Basics of Phonological Analysis Linda M. L. Khan,1985 *First Language Acquisition* David Ingram,1989-09-07 This major textbook setting new standards of clarity and comprehensiveness will be welcomed by all serious students of first language acquisition Written from a linguistic perspective it provides detailed accounts of the development of children's receptive and productive abilities in all the core areas of language phonology morphology syntax and semantics With a critical acuity drawn from long experience and without attempting to offer a survey of all the huge mass of child language literature David Ingram directs students to the fundamental studies and sets these in broad perspective Students are thereby introduced to the history of the field and the current state of our knowledge in respect of three main themes method description and explanation Whilst the descriptive facts that are currently available on first language acquisition are central to the book its emphasis on methodology and explanation gives it a particular distinction The various ways in which research is conducted is discussed in detail as well as the strengths and weaknesses of various approaches leading to new perspectives on key theoretical issues First Language Acquisition provides advanced undergraduate and graduate students alike with a cogent and closely analysed exposition of how children acquire language in real time Equally importantly readers will have acquired the fundamental knowledge and skill not only to interpret primary literature but also to approach their own research with sophistication *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),

Friederici, Thomas Lachmann, 2012-12-06 The present book contains selected contributions from the international conference Basic Mechanisms of Language and Language Disorders This conference was held in Leipzig in September 1999 and was organized by the Department of Psychology at the University of Leipzig in collaboration with the Max Planck Institute of Cognitive Neuroscience and the Max Planck Institute for Evolutionary Anthropology It was held to commemorate the 120th anniversary of the foundation of the world's first institute of experimental psychology by Wilhelm Wundt in Leipzig This edition examines new results from different fields of psychology and neuro psychology of language reading and reading disability The presented book focuses on the following main topics BASIC FUNCTIONS OF LANGUAGE ACQUISITION AND LANGUAGE COMPREHENSION BASIC FUNCTIONS OF READING BASIC FUNCTIONS OF READING DISABILITY The title Basic Functions of Language Reading and Reading disability expresses the interdisciplinary character of the book It aims not only at bringing together different theoretical approaches but also at connecting these approaches with applied work Since it is necessary to understand basic functions of language and reading in order to understand reading disability the present book strives to foster a scientific exchange and to promote the emergence of synergy effects between the different fields *Pediatric Neuropsychology Case Studies* Jennifer Niskala Apps, Robert F. Newby, Laura Weiss Roberts, 2008-12-23 In the recent literature the most influential case study books in neuropsychology are in the adult realm Pediatric neuropsychology is a rapidly developing field with increasingly greater influence in the assessment diagnosis early identification and treatment of childhood illnesses This book will provide the first centralized comprehensive resource for case studies in pediatric neuropsychology Not only will this supply a valuable compilation for the growing numbers of professionals in this field but will also serve as an innovative and appealing resource for therapists teachers and others interested in child development This book will be structured in such a way that readers can easily access individual cases of interest as well as related areas of dysfunction Section breakdowns will be provided in order to highlight the combined focus of case presentations in acquired neuropsychological dysfunction as well as developmental disorders Each section will begin with an introductory chapter highlighting the salient feature of the concept and providing brief up to date reviews of the current research and theories Within each global section individual case studies will serve as stand alone chapters Contributing authors will be provided extensive guidance and coaching with regards to the standard format and information to be included in each chapter The first section of this book will present

cases involving neurological disorders The intention of this section is to provide not only classic examples of neurological dysfunction in children but also to provide interesting cases of unique or remarkable presentations The second section will present an accumulation of cases representing both common and progressive conceptualizations of developmental disabilities Section three has been designed to highlight cases which often present complex issues to neuropsychologists The case examples in this section will highlight the use of alternative treatments pathologies that are often a source of inquiry and situations that lack the more rigorous scientific data often utilized in other diagnostic procedures Additionally this section may include chapters on common differential diagnosis dilemmas in clinical practice Often multifaceted and even contradictory evidence can arise during evaluations resulting in complex or problematic situations for the clinician Such examples are difficult by their nature to forecast but rather would be added during the book s development as they occur
