Alvarez, 1989 A Nobel Prize winning physicist chronicles his life and thought offers insights into his quest for scientific understanding and discusses his hypothesis that explains the sudden extinction of the dinosaurs **Latinos in Science, Math, and Professions** David E. Newton, 2014-05-14 Provides short biographies of more than 175 notable Hispanic American professionals in science mathematics medicine and related fields Discovering Alvarez Luis W. Alvarez, 1987-12-30 Luis W Alvarez has had a breathtakingly varied and important career of discovery adventure and invention The winner of the 1968 Nobel Prize in physics for his work on subatomic particles Alvarez participated as a scientific observer of the Hiroshima bombing mission formulated the asteroid theory of dinosaur extinctions discovered the radioactivity of tritium took x rays of the Second Pyramid at Giza designed the Berkeley proton linear accelerator first observed fundamental particle resonances created the variable focus thin lens analyzed the Kennedy assassination film and invented the Ground Control Approach radar system for airplane landings to name but a few of his experiences and accomplishments Discovering Alvarez collects articles by this innovative physicist documenting his outstanding contributions The articles which span his career are accompanied by a remarkable collection of commentary by the colleagues and

students who worked closely with Alvarez on each project or discovery The Martians of Science István Hargittai, 2008 Hargittai tells the story of five remarkable Hungarians Wigner won a Nobel Prize in theoretical physics Szilard was the first to see that a chain reaction based on neutrons was possible initiated the Manhattan Project but left physics to try to restrict nuclear arms von Neumann could solve difficult problems in his head and developed the modern computer for more complex problems von Kármán became the first director of NASA's Jet Propulsion Laboratory providing the scientific basis for the U.S. Air Force and Teller was the father of the hydrogen bomb whose name is now synonymous with the controversial Star Wars initiative of the 1980s **Physics** Alfred B. Bortz, Fred Bortz, PH.D., 2014-05-14 Contains a history of physics providing definitions and explanations of related topics and brief biographies of scientists of the twentieth century **Hear No Evil** Donald Byron Thomas, 2013-09-01 Did a shot from the grassy knoll kill President Kennedy? If so, was Oswald part of a conspiracy or an innocent patsy? Why have scientific experts who examined the evidence failed to put such questions to rest? In 2001, scientist Dr. Donald Byron Thomas published a peer-reviewed article that revived the debate over the finding by the House Select Committee on Assassinations that there had indeed been a shot from the grassy knoll caught on a police dictabelt recording. The Washington Post said: "The House Assassinations Committee may well have been right after all." In *Hear No Evil*, Thomas explains the acoustics evidence in detail, placing it in the context of an analysis of all the scientific evidence in the Kennedy assassination. Revering no sacred cows, he demolishes myths promulgated by both Warren Commission adherents and conspiracy advocates and presents a novel and compelling reinterpretation of the single bullet theory. More than a scientific tome, *Hear No Evil* is a searing indictment of the government's handpicked experts who failed the public trust to be fair and impartial arbiters of the evidence **Luis W. Alvarez Papers** Luis W. Alvarez, Online Archive of California, The Luis W. Alvarez papers include correspondence, research files, diaries, and notes relating to Alvarez's research as a Professor in the Department of Physics at the University of California Berkeley and as a research associate at the Lawrence Berkeley National Laboratory. Projects documented include Alvarez's work as a member of the Manhattan Project, his studies of hyperon events in balloon-flown emulsions, his contributions to the Pyramid Project, and his research on bubble chambers. The collection includes multiple drafts of Alvarez's autobiography *Adventures of a Physicist*, as well as correspondence and other materials relating to Alvarez's receipt of the Nobel Prize in Physics in 1968 *The Origin of the Concept of Nuclear Forces* L.M. Brown, H. Reichenberg, 1996-01-01 The concept of fundamental nuclear forces emerged gradually during the start of the 1930s and reached our present level of description some time before the 1950s. *The Origin of the Concept of Nuclear Forces* presents a unified, comprehensive account of the history of this important part of the modern scientific worldview. In addition, the authors, foremost experts in the field, examine the sociological and philosophical aspects of the story in light of the various theories of scientific development. The book contains analyses of published work, archival materials, and original interviews. It will be appealing primarily to historians of science and physicists interested in the roots

of their field Image and Logic Peter Galison,1997-10 Engages with the impact of modern technology on experimental physicists This study reveals how the increasing scale and complexity of apparatus has distanced physicists from the very science which drew them into experimenting and has fragmented microphysics into different technical traditions

Instruments of Science Robert Bud, Deborah Jean Warner,1998 With over 300 entries from the ancient abacus to X ray diffraction as represented by a ca 1900 photo of an X ray machine as well as the latest research into filmless x ray systems this tour of the history of scientific instruments in multiple disciplines provides context and a bibliography for each entry Newer conceptions of instrument include organisms widely used in research e g the mouse drosophila and E coli Bandw photographs and diagrams showcase more traditional instruments from The Science Museum London and the Smithsonian s National Museum of American History Annotation copyrighted by Book News Inc Portland OR *The Harvest of a Century* Siegmund Brandt,2009 Physics was the leading science of the twentieth century and the book retraces important discoveries made between 1895 and 2001 in 100 self contained Episodes Each is a short story of the scientists involved their time and their work The book is richly illustrated by about 600 portraits photographs and figures LBL Research Review ,1987

The New Nuclear Forensics Vitaly Fedchenko,2015 Nuclear material changes its form and properties as it moves through the nuclear fuel cycle from one facility to another Each step of the fuel cycle or each use of the material will inevitably leave its mark The science of determining the history of a sample of nuclear material through the study of these characteristics is known as nuclear forensics While nuclear forensic analysis has normally been associated with investigations and prosecutions in the context of trafficking of nuclear materials or nuclear terrorism it had wider applications in national security contexts such as nuclear non proliferation disarmament and arms control The New Nuclear Forensics is the first book to give a definitive guide to this broader definition of nuclear forensic analysis This book describes the various methods used in nuclear forensics giving first a broad introduction to the process followed by details of relevant measurement techniques and procedures In each case the advantages and limitations are outlined To put these methods in context the book also recounts the history of the discipline and describes the diverse contemporary applications of nuclear forensics

Drawing Out Leviathan Keith M. Parsons,2001-10-01 are dinosaurs social constructs Do we really know anything about dinosaurs Might not all of our beliefs about dinosaurs merely be figments of the paleontological imagination A few years ago such questions would have seemed preposterous even nonsensical Now they must have a serious answer At stake in the Science Wars that have raged in academe and in the media is nothing less than the standing of science in our culture One side argues that science is a social construct that it does not discover facts about the world but rather constructs artifacts disguised as objective truths This view threatens the authority of science and rejects science s claims to objectivity rationality and disinterested inquiry Drawing Out Leviathan examines this argument in the light of some major debates about dinosaurs the case of the wrong headed dinosaur the dinosaur heresies of the 1970s and the debate over the extinction of

dinosaurs Keith Parsons claims that these debates though lively and sometimes rancorous show that evidence and logic not arbitrary rules of the game remained vitally important even when the debates were at their nastiest They show science to be a complex set of activities pervaded by social influences and not easily reducible to any stereotype Parsons acknowledges that there are lessons to be learned by scientists from their would be adversaries and the book concludes with some recommendations for ending the Science Wars

Global Science Literacy V. J. Mayer, 2014-02-22 The authors propose the science curriculum concept of Global Science Literacy justifying its use internationally with reference to the nature of science the probable direction of science in the new millennium the capability for GSL to develop inter cultural understanding and its relevance to non Western cultures and traditions GSL curricula are organized conceptually rather than by science discipline include objectives from the social studies construct of global education and represent the broad spectrum of science methodologies not just those of the physical sciences typical of current curricula The book is recommended reading for all who are interested in the future of science curricula and interested in considering a non traditional viewpoint Curriculum developers and researchers future teachers and graduate students in general curriculum courses science education courses and social studies education courses and their professors should be particularly interested The book is divided into three sections In the first section the concept of Global Science Literacy and the justification of its use for science curricula internationally are developed The second section describes learning environments that are especially appropriate for GSL curricula The third and last section provides ideas and approaches for developing aspects of GSL curricula

A Matter of Choices Fay Ajzenberg-Selove, 1994 When the author became a nuclear physicist the number of women in the field could be counted on one hand In this memoir she reveals her difficult journey to international recognition in physics She is frank about the ways being a woman has made a difference in her opportunities and choices as a scientist and how by being a woman she has made a difference in the world of physics

From Nuclear Transmutation to Nuclear Fission, 1932-1939 Per F Dahl, 2002-07-01 From Nuclear Transmutation to Nuclear Fission 1932 1939 deals with a particular phase in the early history of nuclear physics the race among four laboratory teams to be the first to achieve the transmutation of atomic nuclei with artificially accelerated nuclear projectiles protons in high voltage discharge tubes This volume covers the backgro

The Quest for Cortisone Thom Rooke, 2012-01-01 In 1948 when Mrs G hospitalized with debilitating rheumatoid arthritis became the first person to receive a mysterious new compound cortisone her physicians were awestruck by her transformation from enervated to energized After eighteen years of biochemical research the most intensively hunted biological agent of all time had finally been isolated identified synthesized and put to the test And it worked But the discovery of a long sought magic bullet came at an unanticipated cost in the form of strange side effects This fascinating history recounts the discovery of cortisone and pulls the curtain back on the peculiar cast of characters responsible for its advent including two enigmatic scientists Edward Kendall and Philip Hench who went on to receive the

Nobel Prize The book also explores the key role the Mayo Clinic played in fostering cortisone's development and looks at drugs that owe their heritage to the so called King of Steroids

The Mangle of Practice Andrew Pickering, 2010-12-15

This ambitious book by one of the most original and provocative thinkers in science studies offers a sophisticated new understanding of the nature of scientific mathematical and engineering practice and the production of scientific knowledge Andrew Pickering offers a new approach to the unpredictable nature of change in science taking into account the extraordinary number of factors social technological conceptual and natural that interact to affect the creation of scientific knowledge In his view machines instruments facts theories conceptual and mathematical structures disciplined practices and human beings are in constantly shifting relationships with one another mangled together in unforeseeable ways that are shaped by the contingencies of culture time and place Situating material as well as human agency in their larger cultural context Pickering uses case studies to show how this picture of the open changeable nature of science advances a richer understanding of scientific work both past and present Pickering examines in detail the building of the bubble chamber in particle physics the search for the quark the construction of the quaternion system in mathematics and the introduction of computer controlled machine tools in industry He uses these examples to address the most basic elements of scientific practice the development of experimental apparatus the production of facts the development of theory and the interrelation of machines and social organization
