*Psychology and the Conduct of Everyday Life* Ernst Schraube, Charlotte Højholt, 2015-08-11 Psychology and the Conduct of Everyday Life moves psychological theory and research practice out of the laboratory and into the everyday world Drawing on recent developments across the social and human sciences it examines how people live as active subjects within the contexts of their everyday lives using this as an analytical basis for understanding the dilemmas and contradictions people face in contemporary society Early chapters gather the latest empirical research to explore the significance of context as a cross disciplinary critical tool they include a study of homeless Moroccan men reaffirming their cultural identity via gardening and a look at how the dilemmas faced by children in difficult situations can provide insights into social conflict at school Later chapters examine the interplay between everyday life around the world and contemporary global phenomena such as the rise of the debt economy the hegemony of the labor market and the increased reliance on digital technology in educational settings The book concludes with a consideration of how social psychology can deepen our understanding of how we conduct our lives and offer possibilities for collective work on the resolution of social conflict

**Critique of Forms of Life** Rahel Jaeggi, 2018-12-28 For many liberals the question Do others live rightly feels inappropriate Liberalism seems to demand a follow up question Who am I to judge Peaceful coexistence in this view is predicated on restraint from morally evaluating our peers But Rahel Jaeggi sees the situation differently Criticizing is not only valid but also useful she argues Moral judgment is no error the error lies in how we go about judging One way to judge is external based on universal standards derived from ideas about God or human nature The other is internal relying on standards peculiar to a given society Both approaches have serious flaws and detractors In Critique of Forms of Life Jaeggi offers a third way which she calls immanent critique Inspired by Hegelian social philosophy and engaged with Anglo American theorists such as John Dewey Michael Walzer and Alasdair MacIntyre immanent critique begins with the recognition that ways of life are inherently normative because they assert their own goodness and rightness They also have a consistent purpose to solve basic social problems and advance social goods most of which are common across cultures Jaeggi argues that we can judge the validity of a society's moral claims by evaluating how well the society adapts to crisis whether it is able to overcome contradictions that arise from within and continue to fulfill its purpose Jaeggi enlivens her ideas through concrete contemporary examples Against both relativistic and absolutist accounts she shows that rational social critique is possible

**Art and Production** Boris Arvatov, 2017-08-20 Boris Arvatov's Art and Production is a classic of the early Soviet avant garde Now nearing a century since its first publication it is a crucial intervention for those seeking to understand the social dynamic of art and revolution during the period Derived from the internal struggles of Soviet Constructivism as it confronted the massive problems of cultural transformation after War

Communism Arvatov's writing is a major force in the split that occurred in the revolutionary horizons of Constructivism in the early 1920s Critical of early Constructivism's social aesthetic process of art's transformation of daily life epitomised in studio based painting photography and object making Arvatov polemicises for the devolution of artistic skills directly into the relations of production and the factory Whilst acknowledging the problems of a pure factory based Productivism Arvatov remains overwhelmingly committed to a new role and function for art outside the conventional studio and traditional gallery Addressing issues such as artistic labour and productive labour the artist as technician art and multidisciplinary and a life for art beyond art finding new relevance amidst the extensive social turn of contemporary participatory art Art and Production offers a timely and compelling manifesto

**The Contemporary Goffman** Michael Hviid Jacobsen, 2010-01-26 The Contemporary Goffman highlights the continued relevance of Goffman to sociology and related disciplines to theoretical discussions as well as to substantive empirical research through contributions dealing with a variety of topics and themes

**Central and Eastern European Literary Theory and the West** Michał Mrugalski, Schamma Schahadat, Irina Wutsdorff, 2022-12-05 Literary theory flourished in Central and Eastern Europe throughout the twentieth century but its relation to Western literary scholarship is complex This book sheds light on the entangled histories of exchange and influence both within the region known as Central and Eastern Europe and between the region and the West The exchange of ideas between scholars in the East and West was facilitated by both personal and institutional relations both official and informal encounters For the longest time however intellectual exchange was thwarted by political tensions that led to large parts of Central and Eastern Europe being isolated from the West A few literary theories

nevertheless made it into Western scholarly discourses via exiled scholars. Some of these scholars such as Mikhail Bakhtin become widely known in the West and their thought was transposed onto new Western cultural contexts; others such as Olga Freidenberg were barely noticed outside of Russian and Poland. This volume draws attention to the schools, circles, and concepts that shaped the development of theory in Central and Eastern Europe as well as the history of translations, transformations, and migrations that conditioned its relationship with the West. *Everyday Life in Ancient Egypt* Lionel Casson, 2001-05-25. Originally published in 1975 as *The Horizon Book of Daily Life in Ancient Egypt*, this revised edition includes a new chapter as well as full documentation of the sources. **The Order of Forms** Anna

Kornbluh, 2019-11-20. In literary studies today debates about the purpose of literary criticism and about the place of formalism within it continue to simmer across periods and approaches. Anna Kornbluh contributes to and substantially shifts that conversation in *The Order of Forms* by offering an exciting new category: political formalism, which she articulates through the co-emergence of aesthetic and mathematical formalisms in the nineteenth century. Within this framework criticism can be understood as more affirmative and constructive, articulating commitments to aesthetic expression and social collectivity. Kornbluh offers a powerful argument that political formalism, by valuing forms of sociability like the city and the state in and of themselves, provides a better understanding of literary form and its political possibilities than approaches that view form as a constraint. To make this argument she takes up the case of literary realism, showing how novels by Dickens, Brontë, Hardy, and Carroll engage mathematical formalism as part of their political imagining. Realism, she shows, is best understood as an exercise in social modeling, more like formalist mathematics than social documentation. By modeling society, the realist novel focuses on what it considers the most elementary features of social relations and generates unique political insights. Proposing both this new theory of realism and the idea of political formalism, this inspired eye-opening book will have far-reaching implications in literary studies. Religion in English *Everyday Life* Timothy Jenkins, 1999. After an ethnographic

appraisal of the place of religious practices, Jenkins's theology at Cambridge University examines three contemporary case studies. They are the life of a country church, an annual procession by the churches in a Bristol suburb, and a range of linked spiritualists' beliefs. He finds complex patterns and compulsions of ordinary lives in both moral and historical dimensions, manifested through the distribution of reputation through conflict and through the continuities of place and identity. Why do we choose specific modes of transport and what are the perceived rationalities for our choice? How are different theoretical concepts within mobility research actually perceived and lived in everyday life? At this book's core is a conceptual and empirical contribution to critical mobility research. It focuses on the tension between freedom and unfreedom articulated through the dichotomy between individuality and community as well as critical perspectives on the multitude of unintended consequences of mobility. In a range of everyday life narratives, this tension is analyzed through the concept of structural

stories In teasing out the ambivalences of late modern everyday life Malene Freudendal Pedersen exposes how mobility both generates and helps to overcome and live with these ambivalences **Digital Capitalism** Christian Fuchs,2021-11-29 This third volume in Christian Fuchs's Media Communication and Society book series illuminates what it means to live in an age of digital capitalism analysing its various aspects and engaging with a variety of critical thinkers whose theories and approaches enable a critical understanding of digital capitalism for media and communication Each chapter focuses on a particular dimension of digital capitalism or a critical theorist whose work helps us to illuminate how digital capitalism works Subjects covered include digital positivism administrative big data analytics the role and relations of patriarchy slavery and racism in the context of digital labour digital alienation the role of social media in the capitalist crisis the relationship between imperialism and digital labour alternatives such as trade unions and class struggles in the digital age platform co-operatives digital commons and public service Internet platforms It also considers specific examples including the digital labour of Foxconn and Pegatron workers software engineers at Google and online freelancers as well as considering the political economy of targeted advertising based Internet platforms such as Facebook Google YouTube and Instagram Digital Capitalism illuminates how a digital capitalist society's economy politics and culture work and interact making it essential reading for both students and researchers in media culture and communication studies as well as related disciplines

**Novels of Everyday Life** Laurie Langbauer,2019-05-15 Laurie Langbauer argues that our worldview is shaped not just by great public events but also by the most overlooked and familiar aspects of common life the everyday This sphere of the everyday has always been a crucial component of the novel but has been ignored by many writers and critics and long associated with the writing of women Focusing on the linked series of novels characteristic of later Victorian and early modern fiction such as Margaret Oliphant's Carlingford Chronicles or the Sherlock Holmes stories she investigates how authors make use of the everyday as a foundation to support their versions of realism What happens when in the series novel or in contemporary theory the everyday becomes a site of contestation and debate Langbauer pursues this question through the novels of Margaret Oliphant Charlotte Yonge Anthony Trollope and Arthur Conan Doyle and in the writings of Dorothy Richardson Virginia Woolf and John Galsworthy as they reflect on their Victorian predecessors She also explores accounts of the everyday in the works of such theorists as Henri Lefebvre Michel de Certeau and Sigmund Freud as well as materialist critics including George Lukacs Max Horkheimer and Theodor Adorno Her work shows how these writers link the series and the everyday in ways that reveal different approaches to comprehending the obscurity that makes up daily life
