Perfetti,Laurence Rieben,Michel Fayol,1997-08-01 This distinctive cross linguistic examination of spelling examines the cognitive processes

that underlie spelling and the process of learning how to spell The chapters report and summarize recent research in English German Hebrew and French Framing the specific research on spelling are chapters that place spelling in broad theoretical perspectives provided by cognitive neuroscience psycholinguistic and writing system linguistic frameworks Of special interest is the focus on two major interrelated issues how spelling is acquired and the relationship between reading and spelling An important dimension of the book is the interweaving of these basic questions about the nature of spelling with practical questions about how children learn to spell in classrooms A motivating factor in this work was to demonstrate that spelling research has become a central challenging topic in the study of cognitive processes rather than an isolated skill learned in school It thus brings together schooling and learning issues with modern cognitive research in a unique way testing children writing strings of letters as a teacher pronounces words ever so clearly In parts of the United States it can also bring an image of specialized wizardry and school room competition the spelling bee And for countless adults who confess with self deprecation to being terrible spellers it is a reminder of a mysterious but minor affliction that the fates have visited on them Beneath these popular images spelling is a human literacy ability that reflects language and nonlanguage cognitive processes This collection of papers presents a sample of contemporary research across different languages that addresses this ability To understand spelling as an interesting scientific problem there are several important perspectives First spelling is the use of conventionalized writing systems that encode languages A second asks how children learn to spell Finally from a literacy point of view another asks the extent to which spelling and reading are related In collecting some of the interesting research on spelling the editors have adopted each of these perspectives Many of the papers themselves reflect more than one perspective and the reader will find important observations about orthographies the relationship between spelling and reading and issues of learning and teaching throughout the collection **PC Mag** ,1996-12-17 PCMag.com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology
