Sussman, C. Robert Cloninger, 2011-08-02 This book is about the evolution and nature of cooperation and altruism in social living animals focusing especially on non human primates and on humans Although cooperation and altruism are often thought of as ways to attenuate competition and aggression within groups or are related to the action of selfish genes there is increasing evidence that these behaviors are the result of biological mechanisms that have developed through natural selection in group living species This evidence leads to the conclusion that cooperative and altruistic behavior are not just by products of competition but are rather the glue that underlies the ability for primates and humans to live in groups The anthropological primatological paleontological behavioral neurobiological and psychological evidence provided in this book gives a more optimistic view of human nature than the more popular conventional view of humans being naturally and basically aggressive and warlike Although competition and aggression are recognized as an important part of the non human primate and human behavioral repertoire the evidence from these fields indicates that cooperation and altruism may represent the more typical normal and healthy behavioral pattern The book is intended both for the general reader and also for students at a variety of

levels graduate and undergraduate it aims to provide a compact accessible and up to date account of the current scholarly advances and debates in this field of study and it is designed to be used in teaching and in discussion groups The book derived from a conference sponsored by N S F the Wenner Gren Foundation for Anthropological Research the Washington University Committee for Ethics and Human Values and the Anthropedia Foundation for the study of well being

A Theory of Social Action R. Tuomela,2012-12-06 It is somewhat surprising to find out how little serious theorizing there is in philosophy and in social psychology as well as sociology on the nature of social actions or joint act hons in the sense of actions performed together by several agents Actions performed by single agents have been extensively discussed both in philosophy and in psycho ogy There is ac cordingly a booming field called action theory in philosophy but it has so far strongly concentrated on actions performed by single agents only We of course should not forget game theory a discipline that systematically studies the strategic interac tion between several rational agents Yet this important theory besides being restricted to strongly rational acting fails to study properly several central problems related to the concep tual nature of social action Thus it does not adequately clarify and classify the various types of joint action except perhaps from the point of view of the agents utilities This book presents a systematic theory of social action Because of its reliance on so

called purposive causation and generation it is called the purposive causal theory This work also discusses several problems related to the topic of social action for instance that of how to create from this perspective the most central concepts needed by social psychology and sociology While quite a lot of ground is covered in the book many important questions have been left unanswered and many others unasked as well

Social Development as Preference Management Rachel Karniol, 2010-04-12 Karniol engagingly presents social development in children through the language of preference management Conversational excerpts garnered from around the world trace how parents talk about preferences how infants and children's emergent language conveys their preferences how children themselves are impacted by others' preferences and how they in turn influence the preferences of adults and peers The language of preferences is used to crack into altruism aggression and morality which are ways of coming to terms with other people's preferences Behind the scenes is a cognitive engine that uses transformational thought conducting temporal imaginal and mental transformations to figure out other people's preferences and to find more sophisticated means of outmanoeuvring others by persuading them and playing with one's own mind and other people's minds when preferences are blocked This book is a unique and sometimes amusing must read for anyone interested in child development language acquisition socialisation and communication
