**Bradley Smith**

## **Along The Dingo Fence:**

**Along the Dingo Fence** Philip Holden, 2002      Meanderings in the Bush Richard MacMillen, Barbara MacMillen, 2009-07-15 The Channel Country is of special interest because its extreme aridity is disrupted unpredictably by summer monsoonal rains causing massive flooding and is followed by prodigious growth of plants and reproduction of animals before returning to daunting conditions of drought Yet it is a region teeming with life both plant and animal possessing unusual capacities for existing there It is also a region favoured by hardy pastoralists and their livestock who have learned to coexist with this harsh climate In *Meanderings in the Bush* the authors describe their many adventures and misadventures in the region with its climate its animals and its human inhabitants They also discuss results of their research which reveals some of the secrets for survival of many of the native animals including marsupials rodents birds and the remarkable desert crab These studies are cast in the light of both the prehistoric and historic records of the Lake Eyre Basin including the probable impacts of changing and or stable climates Aboriginal occupation later European pastoral development and the influences of introduced exotic mammals      *Kangaroos* Terence J. Dawson, 2012 Appreciation of the diversity of kangaroos in Australia and their lifestyles Insight into the ecology of kangaroos as it pertains to conservation issues Provides an understanding of the historical evolution of a major group of Australian mammals This book provides a clear and accessible account of kangaroos showing how their reproductive patterns social structure and other aspects of their biology make them well adapted to Australia's harsh climate and demanding environment Since the last edition of this book nearly 20 years ago much more is now known about the biology and ecology of these iconic animals This completely revised edition describes these new perspectives and attempts to counter the many urban and rural myths that still exist

The Dingo Debate Bradley Smith, 2015-08-03 The Dingo Debate explores the intriguing and relatively unknown story of Australia's most controversial animal the dingo Throughout its existence the dingo has been shaped by its interactions with human societies With this as a central theme the book traces the story of the dingo from its beginnings as a semi domesticated wild dog in South east Asia to its current status as a wild Australian native animal under threat of extinction It describes how dingoes made their way to Australia their subsequent relationship with Indigenous Australians their successful adaption to the Australian landscape and their constant battle against the agricultural industry During these events the dingo has demonstrated an unparalleled intelligence and adaptable nature seen in few species The book concludes with a discussion of what the future of the dingo in Australia might look like what we can learn from our past relationship with dingoes and how this can help to allow a peaceful co existence The Dingo Debate reveals the real dingo beneath the popular stereotypes providing an account of the dingo's behaviour ecology impacts and management according to scientific and scholarly evidence rather than hearsay This book will appeal to anyone with an interest in Australian natural history wild canids and the relationship between humans and carnivores      **Not Every Dog Has His Day** Jane Duckworth, 2009

Provides a balanced view on the many issues relating to the treatment and care of Australian dogs The Ultimate Guide to Wild Canines, Primitive Dogs, and Pariah Dogs Marjorie Daley, 2019-08-17 Why This Book The Ultimate Guide to Wild Canines Primitive Dogs and Pariah Dogs is geared toward the experienced dog owner who wants to own a pure wild canine a wolf dog coydog dingo or primitive pariah dog In this book we will examine pureblood wild canines and their crosses and look at several primitive pariah breeds We will lay out the challenges that you can expect from these breeds including housing transporting and socializing We will also discuss the current state and provincial laws surrounding ownership of wild canines This is not a training manual If you are an inexperienced dog owner and think having a wild canine or cross is cool or a status symbol please read this book very carefully Wild canines are not for the inexperienced dog owner For the sake of the dog you plan to bring home please consider your decision very carefully These dogs are a challenge even for experienced dog handlers Wild animals and their crossbreeds do not belong in 99% of homes The rehoming options are slim and your pet wild canine may end up paying for your decision with its life Primitive dogs have a long history of living on the edges of human habitation They may not come with the same legal challenges as a wild canine but you will still have plenty of work ahead of you including training and socializing your primitive Carefully think through your decision to adopt a primitive Bringing home a couch wolf can cause problems in your home If you've accidentally gotten a primitive dog from a shelter I highly encourage you to read this book then find a reputable trainer who understands that this is not just a dog I acquired my primitive dog accidentally and while I was an experienced dog owner I was still baffled until I realized what she was and adapted to her behaviors A common domesticated dog is a huge responsibility However a wild or primitive dog requires far more work Owning one may be the greatest experience in your life but it will also be one of the biggest challenges For the sake of your future pet take the time to read this book carefully Owning a wild dog a wolf coyote dingo or even something imported from Africa might sound like an amazing opportunity Imagine the looks you'll get Imagine how much fun it will be to walk down the street with your silver coated wolf by your side However before you make that sort of commitment take some time to learn about wild dogs Bringing a wild dog into your life can have some long term legal and ethical outcomes Because wild dogs are governed by state laws The Ultimate Guide to Wild Dogs Primitive Dogs and Pariah Dogs examines the basic laws and requirements for those owning wild dogs What happens when your wolf dog mistakes cattle for their rightful prey Can you keep a coy dog in an apartment Did you know that finding vet care can be a challenge for your wild dog and that their nutritional training and exercise requirements are different Will your homeowner's insurance even cover a wild dog Before you make a commitment to a wild dog learn what you can expect from bringing an undomesticated dog into your life This book also examines pariah and primitive dogs those with specific physical characteristics who live on the outskirts of human society These dogs are somewhat more socialized than a wild dog but come with their unique challenges and interesting personalities If you've met one of these unique dogs during a trip to another country how do you go about

bringing it home What sort of quarantines are in place Can they be fully associated into a home This book answers all these important questions and will help you to decide if a wild dog primitive dog or pariah dog is the right match for your home and family

**Floating Off the Page** Ken Wells, 2008-06-30 On any given day millions of Wall Street Journal readers put aside the serious business and economic news of the day to focus first on the paper's middle column aka the A-hed a virtual sound bubble for light literary fare a short story a tall tale an old yarn a series of vignettes and other unexpected delights that seem to float off the page In this first ever compendium of middle column pieces you'll find an eclectic selection of writings from the outlandish to the oddly enlightening Read about one man's attempt to translate the Bible into Klingon sheep orthodontics pet freezing and toad smoking being hip in Cairo modeling at auto shows piano throwing the fate of mail destined for the World Trade Center after 9/11 the plight of oiled otters in Prince William Sound and much much more Edited by 20 year Journal veteran Ken Wells and with a foreword by Liar's Poker author Michael Lewis *Floating Off the Page* is the perfect elixir for fans of innovative prose in all its forms and function

**Environmental Biology** Mike Calver, Alan Lymbery, 2009 *Environmental Biology* offers a fresh problem solving treatment of the topic for students requiring a biology background before further study in environmental science sustainable development or environmental engineering It begins with an environmental theme that carries through the text using three major case studies with a regional focus Key foundational knowledge is introduced and developed as the text progresses with students encouraged to integrate their accumulated learning to reach solutions A comprehensive coverage of scientific method including field experimentation and field techniques is an important part of the approach While emphasising the environmental theme the book introduces all facets of the biology discipline including cell biology evolution ecology conservation and restoration Publisher [On the Wallaby Track](#)

Laine Cunningham, 2017-01-05 **Australian Deserts** Steve Morton, 2022-02 *Australian Deserts Ecology and Landscapes* is about the vast sweep of the Outback a land of expanses making up three quarters of the continent the heart of Australia Steve Morton brings his extensive first hand knowledge and experience of arid Australia to this book explaining how Australian deserts work ecologically This book outlines why unpredictable rainfall and paucity of soil nutrients underpin the nature of desert ecosystems while also describing how plants and animals came to be desert dwellers through evolutionary time It shows how plants use uncertain rainfall to provide for persistence of their populations alongside outlines of the dominant animals of the deserts and explanations of the features that help them succeed in the face of aridity and uncertainty Richly illustrated with the photographs of Mike Gillam this fascinating and accessible book will enhance your understanding of the nature of arid Australia *A Symposium on the Dingo* Chris R. Dickman, Daniel Lunney, 2001

**Fencing for Conservation** Michael J. Somers, Matthew Hayward, 2011-11-23 The conflict between increasing human population and biodiversity conservation is one of the IUCN's key threatening processes Conservation planning has received a great deal of coverage and research as a way of conserving biodiversity yet while theoretically successful it has never been

tested Simple lines on maps to illustrate conservation areas are unlikely to be successful in the light of human encroachment It may be that some form of overt display is necessary to ensure the protection of reserves This may be signage presence of guards rangers or physical fencing structures The need for some form of barrier goes beyond restricting human access The megafauna of Africa pose a genuine threat to human survival In southern Africa fences keep animals in and protect the abutting human population Elsewhere fencing is not considered important or viable Where poverty is rife it won't take much to tip the balance from beneficial conservation areas to troublesome repositories of crop raiders diseases and killers Conversely in New Zealand fences are used to keep animals out Introduced species have decimated New Zealand's endemic birds reptiles and invertebrates and several sites have been entirely encapsulated in mouse proof fencing to ensure their protection Australia faces the same problems as New Zealand however surrounds its national parks with cattle fences Foxes and cats are free to enter and leave at will resulting in rapid recolonisation following poisoning campaigns How long will these poison campaigns work before tolerance aversion or resistance evolves in the introduced predator populations

**Why**

**Does the World Stay Green?** Thomas C. R. White, 2005 The theory explored in this book contends that animals are not controlled through predation but because they cannot obtain enough of the food they must have to reproduce and grow This book explains how this comes about in nature and describes some of the ways in which animals have evolved to cope

Medicine of Australian Mammals Larry Vogelnest, Rupert Woods, 2008-08-18 In Medicine of Australian Mammals more than 30 experts present the most current information available on the medical management of all taxa of Australian native mammals This comprehensive text is divided into two parts The first includes chapters on general topics relevant to the medical management of captive and free ranging Australian native mammals such as veterinary considerations for the rescue treatment rehabilitation and release of wildlife veterinary aspects of hand rearing orphaned marsupials marine mammal strandings and the role of the veterinarian and wildlife health investigation and necropsy of Australian mammals The second part covers the medicine of specific taxa of Australian native mammals Detailed information on taxonomy distribution biology anatomy physiology reproduction husbandry nutrition physical and chemical restraint clinical pathology hand rearing diseases zoonoses therapeutics reproductive management and surgery is included This practical one source reference is complemented by detailed photographs and illustrations as well as tables listing reproductive and physiological data diets haematology and biochemistry values and drug formularies Appendices include a checklist of the mammals of Australia and its territories and a guide to the identification of common parasites of Australian mammals Medicine of Australian Mammals is clinically oriented and is a must have for veterinary clinicians no matter how experienced The book will also be of use to veterinary students researchers biologists zoologists wildlife carers and other wildlife professionals

**Carnivores of Australia** Alistair Glen, Christopher Dickman, 2014-11-05 The Australian continent provides a unique perspective on the evolution and ecology of carnivorous animals In earlier ages Australia provided the arena for a spectacular radiation of

marsupial and reptilian predators The causes of their extinctions are still the subject of debate Since European settlement Australia has seen the extinction of one large marsupial predator the thylacine another the Tasmanian devil is in danger of imminent extinction and still others have suffered dramatic declines By contrast two recently introduced predators the fox and cat have been spectacularly successful with devastating impacts on the Australian fauna *Carnivores of Australia Past Present and Future* explores Australia's unique predator communities from pre historic historic and current perspectives It covers mammalian reptilian and avian carnivores both native and introduced to Australia It also examines the debate surrounding how best to manage predators to protect livestock and native biodiversity Readers will benefit from the most up to date synthesis by leading researchers and managers in the field of carnivore biology By emphasising Australian carnivores as exemplars of flesh eaters in other parts of the world this book will be an important reference for researchers wildlife managers and students worldwide

*Dingo* Brad Purcell, 2010-09-01 Many present day Australians see the dingo as a threat and a pest to human production systems An alternative viewpoint which is more in tune with Indigenous culture allows others to see the dingo as a means to improve human civilisation The dingo has thus become trapped between the status of pest animal and totemic creature This book helps readers to recognise this dichotomy as a deeper understanding of dingo behaviour is now possible through new technologies which have made it easier to monitor their daily lives Recent research on genetic structure has indicated that dingo purity may be a human construct and the genetic relatedness of wild dingo packs has been analysed for the first time GPS telemetry and passive camera traps are new technologies that provide unique ways to monitor movements of dingoes and analyses of their diet indicate that dietary shifts occur during the different biological seasons of dingoes showing that they have a functional role in Australian landscapes *Dingo* brings together more than 50 years of observations to provide a comprehensive portrayal of the life of a dingo Throughout this book dingoes are compared with other hypercarnivores such as wolves and African wild dogs highlighting the similarities between dingoes and other large canid species around the world

National Museum of Australia Dimity Reed, 2002 The book features the stunning photography of John Gollings An exciting celebration of the latest creation of the National Museum of Australia illustrated in full colour with superb graphics by vivid one of Australia's new and cutting edge graphic design studios

Australia Margo Daly, 2003 With fresh journalistic writing and reams of information on what to see and do this guide takes readers from the big cities to the countryside Includes candid reviews on restaurants and accommodations for all budgets 83 maps Full color insert Two color throughout

**Shadows of War on the Brisbane Line** Graham Smith, 2011 Recollections of a young boy growing up in a Queensland bush community during the most turbulent time in Australia's history The stories are from a world that is almost unrecognisable to the one we live in today about a community that no longer exists My immediate family want to remember Grandad's stories and I hope the wider audience will enjoy either renewing their acquaintance with the world of their childhood or learning about the world of parents and grandparents

The Best Australian Science Writing 2023 Donna Lu, 2023-11-01 Should we alter animals DNA to save them from extinction What secrets will old ice reveal to us about the Earth's deep past How is the world's most expensive and explosive substance made Great science writing offers fascinating insights into our surrounding environments inspires awe at the wonders of the natural world and also seeks to understand and address some of the biggest problems of our time Science writing encompasses the vastness of the universe and all the diverse life forms within it Stories abound in both the microscopic and the astronomical from the scientists trying to reverse engineer brain circuitry to the largest radio telescope of its kind on Earth which could help us detect alien life This much loved anthology now in its thirteenth year selects the most thought provoking poignant and dazzling science stories and essays from Australian writers poets and scientists With a foreword by scientist and engineer Professor Mary O Kane AC The Best Australian Science Writing 2023 covers another remarkable year filled with watershed moments in science INCLUDES THE SHORTLISTED ENTRIES FOR THE 2023 UNSW PRESS BRAGG PRIZE FOR SCIENCE WRITING AND THE 2022 STUDENT PRIZE WINNING ESSAY CONTRIBUTORS Jo Chandler Angus Dalton Nicky Phillips Jacinta Bowler Helen Sullivan Heather Taylor Johnson Sara Webb Meredi Ortega Drew Rooke Amalyah Hart Alice Klein Lauren Fuge Zoe Kean Miki Perkins Bianca Nogrady Rebecca Gigg's Alice Gorman Belinda Smith and Alan Weedon Felicity Plunkett Clare Watson Fiona McMillan Webster Euan Ritchie Paul Biegler Tabitha Carvan Karlie Noon and Krystal De Napoli Jane McCredie Elizabeth Finkel Smriti Mallapaty Anne Casey Jackson Ryan Carl Smith
