Becoming Visible in Iran Mehri Honarbin-Holliday, 2009-02-28 The state of women in Islamic societies is the subject of much interest and heated debate Yet these discussions and representations in the media and elsewhere rely on inadequate information and misperceptions imagining Muslim women as oppressed victims in need of liberation by outside forces *Becoming Visible in Iran* disputes these widespread stereotypes providing a vivid account of women in contemporary Iran as they go about their daily lives Beginning at home women are infusing dramatic change by challenging the patriarchal conceptions of their fathers brothers uncles and others within the intimate sphere of family and home Empowered by education they transport the power of their minds and being from the domestic to the public and political Mehri Honarbin Holliday presents the experiences of these young women who wield a key if indirect political influence on the seemingly male dominated politics of this society as they achieve a new visibility She shows us how women understand their place in contemporary Iranian society and how they interrogate it making demands for shifts in attitudes and behaviours both at home in relation to male relatives and in the wider world Women's daily existence weaves between the public and the private from home to classrooms parks metros cafes and taxis negotiating socio political limitations and the current regime's policies of female invisibility Detailed interviews and striking narratives draw our attention to the women's reflexive and critical

stance and their desires to be recognized as independent and active architects of their own personal lives whilst also contributing to the discourses of change and a more just civil society From this fieldwork and focusing especially on young women Honarbin Holliday presents women s views on such key topics as public visibility body presentation and sexual curiosity in addition to education civil society and political and social change Highlighting links and continuities with the history of women in Iran from the early twentieth century to the present moment she shows how Iranian women today strive to be the author of one s fate to resist narrow interpretations of religion to conduct meaningful rich and complex lives to bring about change in the mindsets of male relatives and to contribute to legal and political debates in the country For its direct presentation of women s voices as well as its analysis and insight this book is a vital contribution to our understanding of the lives of Muslim women and the possibilities before them today *Becoming Visible in Iran* is indispensable for those concerned with women in Islamic societies gender studies sociology anthropology as well as Iran and the Middle East

The Visible Human Project Catherine Waldby, 2003-09-02 The Visible Human Project is a critical investigation of the spectacular three dimensional recordings of real human bodies dissected photographed and converted into visual data files made by the US National Library of Medicine in Baltimore Catherine Waldby uses new ideas from cultural studies science studies and social studies of the computer to situate the Visible Human Project in its historical and cultural context and to consider the meanings such an object has within a computerised culture In this fascinating and important book Catherine Waldby explores how advances in medical technologies have changed the way we view and study the human body and places the VHP within the history of technologies such as the X ray and CT scan which allow us to view the human interior Bringing together medical conceptions of the human body with theories of visual culture from Foucault to Donna Haraway Waldby links the VHP to a range of other biomedical projects such as the Human Genome Project and cloning which approach living bodies as data sources She argues that the VHP is an example of the increasingly blurred distinction between living and dead human bodies as the bodies it uses are digitally preserved as a resource for living bodies and considers how computer based biotechnologies affect both medical and non medical meanings of the body s life and death its location and its limits

Law and Evil Ari Hirvonen, Janne Porttikivi, 2009-10-22 *Law and Evil* opens expands and deepens our understanding of the phenomenon of evil by addressing the theoretical relationship between this phenomenon and law Hannah Arendt said the problem of evil will be the fundamental question of post war intellectual life in Europe This statement is unfortunately more than valid in the contemporary world not only in the events of war crimes against humanity terror repression criminality violence torture human trafficking and so on but also as evil is used rhetorically to condemn these acts to categorise their perpetrators and to justify forcible measures both in international and domestic politics and law But what is evil Evil as a concept is too often taken as something that is self evident something that is always already defined Taking Kant s concept of radical evil as a starting point this volume counters such a tendency Bringing together philosophical political and psychoanalytical perspectives in analysing both the concept and the phenomenon of evil the contributors to this volume offer a rich and thoroughgoing analysis of the multifaceted phenomenon of evil and its relationship to law Pamphlet for Life Arthur

The Passive Eye Branka Arsić,2003 The Passive Eye is a revolutionary and historically rich account of Berkeley s theory of vision In this formidable work the author considers the theory of the embodied subject and its passions in light of a highly dynamic conception of infinity Arsić shows the profound affinities between Berkeley and Spinoza and offers a highly textual reading of Berkeley on the concept of an exhausted subjectivity The author begins by following the Renaissance universe of vision particularly the paradoxical elusive nature of mirrors then shows how this conception of vision was translated into the optical devices and in what way the various ways of deception could be conceived Reading Berkeley against the backdrop of competing theories in relation to Leibniz Spinoza Newton Malebranche Hume Locke Molyneux and others this book gives a meticulous historic reconstruction of Berkeley s theory This excellent scholarly work presents Berkeley s theory in a new and radical light The book presented in three parts begins by presenting the conceptions of vision prior to Berkeley s intervention In the second part the author moves through a careful study of Descartes theory of vision to arrive at Berkeley The third part addresses the author s version of Berkeley in which the eye and the image become inseparable due to the collapse of the universe of representation The problem of vision becomes not that of representation but of presentation Through an erudite historic reading of Berkeley s theory and astute comparative assessments the author uncovers Berkeley s place as a contemporary theoretician corresponding with such thinkers as Deleuze Lacan Foucault and Derrida
