Christopher C. Berndt, K. A. Khor, Lugscheider, Erich F., 2001-01-01 *Defining Spaces in Iron Age Northumberland* Josh Gaunt, Claire Christie, Candy Hatherley, 2022-12-01 The Iron Age settlements excavated by Headland Archaeology UK Ltd at Morley Hill and Lower Callerton lie within the rich later prehistoric landscape of the Northumberland coastal plain This monograph presents the results of the excavation specialist analyses and provides a key dataset upon which to discuss regionally and nationally important later prehistoric research themes The excavations at Morley Hill and Lower Callerton offer two large scale new datasets to compare within the corpus of enclosed Iron Age settlement sites across the region allowing for an increased understanding of settlement patterns architectural forms and farming practices These include settlement development longevity and tempo the relationship between lowland and upland sites settlement organization and identity roundhouse architecture and the impact of contact with the Roman world At Morley Hill work revealed two later Iron Age settlements defined by rectilinear enclosures surrounding groups of roundhouses with evidence for earlier phases of activity The settlements at Morley Hill are comparable to many such distinctive settlements identified across the region and explored in recent years largely through developer funded excavations Lower Callerton represents a less explored form of extensive settlement with the excavation revealing evidence of earlier prehistoric activity overlain by a large Iron Age

enclosure with over 53 structures multiple sub enclosures and boundaries Comprehensive Bayesian modeling at Lower Callerton has provided a robust chronological framework indicating complex and continual settlement development from the middle Iron Age The implications of this in terms of wider settlement development tempo and longevity are explored While the monograph focuses on the Iron Age the identification and influence of earlier prehistoric activity is also explored The discussion is again enhanced by the program of radiocarbon dating and isotopic analysis of cereal grains from Neolithic pits at Lower Callerton Contributions to the Mesolithic in Europe Pierre M. Vermeersch, Philip van Peer, 1990 *Automated Methods of Computer Program Documentation*, 1970 *Minerals Yearbook*, 1992 *Neolithic Pits, Late Bronze Age/Early Iron Age Pit Alignments and Iron Age to Roman Settlements at Wollaston Quarry, Northamptonshire* Rob Atkins, Ian Meadows, 2024-04-04 Between 1990 and 1998 MOLA Museum of London Archaeology undertook a series of archaeological excavations within Wollaston Quarry covering an area of 116ha Eight excavation areas and a watching brief were undertaken revealing evidence of Neolithic pits late Bronze Age early Iron Age pit alignments and Iron Age to Roman settlements
