Alfred North Whitehead Essays On His Phi:

Reenchantment without Supernaturalism David Ray Griffin, 2018-08-06 The process philosophy of Alfred North Whitehead and Charles Hartshorne has made many distinctive contributions to the philosophy of religion David Ray Griffin now offers the first full scale philosophy of religion written from this perspective discussing such topics as the relationship between science and religion the validity of religious experience the nature and existence of God religious pluralism creation and evolution and the problem of evil Griffin s clear and comprehensive book also serves as a valuable introduction to process philosophy itself In his vigorous defense of a worldview that is fully naturalistic and fully religious Griffin shows not only how this position reconciles naturalism with freedom genuine religious experience and even life after death but also how its naturalistic theism reenchants the world in the sense of providing cosmic support for moral values Highly original and sometimes controversial Griffin s book develops its stance in conversation with influential proponents of other philosophical positions including William P Alston Jürgen Habermas John Hick Colin McGinn Alvin Plantinga Hilary Putnam Willard Quine Ninian Smart Jeffrey Stout and Bernard Williams

The Making of American Liberal Theology Gary J. Dorrien, 2006-01-01 In this first of three volumes Dorrien identifies the indigenous roots of American liberal theology and demonstrates a wider longer running tradition than has been thought The tradition took shape in the nineteenth century motivated by a desire to map a modernist third way between orthodoxy and rationalistic deism atheism It is defined by its openness to modern intellectual inquiry its commitment to the authority of individual reason and experience its conception of Christianity as an ethical way of life and its commitment to make Christianity credible and socially relevant to modern people Dorrien takes a narrative approach and provides a biographical reading of important religious thinkers of the time including William E Channing Ralph Waldo Emerson Horace Bushnell Henry Ward Beecher Elizabeth Cady Stanton and Charles Briggs Dorrien notes that although liberal theology moved into elite academic institutions its conceptual foundations were laid in the pulpit rather than the classroom

The Algebra of Metaphysics Ronny Desmet, Michel Weber, 2010-06 Drawing upon the major Harvard works *Science and the Modern World* 1925 *Process and Reality* 1929 and *Adventures of Ideas* 1933 the essays gathered here on the occasion of the creation of the Applied Process Metaphysics S

The Ethics of Creativity Brian G. Henning, 2011-12-09 Foreword by Daniel A Dombrowski A central concern of nearly every environmental ethic is its desire to extend the scope of direct moral concern beyond human beings to plants nonhuman animals and the systems of which they are a part Although nearly all environmental philosophies have long since rejected modernity s conception of individuals as isolated and independent substances few have replaced this worldview with an alternative that is adequate to the organic processive world in which we find ourselves In this context Brian G Henning argues that the often overlooked work of Alfred North Whitehead has the potential to make a significant contribution to environmental ethics Additionally inspired by classical American philosophers such as William James John Dewey and Charles Sanders Pierce and environmental

philosophers such as Aldo Leopold Peter Singer Albert Schweitzer and Arne Naess Henning develops an ethical theory of which the seminal insight is called The Ethics of Creativity By systematically examining and developing a conception of individuality that is equally at home with the microscopic world of subatomic events and the macroscopic world of ecosystems The Ethics of Creativity correctly emphasizes the well being of wholes while not losing sight of the importance of the unique centers of value that constitute these wholes In this way The Ethics of Creativity has the potential to be a unique voice in contemporary moral philosophy **The Essential Dewey: Volume 2** Larry A. Hickman, Thomas M.

A Christian Natural Theology John B. Cobb, 2007-01-01 When the first edition of *A Christian Natural Theology* appeared in 1965 it was a groundbreaking work that incorporated Alfred North Whitehead's metaphysical philosophy as a framework for developing a Christian natural theology. The work was so significant it helped to launch process theology as a leading alternative to neo-orthodox theology and has since become a classic in the literature of process theology. This new edition by one of America's preeminent theologians is an essential work for all those interested in process theology.

The Rehabilitation of Whitehead George R. Lucas Jr., 1989-10-15 Lucas treats Whitehead within the framework of major themes in current Anglo-American analytic philosophy viewed against the backdrop of significant historical trends in European and American thought since the Enlightenment. This most misunderstood of twentieth-century philosophers is critically interpreted here. Whitehead had developed 50 years ago some ideas only now emerging in analytic philosophy. Lucas examines the significance of Whitehead's thought for current epistemology of science, for the anti-foundationalism debate and more generally for modal logic, action theory, philosophical psychology and the philosophy of mind. He shows how some recent analytic philosophy is now developing ideas concerning language, personal identity and other topics that are found in Whitehead. Lucas concludes with recent problems in relativity theory and quantum mechanics indicating how these bear on the philosophy of science and on the task of forging a comprehensive understanding of nature. He examines the debates concerning Einstein and Whitehead on relativity and analyzes the work of Bohm, Prigogine and others who have found Whitehead's categories useful for their own success. Whitehead is shown to be a historical figure of great importance, not an idiosyncratic thinker isolated along with a few enthusiastic followers from the mainstream of contemporary philosophy. With Russell, Whitehead participated in the same philosophical world that gave rise to analytic philosophy.

Metaphysics as Foundation Paul A. Bogaard, Gordon Treash, 1993-01-01 The essays in this book examine the proposition that an interpretation of subjects and subjectivity from the ontological perspective first outlined by Alfred North Whitehead and elaborated by Ivor Leclerc provides the foundation that is essential in order to develop a philosophy of nature and human action.

Hegel and Whitehead George R. Lucas Jr., 1986-01-15 Hegel and Whitehead presents a careful exploration of the similarities between these two formidable representatives of systematic philosophy. Some of the most distinguished scholars in European and American philosophy converge herein to explore the similarities in Hegel's and Whitehead's contemporary influence as well as in the content of their respective systems and in their philosophical styles. This volume begins with important critical comparative and historical assessments of the contemporary problems in metaphysics, philosophy of science, philosophy of mind, ethics, social thought and philosophy of religion, of history and of culture against the background of the important contributions made to these discussions by both Hegel and Whitehead. The result is a collection of vigorous new essays in systematic philosophy that reflect the enduring contributions of these two

philosophers to the contemporary philosophical climate on two continents The Journal of Philosophy ,1943 Covers topics in philosophy psychology and scientific methods Vols 31 include A Bibliography of philosophy 1933 *Whitehead and Bradley* Leemon B. McHenry,1992-01-01 In his magnum opus *Process and Reality* Alfred North Whitehead claims a special affinity to Oxford philosopher Francis Herbert Bradley McHenry clarifies exactly how much of Whitehead s metaphysics is influenced by and accords with the main principles of Bradley s absolute idealism He argues that many of Whitehead s doctrines cannot be understood without an adequate understanding of Bradley in terms of both affinities and contrasts He evaluates the arguments between them and explores several important connections with William James Josiah Royce George Santayana Bertrand Russell and Charles Hartshorne Aristocracy and the Modern Imagination Charles A. Riley,2001 Modernism generally signifies the efforts of late 19th century European painters writers musicians and philosophers who consciously broke with tradition This is an examination of what that meant for those aristocrats who were also modernists

Two Process Philosophers Lewis S. Ford,William Lad Sessions,1973 **The Child in American Evangelicalism and the Problem of Affluence** David A. Sims,2009-06-01 This work presents an evangelical theology of the child nurtured in the context of American evangelicalism and affluence It employs an eclectic theological critical method to produce a theological anthropology of the affluent American evangelical child AAEC through interdisciplinary evangelical engagement of American history sociology and economics Sims articulates how affluence constitutes a significant impediment to evangelical nurture of the AAEC in the discipline and instruction of the Lord Thus the problem he addresses is nurture in evangelical affluence conceived as a theological anthropological problem Nurture in the cultural matrices of the evangelical affluence generated by technological consumer capitalism in the U S impedes spiritual and moral formation of the AAEC for discipleship in the way of the cross This impediment risks disciplinary formation of the AAEC for capitalist culture cultivates delusional belief that life consists in an abundance of possessions and hinders the practice of evangelical liberation of the poor on humanity s underside The result is the AAEC s spiritual moral lack in late modernity Chapter 1 introduces the problem of the AAEC Chapters 2 and 3 provide a diachronic lens for the theological anthropology of the AAEC through critical assessment of the theological anthropologies of the child in Jonathan Edwards Horace Bushnell and Lawrence Richards Chapters 4 and 5 constitute the synchronic perspective of the AAEC Chapter 4 presents an evangelical sociology of the AAEC drawing upon William Corsaro s theory of interpretive reproductions and chapter 5 constructs an evangelical theology of the AAEC through critical interaction with John Schneider s moral theology of affluence Chapter 6 Whither the AAEC concludes with a recapitulation of the work and a forecast of possible futures for the AAEC in the twenty first century **In Marx's Shadow** Costica Bradatan,Serguei Oushakine,2010-03-19 Despite its key role in the intellectual shaping of state socialism Communist ideas are often dismissed as mere propaganda or as a rhetorical exercise aimed at advancing socialist intellectuals on their way to power By drawing attention to unknown and unexplored areas trends and ways of thinking under socialism the

volume examines Eastern Europe and Russian histories of intellectual movements inspired negatively as well as positively by Communist arguments and dogmas Through an interdisciplinary dialogue the collection demonstrates how various bodies of theoretical knowledge philosophical social political aesthetic even theological were used not only to justify dominant political views but also to frame oppositional and nonofficial discourses and practices The examination of the underlying structures of Communism as an intellectual project provides convincing evidence for questioning a dominant approach that routinely frames the post Communist intellectual development as a revival or at least as a return of the repressed intellectual traditions As the book shows the logic of a radical break suggested by this approach is in contradiction with historical evidence a significant number of philosophical theoretical and ideological debates in post Communist world are in fact the logical continuation of intellectual conversations and confrontations initiated long before 1989

The Quantum of Explanation Randall E. Auxier, Gary L. Herstein, 2017-03-31 The Quantum of Explanation advances a bold new theory of how explanation ought to be understood in philosophical and cosmological inquiries Using a complete interpretation of Alfred North Whitehead s philosophical and mathematical writings and an interpretive structure that is essentially new Auxier and Herstein argue that Whitehead has never been properly understood nor has the depth and breadth of his contribution to the human search for knowledge been assimilated by his successors This important book effectively applies Whitehead s philosophy to problems in the interpretation of science empirical knowledge and nature It develops a new account of philosophical naturalism that will contribute to the current naturalism debate in both Analytic and Continental philosophy Auxier and Herstein also draw attention to some of the most important differences between the process theology tradition and Whitehead s thought arguing in favor of a Whiteheadian naturalism that is more or less independent of theological concerns This book offers a clear and comprehensive introduction to Whitehead s philosophy and is an essential resource for students and scholars interested in American philosophy the philosophy of mathematics and physics and issues associated with naturalism explanation and radical empiricism
