## **Almost Grown:**

**Almost Grown: Launching Your Child from High School to College** Patricia Pasick, 1998-03-17 A time of tumult your children's transition from high school to college can also be a time of growth This book shows you how Almost Grown is a guide for parents to the final years of high school and first years of college offering intelligent counsel not only in practical issues such as developing a college search plan or handling questions of money sex and substance abuse but also in the psychological issues that arise during this family transition Writing as both psychologist and parent Patricia Pasick tackles the key question of how mothers and fathers can foster adolescents growth and autonomy while maintaining family connections and stability She also explores the unexpected the impact of the changing family on younger siblings the benefits and frustrations of college students returning home the challenges and opportunities that nontraditional families face and more Pasick delves into another critical yet underplayed aspect of the college transition how parents lives change Almost Grown guides readers through this major step in adult development and new start to adult partnerships Almost Grown contains advice from high school and college admissions counselors across the country and at the heart of the book stories of personal experience from parents and adolescents who are making or have made the transition Growing Each Other Up Sara Lawrence-Lightfoot, 2016-09-29 From growing their children parents grow themselves learning the lessons their children teach Growing up then is as much a developmental process of parenthood as it is of childhood While countless books have been written about the challenges of parenting nearly all of them position the parent as instructor and support giver the child as learner and in need of direction But the parent child relationship is more complicated and reciprocal over time it transforms in remarkable surprising ways As our children grow up and we grow older what used to be a one way flow of instruction and support from parent to child becomes instead an exchange We begin to learn from them The lessons parents learn from their offspring voluntarily and involuntarily with intention and serendipity often through resistance and struggle are embedded in their evolving relationships and shaped by the rapidly transforming world around them With Growing Each Other Up Macarthur Prize winning sociologist and educator Sara Lawrence Lightfoot offers an intimately detailed emotionally powerful account of that experience Building her book on a series of in depth interviews with parents around the country she offers a counterpoint to the usual parental development literature that mostly concerns the adjustment of parents to their babies rhythms and the ways parents weather the storms of their teenage progeny The focus here is on the lessons emerging adult children ages 15 to 35 teach their parents How are our perspectives as parents shaped by our children What lessons do we take from them and incorporate into our worldviews Just how much do we learn often despite our own emotionally fraught resistance from what they have seen of life that we perhaps never experienced From these parent portraits emerges the shape of an education composed by young adult children an education built on witness growing intimacy and acceptance Growing Each Other Up is rich in the voices of actual parents telling their own stories of raising

children and their children raising them watching that fundamental connection shift over time Parents and children of all ages will recognize themselves in these evocative and moving accounts and look at their own growing up in a revelatory new light
