**Becoming a Translator** Douglas Robinson, 2012-10-12 Fusing theory with advice and information about the practicalities of translating *Becoming a Translator* is the essential resource for novice and practicing translators. The book explains how the market works, helps translators learn how to translate faster and more accurately, as well as providing invaluable advice and tips about how to deal with potential problems such as stress. The third edition has been revised and updated throughout, offering extensive up-to-date information about new translation technologies, discussions of the emerging sociological and activist turns in translation studies, new exercises and examples, updated further reading sections, a website containing a teacher's guide, the chapter *The Translator as Learner*, and additional resources for translators. **Rethinking Translators** Andrea Musumeci, 2025-03-15 This book introduces a new area of research known as translator's posture. With technical, pedagogical, and sociological dimensions, posture is valuable to learners, researchers, educators, and practitioners alike. The technical dimension aims to invite practitioners and more advanced learners to reflect on their position within translation environments and establish their posture as translators with more ecological awareness. The pedagogical framework is grounded in an original conceptual exploration of translation constraints, leading to an ecologically inspired perspective on translation affordances. The sociological aspect draws on the notion of authorial posture in the sociology of literature. The book also presents the action research data collection from a translation theory module in a Hong Kong University, supporting the integration of postural learning into curricula. This book aims to benefit global academic and professional communities in translation studies.

**Critical Translation Studies** Douglas Robinson, 2017-02-17 This book introduces Critical Translation Studies (CTS), a cultural studies approach to the study of translation to Translation Studies (TS) scholars. A term first used by Lydia Liu in her list of research interests, CTS is based perhaps on the model of Critical Discourse Analysis or Critical Legal Studies, with an implicit focus on translation as a social practice shaped by power relations in society. The central claim in CTS is that translators help condition what TS scholars take to be the primal scene of translation: two languages, two language communities, with the translator as mediator. CTS is dedicated to the historicization of the social relations that create that scenario.
