Castillo, 2007-07-23 A hugely important text for advanced undergraduates as well as graduates with an interest in stream and river ecology this second updated edition is designed to serve as a textbook as well as a working reference for specialists in stream ecology and related fields The book presents vital new findings on human impacts and new work in pollution control flow management restoration and conservation planning that point to practical solutions All told the book is expanded in length by some twenty five percent and includes hundreds of figures most of them new      Altered Land Jules Hardy, 2002-09-02 I missed the turning over Battersea Bridge I didn't know it would make a difference that the manner of living seconds and minutes mattered Joan is a single mother beautiful talented and desired John is her adored son her Merboy Growing up in the West Country his life is lived outdoors playing in the creek by their cottage in Devon swimming hunting for shells collecting bits of old boats On his thirteenth birthday Joan treats him to a trip to London to buy his first pair of Levi's jeans Unused to city driving she takes a wrong turn The repercussions of that moment's hesitation are devastating Their story recounts the life altering effects of that one moment It is a story about a mother's heartbreaking love for her son and the different ways people survive damage With sensitivity and compassion Jules Hardy's lyrical prose explores the strengths and flaws of this unique relationship between a mother and her son and vividly describes the altered worlds in which they must live It is a wonderfully assured debut from an extraordinary new British talent      **Remote Sensing for Ecology and Conservation** Ned Horning, Julie A. Retallack, 2012-12-06 Landscapes viewed from afar have a timeless quality that is soothing to the human spirit Yet a tranquil wilderness scene is but a snapshot in the steady stream of surficial change Wind water and human activities reshape the landscape by means of gradual to catastrophic and usually irreversible events Much of this change destroys past landscapes but at some times and places landscapes are buried in the rock record This work is dedicated to the discovery of past landscapes and their life

through the fossil record of soils A long history of surficial changes extending back almost to the origin of our planet can be deciphered from the study of these buried soils or paleosols Some rudiments of this history and our place in it are outlined in a final section of this book But first it is necessary to learn something of the language of soils of what happens to them when buried in the rock record and which of the forces of nature can be confidently reconstructed from their remains Much of this preliminary material is borrowed from soil science but throughout emphasis is laid on features that provide most reliable evidence of landscapes during the distant geological past This book has evolved primarily as a text for senior level university courses in paleopedology the study of fossil soils

Coupled Models for the Hydrological Cycle Axel Bronstert,Jesus Carrera,Pavel Kabat,Sabine Lütkeemeier,2005-08-29 Hydrologists climatologists soil scientists and environmental engineers are frequently asked to analyse complex environmental problems It is becoming increasingly apparent that these problems usually involve feedbacks between atmospheric ecological and hydrological systems as well as human society It is often the feedbacks between systems that are of greatest interest because they may produce unanticipated responses That is why coupling of different compartments of the Earth system has emerged as a general challenge to the modelling community This book considers an array of state of the art coupling and modelling concepts First the relevant Earth system cycles are presented followed by a discussion on scale issues and multiple equilibria Inter and intra compartmental coupling is addressed along with a debate on non linearities and questions of parameterisation Several applications are presented where a focus is on cases where the hydrological cycle plays a central role
