategies to patient care. Emphasis is placed on teaching diagnostic skills and especially the therapeutic management of emotionally disturbed patients. This book is intended as a companion text to *Basic Psychopathology A Programmed Text* which focuses more on teaching the description and observational skills for diagnosing common psychopathologic syndromes. *Basic Psychotherapeutics* gives pragmatic suggestions for treating a variety of psychopathologic disorders many of which are newly classified in the *Diagnostic Statistical Manual III DSM III* published by The American Psychiatric Association. We have adopted the terminology and many but not all of the diagnostic criteria used in *DSM III*. The treatment recommendations proposed are eclectic in nature and the information presented is non theoretical and patient centered. *Basic Psychotherapeutics* is divided into three parts. The first reviews basic data collection procedures and treatment skills; it includes chapters on interviewing the mental status examination and pharmacologic, psychological and behavioral therapy. The next section includes chapters on commonly encountered psychiatric syndromes such as schizophrenic, affective and anxiety disorders. The final chapters are presentations of special clinical interest such as the management of suicidal patients, psychiatric emergencies, treating the dying patient and his family and others.

Basic Psychopathology Clayton Warner Johnson, John R. Snibbe, Leonard A. Evans, 1975 The purpose of this book is to enable students of psychopathology to acquire skills in the systematic observation of patient behavior and data collection, the effective use of the Mental Status Examination, the correct application of psychiatric terminology to patients and the recognition and classification of all commonly encountered psychopathologic syndromes. It is a patient centered, clinically oriented text. Each chapter contains information basic to the evaluation of patients with psychological problems. The book is designed to be used primarily for the acquisition of diagnostic and observational skills. All the subject matter has been selected to be of practical value to the reader and is not tied to any theoretical approach or school. The text is self instructional and programmed and is planned to incorporate educational principles which facilitate learning and make optimum use of the reader's time. It can be used as a primary text or as a supplement to another; it can be used for independent study or with a variety of instructional media; it can be used for individual or group study. It contains core knowledge for diagnosing the basic syndromes and is designed to provide the reader with feedback about learning progress. The emphasis throughout is on the application of the knowledge gained to the patient.

have intellectually powerful champions Yet their very multitude is a scandal It provokes the professionally debilitating challenge Why does every psychiatric explanation satisfy some people and not others Recently this question has received a simple answer We cannot satisfactorily explain that which we lack the skill to describe To develop the fundamental skill a student must see many patients under the direction of an experienced and involved instructor to whom he can show his results accept correction and advance in his abilities But we need a means to amplify the clinical experience a text to supplement the instructor in bringing forth and strengthening the vocabulary needed to describe the phenomenology presentations and distinctions amongst psychiatric patients A programmed text such as this one is a satisfactory means because it can cover rapidly many themes and variations of a vast clinical experience It can permit the reader to progress at his own speed but bring a sense of mastery to him as he progresses He can check his knowledge as he sees patients on the clinical services This kind of text combined with patient practice is thorough fast and fun but should succeed in the important task of rapidly building for the student an authentic set of terms and concepts suitable for both clinical work and research
