Components of Armed Forces Basic Training and a Correctional Boot Camp Lara B. Von Tersch,2004 **Bully Nation** Charles Derber,Yale R. Magrass,2017-12-17 It s not just the bully in the schoolyard that we should be worried about The one on one bullying that dominates the national conversation this timely book suggests is actually part of a larger problem a natural outcome of the bullying nature of our national institutions And as long as the United States embraces militarism and aggressive capitalism systemic bullying and all its impacts at home and abroad will persist as a major crisis Bullying looks very similar on the personal and institutional levels it involves an imbalance of power and behavior that consistently undermines its victim securing compliance and submission and reinforcing the bully s sense of superiority and legitimacy The similarity this book tells us is not a coincidence Applying the concept of the sociological imagination which links private problems and public issues authors Charles Derber and Yale Magrass argue that individual bullying is an outgrowth and a necessary function of a larger social phenomenon Bullying is seen here as a structural problem arising from systems organized around steep power hierarchies from the halls of the Pentagon Congress and corporate offices to classrooms and playing fields and the environment Dominant people and institutions need to create a culture in which violence and aggression are seen as natural and just one where individuals compete over who will be bully or victim and each is seen as deserving their fate within this hierarchy The larger the inequalities of power in society or among nations or even across species the more likely it is that both institutional and personal bullying will become commonplace The authors see the life long psychological scars interpersonal bullying can bring but believe it is almost impossible to reduce such bullying without first challenging the institutions that breed and encourage it In the United States a system of intertwined corporations governments and military institutions carries out systemic bullying to create profits and sustain its own power While acknowledging the diversity and savagery of many other bully nations the authors contend that America as the most powerful nation in the world and one that aggressively promotes its system as a model merits special attention It is only by recognizing the bullying built into this model that we can address the real problem and in this *Bully Nation* makes a hopeful beginning
