Early Childhood Education Management examines the somewhat controversial concept of operating an early childhood service as a business. It challenges the assumption that an early childhood manager does not require specialist knowledge or skill and discusses which attributes an effective manager should possess. In this book, which brings together management theory and practice, Moloney and Pettersen address core issues at the heart of the management role, including the relationship between early childhood policy and broader legislative enactments, as well as issues related to the challenges and development of management skills. The book also draws upon real life examples from practice in order to offer insight into some of the most common topics and challenges related to management practice in Early Childhood Education, such as business acumen and entrepreneurship, recruitment and selection, financial management and budgeting, supervision, mentoring, staff development, curriculum management, collaborative working, and change management. Written by leading academics with practice experience, the book should be of great interest to researchers, academics, and postgraduate students in the field of education, specifically those working in early years and education policy and management. It should also be essential reading for managers working in Early Childhood settings.
