Alien Base Timothy Good,1999 Earth is being visited by a number of different alien species some of which have established bases here on Earth Written by a researcher recognised internationally for his objective and unsensational approach Alien Base is the first book to make sense of the bewildering diversity of reports from around the world Culminating with an analysis of the disquieting stories of alien bases now coming from the Puerto Rico area Timothy Good shows that there is a hard core of such cases which cannot easily be dismissed **The Total Novice's Guide To UFOs** T. After the planets were formed Earth was covered with a five mile thick coating of ice one billion years with an atmospheric
pressure of over 750 pounds per square inch Sunlight could not penetrate such an atmosphere extending 2 500 miles above
the planet We eventually drifted near the Sirius multiple star system Little Sirius B 1 5 solar masses grabbed hold of our sun
putting it in orbit around Sirius A Earth has lost 98% of its atmosphere AKA radiation shield Our sun does not have enough
power to keep us out of the ice ages The additional light and heat from Sirius star system that melted the ice caps and got life
started in the oceans Over time the 750 PSI carbon dioxide atmosphere was laid down as coal oil and limestone using
photosynthesis and light from Sirius A and B Dinosaurs couldnt live in todays atmosphere because their lungs were too small
65 million years ago the atmosphere was 30 to 60 PSI Earth has lost 98% of its atmosphere It is now 14 5 pounds per square

Contact with Alien Civilizations Michael Michaud, 2010-05-05 The proper study of mankind is not merely Man but Intelligence 1 Arthur C Clarke 1951 In the long running television series The X-Files the original Deep Throat said to FBI Special Agent Mulder that there are those like yourself who believe in the existence of extraterrestrial life Ah but that's not the question If extraterrestrial life exists most of it may be in simpler forms comparable to the one-celled organisms of Earth biology Finding such life would be fascinating for scientists but may be of only passing interest to the general public What intrigues the average citizen is the possibility of contact with extraterrestrial intelligence We want to communicate with other sentient beings learning what they know and telling them about ourselves We want to find out how they are like us and how they are different Microorganisms don't have a lot to say There is another implication of contact that underlies this book Intelligent extraterrestrials might have an impact on our future The information they send us if any might change our cultures They could have conscious intentions toward us and possibly the technologies to reach us directly Their intentions may be benign or not Our interest in alien minds is not new The idea that intelligent beings exist beyond the Earth has been part of the Western intellectual tradition for more than 2000 years Sometimes this belief was widespread at other times it was out of fashion
