Altering Fate Why The Past Does Not Predict The Future:

Altering Fate Michael Lewis, 1998-07-13 Few people question the pervasive belief that early childhood exerts an inordinate power over adult achievements relationships and mental health Once robbed of our potential by the inadequacies of our upbringing the theory goes we risk being trapped in maladaptive patterns and unfulfilling lives But does early experience really seal our fate Daring to challenge prevailing models of child development this provocative book argues that what enables us to survive and sets us free from our pasts is our astonishing adaptability to change shaped by the uniquely human attributes of consciousness will and desire

Beyond the Dyad Michael Lewis,K. Takahashi,2005-01-01 There is consensus among social scientists that human beings from infants to elderly people develop social relationships with multiple significant others In fact everyday observations of individuals reveal that even infants interact not only with their mother but also with a variety of significant others However the attachment theory which has dominated theories and empirical studies of social relationships has argued for a narrower framework In this special issue four theoretical papers each of which provides models of social interaction that go beyond the mother child dyad are presented They theoretically contrast the attachment with the mother to relationships with multiple significant others and show that models assessing multiple relationships to others are more predicative of subsequent social and emotional adjustment Commentaries including attachment theorists and anthropologists to deepen the discussion are also presented Researchers and students in developmental psychology clinical psychology and psychiatry as well as teachers nurses and parents interested in these discussions will find in this issue essential theories that go beyond the mother child dyad

The Psychological Development of Girls and Women Sheila Greene,2014-11-27 Choice Recommended Read This thoroughly revised new edition updates Sheila Greene s original transformative account of the psychological development of girls and women and the central role of time in shaping human experience Greene critically reviews traditional and contemporary theoretical approaches ranging from orthodox psychoanalysis to relational and post modern theories and argues that even those that claim to focus on development have presented a view of women s lives as fixed and determined by their nature or their past These theories she believes should be rejected because of their inherent lack of validity and their frequently oppressive implications for women Essential but often neglected insights from the more compelling developmental and feminist theories are woven together within a theoretical

framework that emphasizes temporality emergence and human agency The result is a liberating theory of women s psychological development as constantly emerging and changing in time rather than as static and fixed by their nature socio cultural context and personal history Updated for a new generation of readers The Psychological Development of Girls and Women will continue to be essential reading for students and researchers in the psychology of women developmental psychology and women s studies

psychology and pediatrics p The Rise of Consciousness and the Development of Emotional Life Michael Lewis, 2013-10-16
Synthesizing decades of influential research and theory Michael Lewis demonstrates the centrality of consciousness for emotional development At first infants competencies constitute innate reactions to particular physical events in the child's world These action patterns are not learned but are readily influenced by temperament and social interactions With the rise of consciousness these early competencies become reflected feelings giving rise to the self-conscious emotions of empathy envy and embarrassment and later shame guilt and pride Focusing on typically developing children Lewis also explores problems of atypical emotional development Winner of William James Book Award Society for General Psychology APA Division 1
