Alexander Of Aphrodisias On Aristotle Meteorology 4:

On Aristotle Meteorology 4 Alexander (of Aphrodisias.),1996 Alexander s commentary on Aristotle s account of the formation of minerals metals and other homogenous stuffs Translation of text with commentary and notes [Alexander of Aphrodisias: On Aristotle Meteorology 4](#) Eric Lewis,2014-04-10 The first English translation of an important philosophical commentary with explanatory notes and an introduction *The Philosophy of the Commentators, 200-600 AD: Logic and metaphysics* Richard Sorabji,2005 The third volume of this invaluable sourcebook covers three main subject areas the metaphysics of Aristotle s logical works logic and the higher metaphysics of Neoplatonism **Alexander of Aphrodisias** Alexander (of Aphrodisias.),1936 **Studies on Alexander of Aphrodisias' On Mixture and Growth** ,2023-11-27 This volume sheds new light on Alexander of Aphrodisias On Mixture and Growth as an intelligent and carefully crafted rebuttal of Stoic blending which Alexander regarded as the closest rival of his own brand of hylomorphism The authors explore Alexander s dialectical method and determine the precise character of the Stoic theory he attacks The problematic notions of mutual co extension and infinite division appear in their proper context while the successive stages of the process of blending are carefully distinguished from the resulting state of the blend In this perspective the discussion of growth that closes Alexander s work finds its natural place **The Philosophy of the Commentators, 200-600 AD: Physics** Richard Sorabji,2005 Physics in Neoplatonist thought the subject which occupies the second volume of this sourcebook was innovative the world of space and time was causally ordered by a nonspatial nontemporal world and this view required original thinking **Aristotle's Meteorology and its Reception in the Arab World** Paul Lettinck,2021-10-25 An account of what Arabic scholars have written either as commentators or as more independent authors on the subjects treated in Aristotle s Meteorology this work investigates how they were influenced by one another and by previous Greek commentators For each subject a survey is given of the content of the Greek commentaries by Alexander Philoponus and Olympiodorus as well as of a later treatise ascribed to Olympiodorus and extant only in Arabic Then the Arabic version of Ibn al Bitr q is investigated it was one of the sources used by the Arabic writers which are discussed after that al Kind Ibn S n and later scholars who were inspired by him Ibn B jja and Ibn Ru d Two Arabic treatises on subjects from the Meteorology are edited and translated **Structure and Method in Aristotle's Meteorologica** Malcolm Wilson,2013-12-12 In the first full length study in any modern language dedicated to the Meteorologica Malcolm Wilson presents a groundbreaking interpretation of Aristotle s natural philosophy Divided into two parts the book first addresses general philosophical and scientific issues by placing the treatise in a diachronic frame comprising Aristotle s predecessors and in a synchronic frame comprising his other physical works It argues that Aristotle thought of meteorological phenomena as intermediary or dualizing between the cosmos as a whole and the manifold world of terrestrial animals Engaging with the best current literature on Aristotle s theories of science and metaphysics Wilson focuses on issues of aetiology teleology and the structure and unity of science

The second half of the book illustrates Aristotle's principal concerns in a section by section treatment of the meteorological phenomena and provides solutions to many of the problems that have been raised since the time of the ancient commentators

Aristotle's Meteorology in the Arabico-Latin Tradition Pieter L. Schoonheim, 2021-05-03 Aristotle's *Meteorology* a twin set in Mediaeval Text Tradition The Greek text of Aristotle's *Meteorology* is in places highly problematic Its edition by Fobes 1922 however is a highlight in editorial technique The Arabic version c 800 is of quite different form and content The two editions by Badawi 1961 and Petraitis 1967 were subject to considerable improvement The present edition was done on the basis of the two extant Arabic manuscripts The edition of the Latin translation 12th c from the Arabic has been constituted on the basis of 5 manuscript sources out of 110 copies The status of both the Arabic and the Latin texts was bad but not hopeless as the Latin version stands near to its Arabic predecessor the text of the latter gives support to the editing of the text as well as for the understanding of the contents And this procedure works vice versa The present edition of the texts has been completed with an Index of technical terms in Arabic Greek and Latin and Registers on the Greek and Latin Further a Bibliography and List of Latin manuscripts are presented **From Aristotle to Augustine** David
