its place in the larger human narrative *The Oxford Encyclopedia of Women in World History* Bonnie G. Smith, 2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work Although there has been extensive research on women in history by region no text or reference work has comprehensively covered the role women have played throughout world history The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes The Encyclopedia contains over 1 250 signed articles arranged in an A Z format for ease of use The entries cover six main areas biographies geography and history comparative culture and society including adoption abortion performing arts organizations and movements such as the Egyptian Uprising and the Paris Commune women's and gender studies and topics in world history that include slave trade globalization and disease With its rich and insightful entries by leading scholars and experts this reference work is sure to be a valued go to resource for scholars college and high school students and general readers alike

The Science of the Dogon Laird Scranton, 2006-09-22 A look at the close resemblance between the creation and structure of matter in both Dogon mythology and modern science Reveals striking similarities between Dogon symbols and those used in both the Egyptian and Hebrew religions Demonstrates the parallels between Dogon mythical narratives and scientific concepts from atomic theory to quantum theory and string theory The Dogon people of Mali West Africa are famous for their unique art and advanced cosmology The Dogon s creation story describes how the one true god Amma created all the matter of the universe Interestingly the myths that depict his creative efforts bear a striking resemblance to the modern scientific definitions of matter beginning with the atom and continuing all the way to the vibrating threads of string theory Furthermore many of the Dogon words symbols and rituals used to describe the structure of matter are quite similar to those found in the myths of ancient Egypt and in the daily rituals of Judaism For

example the modern scientific depiction of the informed universe as a black hole is identical to Amma s Egg of the Dogon and the Egyptian Benben Stone The Science of the Dogon offers a case by case comparison of Dogon descriptions and drawings to corresponding scientific definitions and diagrams from authors like Stephen Hawking and Brian Greene then extends this analysis to the counterparts of these symbols in both the ancient Egyptian and Hebrew religions What is ultimately revealed is the scientific basis for the language of the Egyptian hieroglyphs which was deliberately encoded to prevent the knowledge of these concepts from falling into the hands of all but the highest members of the Egyptian priesthood The Science of the Dogon also offers compelling new interpretations for many of the most familiar Egyptian symbols such as the pyramid and the scarab and presents new explanations for the origins of religiously charged words such as Jehovah and Satan When the Golden Bough Breaks Peter Munz,2016-03-02 This original provocative study first published in 1973 presents a new method of interpretation of mythology and reveals the wide ranging implications of this universal phenomenon for many disciplines The volume begins with a sympathetic but critical examination of L vi Strauss s interpretation of mythology Professor Munz points out the deficiencies in structuralist interpretations and takes L vi Strauss s neglect of the historicity of all myths as a starting point for an alternative approach to mythology Myths he argues come in typological series If the whole series is read forward to the most specific version the myths will reveal their inherent meaning typologically
