The Return of Private Property Lale Yalçın-Heckmann, 2010

What makes private property valuable desirable or workable This book focuses on social and economic dimensions of private property after the agrarian reforms of 1996 in Azerbaijan It looks at the kinds of land and cultivation strategies emerging in the decades after the fall of the Soviet Union and asks why rural households were often unwilling to cultivate the privatized land shares they received for free despite the threat and existence of rural poverty Consideration is given both to households which were engaging in cultivation and those which were not This includes internally displaced persons who were formally excluded from the privatization process but were nevertheless successful and eager cultivators How and why were they keen on using land How far does private property thrive on its own without the support of lucrative markets or without the implementation of state sponsored economic policies Through the lens and insights provided by economic anthropology this study chronicles the historical legacy of authoritarian state structures as well as the contemporary micro and macro economic struggles that mark a politics of property after socialism

Comparative Property Law Michele Graziadei, Lionel Smith, 2017-01-27 Comparative Property Law provides a comprehensive treatment of property law from a comparative and global perspective The contributors who are leading experts in their fields cover both classical and new subjects including the transfer of property the public private divide in property law water and forest laws and the property rights of aboriginal peoples This Handbook maps the structure and the dynamics of property law in the contemporary world and will be an invaluable reference for researchers working in all domains of property law

Rural Transition in Azerbaijan Zvi Lerman, David Sedik, 2010-02-15 In 1995-96 the President of Azerbaijan Heydar Aliyev launched a program of agrarian reforms that caused a sweeping and irreversible shift from Soviet style collective agriculture to individual farming in his country These reforms led to an impressive recovery and substantial productivity improvements in agriculture The agrarian transition in Azerbaijan contrasts with that in Russia Ukraine and Kazakhstan where land privatization has been

accompanied by policies encouraging the persistence of large corporate farms and where agricultural recovery has been much less impressive. For this reason, Azerbaijan is today viewed as one of the few examples of successful land reform in the former Soviet Union. The impact of the Aliyev agrarian reforms went far beyond the recovery of agricultural production. The new policies had a significant impact on rural poverty and they were instrumental in increasing the incomes of Azerbaijan's large rural population which relies on agriculture for a substantial part of the family budget. To understand the successes and limitations of land reform, Rural Transition in Azerbaijan evaluates the record of rural reforms focusing on policy change, farm level performance and the impact of reforms on rural incomes and rural family well being issues that today are at the core of the agenda in many international organizations.

Agricultural Land Redistribution Hans P. Binswanger-Mkhize, Camille Bourguignon, Rogerius Johannes Eugenius van den Brink, 2009-01-01. Despite 250 years of land reform all over the world, important land inequalities remain, especially in Latin America and Southern Africa. While in these countries there is near consensus on the need for redistribution, much controversy persists around how to redistribute land peacefully and legally, often blocking progress on implementation. This book focuses on the how of land redistribution in order to forge greater consensus among land reform practitioners and enable them to make better choices on the mechanisms of land reform. Reviews and case studies describe and analyze the al

Crop Adaptation to Climate Change Shyam Singh Yadav, Robert J. Redden, Jerry L. Hatfield, Hermann Lotze-Campen, Anthony E. Hall, 2011-08-02. A major task of our time is to ensure adequate food supplies for the world's current population, now nearing 7 billion, in a sustainable way while protecting the vital functions and biological diversity of the global environment. The task of providing for a growing population is likely to be even more difficult in view of actual and potential changes in climatic conditions due to global warming and as the population continues to grow. Current projections suggest that the world's temperatures will rise 1.8-4.0°C by 2100 and population may reach 8 billion by the year 2025 and some 9 billion by mid-century, after which it may stabilize. This book addresses these critical issues by presenting the science needed not only to understand climate change effects on crops but also to adapt current agricultural systems, particularly in regard to genetics, to the changing conditions. *Crop Adaptation to Climate Change* covers a spectrum of issues related to both crops and climatic conditions. The first two sections provide a foundation on the factors involved in climate stress, assessing current climate change by region and covering crop physiological responses to these changes. The third and final section contains chapters focused on specific crops and the current research to improve their genetic adaptation to climate change. Written by an international team of authors, *Crop Adaptation to Climate Change* is a timely look at the potentially serious consequences of climate change for our global food supply and is an essential resource for academics, researchers and professionals in the fields of crop science, agronomy, plant physiology and molecular biology, crop consultants and breeders as well as climate and food scientists.

Policy Reform and Adjustment in the Agricultural Sectors of Developed Countries David Blandford, Berkeley Hill, 2006. This book explores the policy implications of growing

pressures for economic adjustment in the agricultural sectors of developed countries. It starts by describing the recent history of adjustment in the food and agricultural sector and assesses the current and future pressures for adjustments and their implications. Chapters provide empirical evidence on the magnitude of future adjustment in the agricultural sector under a continuation of existing policies and analyze the factors that affect farmers' ability to adjust to economic change. The book concludes by identifying lessons to be learned from recent reforms and evaluating future policy options. *Globalizing Central Asia* Marlene Laruelle, Sebastien Peyrouse, 2015-02-12 In this global era Central Asia must be understood in both geo-economic and geopolitical terms. The region's natural resources compel the attention of rivalrous great powers and ambitious internal factions. The local regimes are caught between the need for international collaborations to valorize these riches and the need to maintain control over them in the interest of state sovereignty. Russia and China dominate the horizon with other global players close behind; meanwhile neighboring countries are fractious and unstable with real potential for contagion. This pathbreaking introduction to Central Asia in contemporary international economic and political context answers the needs of both academic and professional audiences and is suitable for course adoption. **The Construction of Property** Amnon Lehari, 2013-06-20 The Construction of Property identifies the structural and institutional foundations of property and explains how these features can accommodate various normative agendas. Offering rich and cutting edge analysis, the book studies the spectrum of property regimes including private, common and public property as well as innovative forms of property hybrids such as US style residential community associations, the British Private Finance Initiative, the Israeli Renewing Kibbutz, community land trusts and grassroots phenomena of property ordering in publicly owned open spaces. It also investigates the protagonists of property beyond the individual and the state, identifying the key role that community organisations and business corporations play for both the private and public aspects of property. The book then addresses property's greatest challenge: the move from a largely domestic legal construct into one that accommodates the increasing social and economic forces of globalisation.
