Bed Number Ten Sue Baier, Mary Zimmeth Schomaker, 1989-03-31 A patient's personal view of long term care Seen through the eyes of a patient totally paralyzed with Guillain Barr syndrome this moving book takes you through the psychological and physical pain of an eleven month hospital stay BED NUMBER TEN reads like a compelling novel but is entirely factual You will meet The ICU staff who learned to communicate with the paralyzed woman and those who did not bother The physicians whose visits left her baffled about her own case The staff and physicians who spoke to her and others who did not recognize her presence The nurse who tucked Sue tightly under the covers unaware that she was soaking with perspiration The nurse who took the time to feed her drop by drop as she slowly learned how to swallow again The physical therapist who could read her eyes and spurred her on to move again as if the battle were his own In these pages which reveal the caring the heroism and the insensitivity sometimes found in the health care fields you may even meet people you know

Reconstructing Illness Anne Hunsaker Hawkins, 1999 Serious illness and mortality those most universal unavoidable and frightening of human experiences are the focus of this pioneering study which has been hailed as a telling and provocative commentary on our times As modern medicine has become more scientific and dispassionate a new literary genre has emerged pathography the personal narrative concerning illness treatment and sometimes death Hawkins's sensitive reading of numerous pathographies highlights the assumptions attitudes and myths that people bring to the medical encounter One factor emerges again and again in these case studies the tendency in contemporary medical practice to focus primarily not on the needs of the individual who is sick but on the condition that we call disease Pathography allows the individual person a voice one that asserts the importance of the experiential side of illness and thus restores the feeling thinking experiencing human being to the center of the medical enterprise Recommended for medical practitioners the clergy caregivers students of popular culture and the general reader Reconstructing Illness demonstrates that only when we hear both the doctor's and the patient's voice will we have a

medicine that is truly human **Federal Register** ,1977 **Handbook of Medical Sociology, Sixth Edition** Chloe E. Bird, Peter Conrad, Allen M. Fremont, Stefan Timmermans, 2010-11-29 The latest version of an important academic resource published about once a decade since 1963 **Guillain-Barre Syndrome** Brian S. Langton, 2007-02-16 This book is about three people from different walks of life each of whom experienced a life changing episode of Guillain Barr Syndrome Three dramatic stories in one Firstly a story of the Author s remarkable almost complete recovery following his encounter with the syndrome It is a frank and personal account of his struggle to regain much of what he had lost in bodily function during one year of hospitalisation It should provide inspiration and possibly answer so many questions typically asked by others afflicted with this syndrome Secondly case studies written by two co author contributors one a Calgary Veterinarian and mother of two the other a retired Vancouver resident who was struck with Guillain Barr Syndrome whilst shopping for a boat in England There is no single answer to the question as to how life may change after recovery from this disorder Each case appears to be unique That is why I have chosen to include not just a record of my partial recovery but also the recovery record of two additional people each different from one another s and each certainly different from mine Author s Preface We eventually identified a boat only three feet short of what we had wanted that was within our budget At this point Heather s brother who lived nearby said he would like a share in the boat to which we agreed During this discussion in his house I had to ask him to refrain from smoking as my throat was quite sore I was feeling rather run down and often felt cold About the same time on a Saturday I felt a tingling in the finger tips of my left hand and found they were a bit swollen I mentioned it to Heather but it did not seem serious It was however the first sign that I had contracted GBS If only I had known the treatment might have been started earlier Patrick Hill Probably the worst face of Guillain Barr Syndrome is the effect it has on loved ones Severe or not chronic or not it matters little to the supporting family at the bedside of a patient Fear puzzlement and apprehension are all experienced by the loved ones Reading the case histories of Sarah and Patrick one learns how their spouses also suffered many frightening experiences but in spite of all that they remained obviously without second thought hesitation or doubt True to their marriage vows they provided so much love care and support That was the shared experience among the three of us Author Epilogue
