New Mentalities of Government in China David Bray, Elaine Jeffreys, 2016-01-13 China continues to transform apace flowing from the forces of deregulation privatization and globalization unleashed by economic reforms which began in late 1978 The dramatic scope of economic change in China is often counterposed to the apparent lack of political change as demonstrated by continued Chinese Communist Party CCP rule However the ongoing dominance of the CCP belies the fact that much has also changed in relation to practices of government including how authorities and citizens interact in the management of daily life New Mentalities of Government in China examines how the privatization and professionalization of public service provision is transforming the nature of government and everyday life in the People s Republic of China PRC The book addresses key theoretical questions on the nature of government in China and documents the emergence of a range of new mentalities of government in China Its chapters focus on areas such as clinical trials conceptualizing government consumer activity elite philanthropy lifestyle and beauty advice public health social work volunteering and urban and rural planning Offering a topical examination of

shifting modes of governance in contemporary China this book will appeal to scholars in the fields of anthropology history politics and sociology

Reading Asia Frans Huskin,Dick van der Meij,2013-10-11 This volume presents a wide variety of articles in the broad field of Asian Studies covering the latest results of research within the social sciences and the humanities reflecting the rich diversity within these areas of research The contributions stem from research carried out by scholars who are or have been affiliated with the International Institute for Asian Studies Leiden Amsterdam

Chinese Transnational Networks Chee-Beng Tan,2006-10-19 The Chinese overseas have long been relevant to China especially to qiaoxiang and vice versa Qiaoxiang refers to regions from where emigrants migrated overseas where there are therefore ties with Chinese communities overseas Unlike most other works which cover either China or the Chinese overseas this book examines both China and the Chinese overseas in relation to qiaoxiang With clearly presented chapters that examine the ancestral homeland Chinese overseas China and transnational networks and the diversity of settlements and homelands the expert team of international contributors of Chinese Transnational Networks have created a volume which will be essential reading for students and scholars of migrations studies Chinese diaspora and Chinese culture and society

China's Local Administration Jae Ho Chung,Tao-chiu Lam,2009-10-16 This book presents a comprehensive survey of China s local administration It considers all kinds of local government units and their administrative functions both historically and in the present day ranging from the provinces centrally administered municipalities and autonomous regions to prefectures counties townships and urban districts

China's Urban Space Terry McGee,George C.S. Lin,Mark Wang,Andrew Marton, Jiaping Wu,2007-10-18 China s urban growth is unparalleled in the history of global urbanization and will undoubtedly create huge challenges to China as it modernizes its society Adopting an interdisciplinary approach this book presents an overview of the radical transformation of China s urban space since the 1970s arguing that to study the Chinese urbanization process one must recognize the distinctive political economy of China After a long period as a planned socialist economy China s rapid entry into the global economy has raised suggestions that modernization in China will inevitably result in urban patterns and features like those of cities in developed market economies This book argues that this is unlikely in the short term because processes of urban transition in China must be interpreted through the lens of a unique and unprecedented juxtaposition of socialism and the market economy which is leading to distinctive patterns of Chinese urbanization Richly illustrated with maps diagrams and in depth case studies this book will be an invaluable resource to students and scholars of urban economics and policy geography and the development of China

Young Chinese in Urban China Alex Cockain,2012-08-21 This book examines the condition of being a young person in China and the way in which changes in various dimensions of urban life have affected Chinese youths quests to understand themselves The author examines social factors such as changes in the physical construction of urban neighbourhoods changes in family life including reduced family size increasing rates of divorce and increased physical mobility of the family unit school life and

mounting pressure to perform well in examinations and be a good student access to foreign and domestic media as well as access to the internet Drawing on the fields of social and cultural anthropology Alex Cockain shows that the process of self understanding in a changing spatial social and cultural world involves ongoing disjointed efforts to achieve a sense of security and belonging on the one hand and a degree of increased autonomy in their relationships with for example parents and teachers on the other This book will appeal to anyone interested in Chinese Society Social and Cultural Anthropology Asian Anthropology and Youth Studies

Remaking the Chinese State Chao Chien-min, Bruce Dickson, 2003-09-02 After more than twenty years of economic and political reform China is a vastly different country to that left by Mao Almost all the characteristic policies and practices of the Maoist era have been abandoned with the goals of revolution in foreign and domestic policy being replaced by an emphasis on economic modernization accompanied by radical social transformation and an increasingly significant international role Yet despite these dramatic changes other fundamental features of China's policy remain unchanged This book explores the strategies of reform in China and their implications for its domestic and foreign policies It challenges the misconceptions that no political reforms are taking place and that China is eagerly embracing capitalism It also challenges the view that China does not abide by international norms and practices on military and security matters Its contributors all highly respected scholars avoid simple generalisations about the nature of China's politics or future path instead offering comparisons and contrasts between policy areas and regions to create a more complete picture of this complex country

China's Embedded Activism Peter Ho, Richard Edmonds, 2007-10-19 In recent years China has been remarkable in achieving extraordinary economic transformation yet without fundamental political change To many observers this would seem to imply a weakness in Chinese civil society However though the idea of democracy as multitudes of citizens taking to the streets may be attractive it is simultaneously misleading as it disregards the nature of political change taking place in China today a gradual shift towards a polity adapted to a pluralist society At the same time one may wonder what the limited political space implies for the development of a social movement in China This book explores this question by focusing on one of the most active areas of Chinese civil society the environment China's Embedded Activism argues that China's semi authoritarian limitations on the freedom of association and speech coupled with increased social spaces for civic action has created a milieu in which activism occurs in an embedded fashion The semi authoritarian atmosphere is restrictive of but paradoxically also conducive to nationwide collective action with less risk of social instability and repression at the hand of the governing elite Rich in case studies about environmental civic organizations in China and written by a team of international experts on social movements NGOs democratization and civil society this book addresses a wide readership of students scholars and professionals interested in development geography and environment political change and contemporary Chinese society

Microregionalism and Governance in East Asia Dr. Katsuhiko Sasuga, 2004-10-28 This book provides an analysis of the processes of micro regionalization in East Asia within the broader

context of globalization and regionalization The author examines the specifics of corporation production and investment networks that link parts of Japan Taiwan and China with a detailed case study focusing on the electronics industry Making a significant contribution to the research on regionalism and multi level governance in East Asia this book will appeal to those interested in international political economy and Asian studies **China's Rational Entrepreneurs** Barbara

Krug,2004-07-31 The ability of China s entrepreneurs to establish firms in the midst of a strangling bureaucratic system is a topic which demands attention not least because it forms the basis of China s economic development Combining theoretical approaches with extensive fieldwork China s Rational Entrepreneurs presents a fresh angle of analysis for understanding the behaviour of Chinese entrepreneurs and what kind of relations they have with local government in order to secure long term business success *China's Cotton Industry* Björn Alpermann,2010-04-05 This book examines the political economy of the cotton processing industry analyzes the process of cotton policy making and looks at how local governments and the former monopolist cope with the changes brought about by marketization

Central Control and Local Discretion in China Chae-ho Chŏng,2000 This book analyses the decollectivization reform in China during the early 1980s in order to gauge the impact of post Mao decentralization on central control and provincial discretion The volume challenges the notion that the decision to decentralize administrative authority ipso facto produces local discretion properly keyed to local conditions In fact outcomes often differ from the intended goals While generally local interests and central local clientilistic networks determine the policy responses of the provinces bureaucratic careerism also plays a crucial role In the case of post Mao decollectivization national level analyses suggest that a majority of provinces adopted household farming neither too quickly nor too slowly since both pioneering and resisting entailed potentially enormous political risks Once Beijing s preference appeared firmly fixed however they all quickly bandwagoned by popularizing the policy as swiftly as possible Three detailed case studies of Anhui as a pioneer Shandong as a bandwagoner and Heilongjiang as a resister further highlight the evolutionary process in which provincial variations came to be replaced by uniform compliance imposed by Beijing Theoretically this study contends that the overall scope of local discretion is circumscribed by the dominant norms and incentive relations embedded in the implementation dynamics Methodologically the book employs a combination of aggregate analyses and comparative case studies Empirically on the basis of newly available materials including classified documents and interviews it challenges the peasant power school which has somehow allowed local governments to evaporate in its descriptions of post Mao decollectivization **Maturing Megacities** Uwe Altröck,Sonia Schoon,2013-08-19 This edited volume covers the multiple

changes concerning urban governance in the course of the progressive transformation of the Pearl River Delta mega urban region in China Looking at the megacities Guangzhou and Shenzhen it analyzes the maturing of socio economic political and spatial structures after the first waves of economic globalization political transformation and their rapid expansion and urbanization The initial claim and starting point of the book is the existence of a profound multidimensional shift in the

coastal mega urban region with a major tendency towards urban upgrading economic restructuring and a clearly observable consolidation of political institutions For the first time since the beginning of the reform and opening up after 1978 this has led to a stronger bias toward urban regeneration an adaptive re use of the building stock and an establishment of post industrial knowledge based creative industries The book investigates these changes as a set of mutually dependent developments that have to be understood and analyzed in connection with one another Thus the backgrounds and underlying forces that shape physical restructuring in the developed urban cores of the mega urban region and the ways in which the relevant actors and institutions are trying to both cope with and to influence each other are introduced here **Translocal**

China Tim Oakes,Louisa Schein,2006-08-21 Inter disciplinary in approach this collection of essays explores China s reform era development within the concept of translocality A key element of spatial change in today s China has been the unprecedented geographic mobility of millions of labour migrants tourists brides entrepreneurs and many others But translocality doesn t just mean people It is crucially constituted by the circulation of capital ideas images goods styles services and disease to name but a few With contributions from well respected China specialists the essays focus simultaneously on mobilities and localities drawing our attention to the multiplying forms of mobility in China whilst retaining the importance of localities in people s lives The book provides a clear path to understanding the importance of translocality as a concept along with concrete examples of its operation in China Unique in approach it is at once a study of the connections between location and culture politics economics bodies gender and technology **Locating China** Jing Wang,2007-05-07 Taking a multidisciplinary approach this volume examines the relationship between space and the production of local popular culture in contemporary China The international team of contributors examine the inter relationship between the cultural imaginary of a given place and China s continuing drive towards urbanization This has led to the development of new spaces and places and new forms of spatial practices that destabilize old concepts of the local and locality Delivering ethnographic observations and theoretical speculations this work furthers our understanding of the link between spatial thinking and the production of consumer culture in China Choosing China's Leaders Chien-wen Kou,Xiaowei Zang,2013-10-08 Political elites are a key topic in contemporary China studies and have been investigated in relation to factional politics generation politics technocracy and crucially institutionalization The institutionalization of elite replacement began in China in the 1980s and quickly accelerated after the early 1990s as mechanisms emerged to regulate political elites entry and exit including age limits term limits and step by step promotion By examining the various processes of elite selection this book explores the role played by institutionalization in elite recruitment promotion and turnover in China While existing studies have developed our understanding of Chinese elite politics two key puzzles regarding institutionalisation remain Although institutionalisation is recognised as an important trend in Chinese politics there is as yet no theoretical framework to explain the forces that have brought about and sustained this Further it is unclear how the

process of institutionalisation has impacted on factional politics and how factions would continue to operate within the parameters of formal politics Drawing on a wide range of studies this book looks at Politburo members senior People's Liberation Army officers provincial leaders heads of major central state owned enterprises and Youth League affiliates to provide a comprehensive understanding of elite recruitment and mobility in contemporary China This book will be of great interests to students and scholars of Chinese politics and government Chinese studies and Asian politics more broadly
