Representations of Technoculture in Don DeLillo's Novels

Laila Sougri, 2023-09-04 This book is the first to explore technoculture in all of Don DeLillo s novels From *Americana* 1971 to *The Silence* 2020 the American author anatomizes the constantly changing relationship between culture and technology in overt and layered aspects of the characters experiences Through a tendency to discover and rediscover technocultural modes of appearance DeLillo emphasizes settings wherein technological progress is implicated in cultural imperatives This study brings forth representations of such implication interaction through various themes particularly perception history reality space architecture information and the posthuman The chapters are based on a thematic structure that weaves DeLillo s novels with the rich literary criticism produced on the author and with the various theoretical frameworks of technoculture This leads to the formulation and elaboration on numerous objects of research extracted from DeLillo s novels namely the theorization of DeLillo s radiance in dailiness the investigation of various uses of technology as an extension the role of image technologies in redefining history the reconceptualization of the ethical and behavioral aspects of reality the development of tele visual and embodied perceptions in various technocultural spaces and the involvement of information technologies in reconstructing the beliefs behaviors and activities of the posthuman One of the main aims of the study is to show how DeLillo s novels bring to light the constant transformation of technocultural everydayness It is argued that though such transformation is confusing or resisted at times it points to a transitional mode of being This transitional state does not dehumanize DeLillo s characters it reveals their humanity in a continually changing world
