Allow The Water:

Allow the Water Leonard Desroches, 2004-03 Allow the Water combines an introduction to nonviolence with a deeper exploration into some of its dimensions Though its style is mainly that of storytelling there are also as many helpful references as possible The book is 500 pages long but photos and drawings make up almost half the volume This is an exploration of the spirituality and practice of the force of love we inadequately call nonviolence Nonviolence is people and their stories before it is idea a way of living and acting not just a way of thinking This book is one contribution to an urgently needed conversation It is not meant to be complete There are questions observations and convictions Hopefully in their thoroughness and simplicity they contribute to our common search

web thermochemical equations equations that represent both mass and enthalpy changes $\text{H}_2\text{O}(\text{s}) \rightarrow \text{H}_2\text{O}(\text{l})$ $\Delta h = 6.01 \text{ kJ/mol}$ this is an endothermic process it requires 6.01 kJ to melt one mole of ice $\text{H}_2\text{O}(\text{s})$ the enthalpy value will change if the number of moles varies from the 1 1 reaction stoichiometry this is an exothermic process
