Advances in Aging 1984-1986 National Institute on Aging, 1987 **Alzheimer's Disease** Abraham Fisher, Israel
Hanin, Chaim Lachman, 2012-12-06 Alzheimer's disease is a primary neurodegenerative disease whose incidence and
prevalence is rapidly approaching epidemic proportions A major reason for this is that man is living longer than he has ever
lived before and the likelihood of contracting the disease is significantly greater within the elderly portion of the population
The problem becomes even more acute in the light of recent estimates which predict that the number of people living beyond
the age of 65 is expected to continue to increase The impact of these statistics on the family and the health care industry in
terms of time effort and cost are staggering A recent report issued by the Michigan Task Force on Alzheimer's Disease and
Related Conditions 1987 effectively underscores this last point Each person with a dementing disease requires an average of
seven years of care either at home or in a residential care facility Care provided at home is estimated to cost about 12 000

annually for a total of 84 000 per person This is a conservative figure however because many persons with dementia spend their last few years in a nursing home at an average cost of 22 000 per year and some spend from 10 to 15 years in a nursing home for a total cost of 220 000 to 330 000 Dementia and Memory Simon B. N. Thompson,2006 With an expanding older population it is crucial that we develop our understanding of how to treat those suffering from dementia and related diseases This accessible book provides extensive information on the different types of dementia and on memory problems more generally It will be an invaluable resource for the trained healthcare and medical professional and for the student reader

Neuropsychology and the Dementias Siobhan Hart,James M. Semple,1990-12 This book summarizes current knowledge of the neuropsychology of dementia highlights the multifaceted nature of the problem and argue that an input from neuropsychologists can facilitate the advances made by other neuroscientists **International Bibliography of Alzheimer's Disease and Senile Dementias, 1976-1985** ,1986 Lists 2 739 entries to literature published between 1976 1985 Also contains foreign language titles Arranged under 28 topics ranging from behavioral biology through urinary system and external secretions Entries give titles keywords author s journal source original language and volume number and reference number to original cite in Biological abstracts or Biological abstracts RRM Author and subject indexes
