Publisher's description *Policy guide to improve water use efficiency in small-scale agriculture* Food and Agriculture Organization of the United Nations, 2019-11-27 This policy guide is drawn from the results of the FAO Project Strengthening Agricultural Water Efficiency and Productivity at the African and Global Level funded by the Swiss Agency for Development and cooperation SDC The long term vision of the project was that the in country findings and processes which are of common nature can be synthesized and scaled up to other countries in a regional cooperation process and globally This will eventually lead to the increase of investment in Agricultural Water Management AWM in the targeted countries and beyond that is socially equitable profitable at the farm level economically viable environmentally neutral or positive and sustainable The Guide focuses on the specific component of Enhancing Water Use Efficiency at small scale irrigation as one of the major outputs of the project While creating and implementing Water Use Efficiency WUE measures at field level existing policy frameworks were mapped and analyzed and recommendations were defined as scalable policy instruments with the aim to demonstrate case specific experiences to the collectively agreed goal of using water resources efficiently

Public expenditures on agriculture at subnational-levels and household-level agricultural outcomes in Nigeria

Takeshima, Hiroyuki, Smart, Jenny, Edeh, Hyacinth, Oyeyemi, Motunrayo, Balana, Bedru, Andam, Kwaw S., Growing agriculture remains important for countries like Nigeria where despite economic transformation at sectoral levels a significant share of employment still originates from the agricultural sector The question has continued to be debated of whether increasing Public Expenditures on Agriculture PEA is the way to grow agriculture The needed evidence base for this debate while gradually growing has remained insufficient in African countries including Nigeria This has been particularly the case as regards to evidence on the effects of PEA at household levels This study attempted to partially fill this gap using state and local government area LGA level PEA figures and household data in Nigeria The findings suggest that PEA has positive effects on household level agricultural outcomes in various dimensions including overall production levels profits access to public extension services or subsidized fertilizer as well as private investments and in some cases agricultural mechanization These patterns generally underscore the hypothesis that increasing direct support to the agricultural sector is likely to have greater effects on agricultural outcomes compared to alternative strategies of developing agriculture indirectly through the support of other social sectors like education health social safety nets among others Increasing PEA by increasing the agricultural share of public expenditures PE while keeping the overall size of PE constant is found to be particularly effective compared to alternative approaches of increasing the overall size of PE while keeping agricultural share unchanged Such patterns may suggest that Ricardian Equivalence partly holds Furthermore different agricultural outcomes are found to respond to PEA from different sources e.g LGA or State and types e.g recurrent or capital spending Enhancing research capacity to identify appropriate sources and types of PEA for particular agricultural outcomes remains important

Structural Inequality Roger D. Norton, 2022-10-31 Inequality stirs passions across the globe today figures prominently in political discourse generates fervid debate and popular protest and is the theme of widely read scholarly publications This book contributes to the burgeoning global dialogues and literature on economic inequality in a new way identifying and addressing what may be called bedrock types of inequality whose origins are rooted in the history and culture of each country These kinds of inequality strongly influence income distributions by strata can be resistant to change and require solutions beyond fiscal tax and expenditure policies And it places the findings firmly in the realm of the relevant studies on the topics covered The countries analyzed include South Korea Mexico El Salvador Honduras Peru Estonia Pakistan Bangladesh Nigeria and Yemen

Credit Rationing and Institutional Constraint Xiangping Jia, 2008 The availability of credit has long occupied a central place in development strategies Rural credit institutions are more than an instrument of intermediation they also handle risk mobilize and disseminate information about market and technology Given the informational problems and innate disadvantages of rural credit markets the rationale for laissez faire and liberalization is by no means based on a sound understanding of the state's role in redressing market failures This study examines the rural credit market in China its impacts on agricultural transformation and the state's role in the functioning of markets The particular objectives are to identify the determinants of credit rationing in both formal and informal sectors to show the extent of credit rationing to reveal the dynamic role of institutional lending in agricultural transformation and to understand the challenges in developing efficient institutions

Environmental Literacy in Science and Society Roland W. Scholz, Claudia R. Binder, 2011-07-21 In an era where humans affect virtually all of the earth's processes questions arise about whether we have sufficient knowledge of human environment interactions How can we sustain the Earth's ecosystems to prevent collapses and what roles should practitioners and scientists play in this process These are the issues central to the concept of environmental literacy This unique book provides a comprehensive review and analysis of environmental literacy within the context of environmental science and sustainable development Approaching the topic from multiple perspectives it explores the development of human understanding of the environment and human environment interactions in the fields of biology psychology sociology economics and industrial ecology The discussion emphasises the importance of knowledge integration and transdisciplinary processes as key strategies for understanding complex human environment systems HES In addition the author defines the HES framework as a template for investigating sustainably coupled human environment systems in the 21st century
