Algeria A Study In Competing Ideologies:

Algeria, 1997 **Political Culture and Conflict Resolution in the Arab Middle East** Benjamin MacQueen, 2009
Political Culture and Conflict Resolution in the Arab Middle East develops a method for examining the explanatory capacity of political culture in relation to the issues of civil war and conflict resolution in Lebanon and Algeria How perception shaped by values and assumptions affects political behaviour presents scholars with potentially valuable but also dangerous possibilities Namely seeking to explore the explanatory capacity of the nebulous concept of political culture can prospectively lead to the cul de sacs of essentialism or relativism In an attempt to engage with the concept of political culture this book develops a method for examining the explanatory capacity of political culture in relation to the issues of civil war and conflict resolution in Lebanon and Algeria Applying strict limits on the implementation of political culture in an explanatory capacity namely its role as a secondary relational and comparative concept this book demonstrates how political culture operates to shape the form and affect the legitimacy of conflict resolution processes This is applied to two peace agreements Lebanon s Taef Agreement and Algeria s Civil Concord Here the importance of contextuality is emphasised in developing a space where political culture can provide explanatory capacity whilst remaining connected to macro theoretical concepts **Algeria in Transition** Ahmed Aghrout, Mohamed Redha Bougherira, 2004 This collection addresses major issues such as political reforms and stability external relations and social conditions to integration into the world economy Human Resource Management in Developing Countries Pawan S. Budhwar, Yaw A. Presidency in 1965 The economic problems inherited from the colonial period absorbed policy makers in this crucial post independence period However the failure of the economy to deliver on its original promises and the lack of control of cultural and ideological issues are shown to be the foundation of the conflicts of the 1990s **Competing Ideologies in Greek Culture, Ancient and Modern** Evy Johanne Håland,2019-04-04

By using both modern and ancient sources this volume explores the relationship between official religion and popular belief in Greece as illustrated by the relations between competing ideologies or the relationship between ideology and mentality It shows that the communicative aspect of the religious festival is central and allows the reader to get to know other sides of Greece than the picture that today dominates the news resulting from the economic crisis with which the country has struggled for several years Fanaticism and Conflict in the Modern Age Matthew Hughes,Gaynor Johnson,2004-12-15 This volume presents new and established scholars writing on a range of subjects from the Dervishes of the 1890s to the terrorism and guerrilla wars of the post 1945 period

The Contested Role of Education in Conflict and Fragility Zehavit Gross,Lynn Davies,2015-06-17 This book brings together new thinking on education s complex and evolving role in conflict and fragility The changing nature of conflict from inter to intra state and with shifting geopolitical power balances demands a reconceptualization of where education is positioned Claims that education on its own can be an agent of conflict transformation are disputed Deliberate attempts at peace education are not without critics and controversies This collection aims to generate new realism from empirical and reflective accounts in a variety of countries and political contexts as well as provide innovative methodological approaches to the study of education and conflict The particular distinctiveness of the volume is the emphasis on contested it includes the debates and disagreements on the many faces of education in conflict as well as material on teaching controversial issues in fragile contexts Crucially it underscores how education itself exists within highly contested projects of state nation and region building As well as overview comparative chapters the collection encompasses a range of specific contexts geographically and educationally Algeria Canada El Salvador Israel Kenya Mexico Morocco Nepal Tunisia UK and US with settings that include schools higher education and refugee camps Focuses range from analyses of education in historical conflicts to contemporary issues such as post Arab Spring transformations Perennial concerns about religion colonialism protest integration cohesion emergencies globalization and narrative are given new slants Yet in spite of the debates a cross cutting consensus emerges as the crucial need for critical pedagogy and critical theory if education is to make any mark at all on conflict and fragility *Managing Human Resources in the Middle-East* Pawan S. Budhwar,Kamel Mellahi,2006-08-21

This book presents the HRM scenario in a number of countries in the Middle East highlighting the growth of the personnel HR function the dominant HRM system s in the area and the challenges faced *Struggles for Political Change in the Arab World* Lisa Blaydes,Amr Hamzawy,Hesham Sallam,2022-10-11 The advent of the Arab Spring in late 2010 was a hopeful moment for partisans of progressive change throughout the Arab world Authoritarian leaders who had long stood in the way

of meaningful political reform in the countries of the region were either ousted or faced the possibility of political if not physical demise The downfall of long standing dictators as they faced off with strong willed protesters was a clear sign that democratic change was within reach Throughout the last ten years however the Arab world has witnessed authoritarian regimes regaining resilience pro democracy movements losing momentum and struggles between the first and the latter involving regional and international powers This volume explains how relevant political players in Arab countries among regimes opposition movements and external actors have adapted ten years after the onset of the Arab Spring It includes contributions on Egypt Morocco Kuwait Saudi Arabia Syria Algeria Sudan Lebanon Iraq Jordan Yemen and Tunisia It also features studies on the respective roles of the United States China Iran and Turkey vis vis questions of political change and stability in the Arab region and includes a study analyzing the role of Saudi Arabia and its allies in subverting revolutionary movements in other countries

Political Islam and Human Security Shahram Akbarzadeh, Fethi Mansouri, 2009-03-26 In the wake of the September 11 and subsequent terrorist attacks the academic and media commentaries on Islam the religion and Islam the basis for political ideology have received an unprecedented high level of exposure and attention The acts of political violence by extremist groups and the omnipresent war on terror have added fresh uncertainties to an already complex global order Just as terrorism and counter terrorism are locked in a mutually reinforcing symbiosis the sense of insecurity felt by Muslims and non Muslims alike is mutually dependent and has the potential to escalate This general assessment holds true for Muslims living in the Muslim world and beyond The pervasive sense of being under attack physically and culturally by the United States and its allies has contributed to a growing unease among Muslims and reinforced deep seated mistrust of the West Public articulation of such misgivings has in turn lent credence to Western observers who posit an inherent antipathy between the West and the Muslim world The subsequent policies that have emerged in this context of fear and mutual distrust have contributed to the vicious cycle of insecurity The present volume is anchored in the current debates on the uneasy and potentially mutually destructive relationship between the Muslim world and certain West countries It brings together leading international scholars in this interdisciplinary field to deal with such inter related questions as the nature of Islamism the impact of the war on terror on the spread of militancy the growing sense of being under siege by Muslim Diasporas and the many unintended ramifications of a security minded world order This volume deliberately focuses on these issues both at a broad theoretical level but more importantly in the form of a number of prominent case studies including Indonesia Algeria and Turkey This edition includes a new introduction

Nation Building, State Building, and Economic Development Sarah C.M. Paine, 2015-01-28 Why do some countries remain poor and dysfunctional while others thrive and become affluent The expert contributors to this volume seek to identify reasons why prosperity has increased rapidly in some countries but not others by constructing and comparing cases The case studies focus on the processes of nation building state building and economic development in comparably situated countries over the

past hundred years Part I considers the colonial legacy of India Algeria the Philippines and Manchuria In Part II the analysis shifts to the anticolonial development strategies of Soviet Russia Atatürk s Turkey Mao s China and Nasser s Egypt Part III is devoted to paired cases in which ostensibly similar environments yielded very different outcomes Haiti and the Dominican Republic Jordan and Israel the Republic of the Congo and neighboring Gabon North Korea and South Korea and Papua New Guinea and Indonesia All the studies examine the combined constraints and opportunities facing policy makers their policy objectives and the effectiveness of their strategies The concluding chapter distills what these cases can tell us about successful development with findings that do not validate the conventional wisdom

The International Relations of the Contemporary Middle East Tareq Y. Ismael, Glenn E. Perry, 2013-10-01 The Middle East a few decades ago was seen to be an autonomous subsystem of the global international political system More recently the region has been subordinated to the hegemony of a singular superpower the US bolstered by an alliance with Israel and a network of Arab client states The subordination of the contemporary Middle East has resulted in large part from the disappearance of countervailing forces for example global bipolarity that for a while allowed the Arab world in particular to exercise a modicum of flexibility in shaping its international relations The aspirations of the indigenous population of the Middle East have been stifled by the dynamics of the unequal global power relationships and domestic politics of the countries of the region are regularly subordinated to the prerogatives of international markets and the strategic competition of the great powers Employing the concept of imperialism defined as a pattern of alliances between a center rulers in the Center developed country and a center client regime in the Periphery underdeveloped country as an overall framework to analyse the subordination of the region this book is essential reading for students and scholars of the Middle East International Relations and Politics in general

The Imperial Nation Josep M. Fradera, 2021-06-08 How the legacy of monarchical empires shaped Britain France Spain and the United States as they became liberal entities Historians view the late eighteenth and early nineteenth centuries as a turning point when imperial monarchies collapsed and modern nations emerged Treating this pivotal moment as a bridge rather than a break *The Imperial Nation* offers a sweeping examination of four of these modern powers Great Britain France Spain and the United States and asks how after the great revolutionary cycle in Europe and America the history of monarchical empires shaped these new nations Josep Fradera explores this transition paying particular attention to the relations between imperial centers and their sovereign territories and the constant and changing distinctions placed between citizens and subjects Fradera argues that the essential struggle that lasted from the Seven Years War to the twentieth century was over the governance of dispersed and varied peoples each empire tried to ensure domination through subordinate representation or by denying any representation at all The most common approach echoed Napoleon s special laws which allowed France to reinstate slavery in its Caribbean possessions The Spanish and Portuguese constitutions adopted specialness in the 1830s the United States used comparable guidelines to distinguish between states territories and Indian reservations and the British

similarly ruled their dominions and colonies In all these empires the mix of indigenous peoples European origin populations slaves and indentured workers immigrants and unassimilated social groups led to unequal and hierarchical political relations Fradera considers not only political and constitutional transformations but also their social underpinnings Presenting a fresh perspective on the ways in which nations descended and evolved from and throughout empires The Imperial Nation highlights the ramifications of this entangled history for the subjects who lived in its shadows The Suspended Disaster Thomas Serres,2023-09-05 After Algeria s president Abdelaziz Bouteflika announced his intention to run for a fifth term in early 2019 a popular peaceful uprising erupted calling for change Bouteflika who had been in office since 1999 was eventually forced to resign but the Hirak movement continued to protest the country s inequalities and entrenched ruling elite The Suspended Disaster examines the dynamics of the Algerian political system offering new insights into the last years of Bouteflika s rule and the factors that shaped the emergence of an unexpected social movement Thomas Serres argues that the Algerian ruling coalition developed a mode of government based on the management of a seemingly never ending crisis marked by an obsession with security and the ever present possibility of unrest violence and economic collapse Identifying this form of rule as governance by catastrophization he shows how attempts to preserve the status quo through emergency policies and constant reforms can also lay the groundwork for a revolutionary situation Serres contrasts the government s portrayal of perpetually imminent disaster with the uncertainty precarity and indignity experienced by much of the population which fueled the rejection of ruling elites a profound mistrust toward institutions and new spaces for grassroots opposition Based on extensive fieldwork and theoretically novel The Suspended Disaster sheds new light on the political economic and social processes underlying an uprising that changed the face of Algerian politics **North African Mosaic** Nabil Boudraa,Joseph Krause,2009-03-26 This book s ambition is to offer the most recent scholarship on North African cultures at a time when the very notion of culture is being re evaluated in the shifting tides that both associate and divorce the forces of nationalism globalism and neo liberalism Another ambition is to be a readable document about the past and the potential of North African civilizations Those which have been crystallized into a polysemic voice from centuries of occupations exchanges and what is now commonly called hybridizations In this work the collective position of the authors with their different fields of experience is that the languages musics and the many expressions of common life in North Africa continue to flourish That they are a bridge between sub Saharan peoples and Europe That they are a necessary antidote to the anemic political discourses that have prevailed since decolonization That they are seminal for the future of the African continent as it begins its true voyage into democracy It is difficult at this juncture to measure the distance that in the decades to come will be achieved on that voyage It is however less difficult to evaluate the importance of North Africa on tomorrow s world If the past is an indicator it will be an important force in the cross flow of trade ideas and of global destinies Revolution and Dictatorship Steven Levitsky,Lucan Way,2024-10-29 Why the world s most resilient

dictatorships are products of violent revolution Revolution and Dictatorship explores why dictatorships born of social revolution such as those in China Cuba Iran the Soviet Union and Vietnam are extraordinarily durable even in the face of economic crisis large scale policy failure mass discontent and intense external pressure Few other modern autocracies have survived in the face of such extreme challenges Drawing on comparative historical analysis Steven Levitsky and Lucan Way argue that radical efforts to transform the social and geopolitical order trigger intense counterrevolutionary conflict which initially threatens regime survival but ultimately fosters the unity and state building that supports authoritarianism Although most revolutionary governments begin weak they challenge powerful domestic and foreign actors often bringing about civil or external wars These counterrevolutionary wars pose a threat that can destroy new regimes as in the cases of Afghanistan and Cambodia Among regimes that survive however prolonged conflicts give rise to a cohesive ruling elite and a powerful and loyal coercive apparatus This leads to the downfall of rival organizations and alternative centers of power such as armies churches monarchies and landowners and helps to inoculate revolutionary regimes against elite defection military coups and mass protest three principal sources of authoritarian breakdown Looking at a range of revolutionary and nonrevolutionary regimes from across the globe Revolution and Dictatorship shows why governments that emerge from violent conflict endure

Encyclopaedia of Islam Ian Richard Netton, 2013-12-19 This Encyclopedia covers the full range of Islamic thought It takes substantial note of contemporary trends across the Muslim world and the material on historical Islam has contemporary reference

The Battlefield Hugh Roberts, 2017-03-14 The violence that has ravaged Algeria has often defied explanation Regularly invoked in debates about political Islam transitions to democracy globalization and the right of humanitarian interference Algeria's tragedy has been reduced to a clash of stereotypes Islamists vs a secular state terrorists vs innocent civilians or generals vs a defenseless society The prevalence of such simplistic representations has disabled public opinion inside as well as outside the country and contributed to the intractability of the conflict This collection of essays offers a radical corrective to Western misconceptions Rejecting the usual tautological approaches of inherent predetermined conflict Hugh Roberts explores the outlook and evolution of the various internal forces as they emerged the Islamists the Berberists the factions within the army and the regime in general and he looks at external interests and actors He explains their strategies and the maneuvers in which they have engaged The resulting analyses illuminate the startling dynamics of the conflict and the real issues at stake and identify the implications not only for Algeria but also for this crucial region Informed by a deep knowledge of Algeria and Algerian history these accessible essays guide the reader through the extraordinary politics of the drama in all its complexity
