Bouldin,Barbara Bouldin M.,1988 This book focuses on the transition faced by business organizations and their stakeholders as they move from protected markets to open competition and it explores how these changes can be facilitated by outside interveners agents Organization and Management of Advanced Manufacturing Waldemar Karwowski,Gavriel Salvendy,1994-03-31 Takes into account the effective use of human factors issues in advanced manufacturing which would make the difference between the failure or success of industrial corporations International authorities describe how to implement methods and techniques applicable on a global basis into manufacturing and process industries where change is being brought about as they move to concurrent engineering formats of operation *CIO* ,1989-11 **Army Logistician** ,2006 *Radical Project Management* Rob Thomsett,2002 Detailing a project management perspective which stresses the involvement of stakeholders management and clients and which accepts as a premise the fact of constant change this book describes the necessary tools and offers guidance for fitting the strategy to an existing organization It offers advice on understanding the project s context analyzing success and added value defining its scope and objectives identifying stakeholders defining quality selecting a development strategy navigating risks estimating tasks creating a schedule tracking and reporting troubleshooting and ethics Thomsett is a consultant Annotation copyrighted by Book News Inc Portland OR

experience of the author failure cases are very common and they include any type of company Many reasons to explain the failures and in some cases the successes could be postulated however the experiences are not structured enough and it is difficult to extract from them useful guidelines for avoiding future problems Generally speaking there is a trend to find the root of the problems in the technology itself and in its adequacy with the preexistent technological context Technocratic technology transfer models describe the problems in terms of these aspects Although it is true that those factors limit the probability of success there is another source of explanations linked to the individuals and working teams and how they perceive the technology
