XIII Mediterranean Conference on Medical and Biological Engineering and Computing 2013 Laura M. Roa Romero,2013-10-01 The general theme of MEDICON 2013 is Research and Development of Technology for Sustainable Healthcare This decade is being characterized by the appearance and use of emergent technologies under development This situation has produced a tremendous impact on Medicine and Biology from which it is expected an unparalleled evolution in these disciplines towards novel concept and practices The consequence will be a significant improvement in health care and well fare i e the shift from a reactive medicine to a preventive medicine This shift implies that the citizen will play an important role in the healthcare delivery process what requires a comprehensive and personalized assistance In this context society will meet emerging media incorporated to all objects capable of providing a seamless adaptive anticipatory unobtrusive and pervasive assistance The challenge will be to remove current barriers related to the lack of knowledge required to produce new opportunities for all the society while new paradigms are created for this inclusive society to be

socially and economically sustainable and respectful with the environment In this way these proceedings focus on the convergence of biomedical engineering topics ranging from formalized theory through experimental science and technological development to practical clinical applications **Journal of the Royal Aeronautical Society** ,2006

The Asia Information Retrieval Symposium AIRS was established by the Asian information retrieval community after the successful series of Information Retrieval with Asian Languages IRAL workshops held in six different locations in Asia starting from 1996 While the IRAL workshops had their focus on information retrieval problems involving Asian languages AIRS covers a wider scope of applications systems technologies and theory aspects of information retrieval in text audio image video and multimedia data This extension of the scope reflects and fosters increasing research activities in information retrieval in this region and the growing need for collaborations across subdisciplines We are very pleased to report that we saw a sharp increase in the number of submissions and their quality compared to the IRAL workshops We received 106 papers from nine countries in Asia and North America from which 28 papers 26% were presented in oral sessions and 38 papers in poster sessions 36% It was a great challenge for the Program Committee to select the best among the excellent papers The low acceptance rates witness the success of this year's conference After a long discussion between the AIRS 2004 Steering Committee and Springer the publisher agreed to publish our proceedings in the Lecture Notes in Computer Science LNCS series which is SCI indexed We feel that this strongly attests to the excellent quality of the papers **The Shock and Vibration Digest** ,2004 Smart Structures and Materials ,2002
