Congress. Senate. Committee on Appropriations. Subcommittee on Departments of Labor, Health and Human Services, Education, and Related Agencies,1982 Are Racists Crazy? Sander L. Gilman,James Thomas,2018-09-04 The connection and science behind race racism and mental illness In 2012 an interdisciplinary team of scientists at the University of Oxford reported that based on their clinical experiment the beta blocker drug Propranolol could reduce implicit racial bias among its users Shortly after the experiment an article in Time Magazine cited the study posing the question Is racism becoming a mental illness In Are Racists Crazy Sander Gilman and James Thomas trace the idea of race and racism as psychopathological categories from mid 19th century Europe to contemporary America up to the aforementioned clinical experiment at the University of Oxford and ask a slightly different question than that posed by Time How did racism become a mental illness Using historical archival and content analysis the authors provide a rich account of how the 19th century Sciences of Man including anthropology medicine and biology used race as a means of defining psychopathology and how assertions about race and madness became embedded within disciplines that deal with mental health and illness An illuminating and riveting history of the discourse on racism antisemitism and psychopathology Are Racists Crazy connects past and present claims about race and racism showing the dangerous implications of this specious line of thought for today The Racial Crisis in American Higher Education William A. Smith,Philip G. Altbach,Kofi Lomotey,2012-02-01 Why is it that as we enter the twenty

first century the nation's predominantly white colleges and universities continue to be settings where people of color feel unwelcome and marginalized. The contributors to this volume dissect a variety of structural and attitudinal factors that are prevalent in the higher education community: organizational constructs and value orientations which seem to hark more to the past than to the future. They comment on the political, social, and economic factors that have shaped academic culture and buttressed its quietly efficient maintenance of racially discriminatory practices. The American system of higher education is often regarded as the best in the world. Smith, Altbach, and Lomotey have edited a volume that implicitly asks how much better still it could be if it embraced people of color and provided them with a supportive and nurturing environment one which encouraged them to reach their fullest creative and intellectual potential. Indeed, this will probably be the most significant challenge that the academy faces in the twenty-first century. William B. Harvey, Vice President and Director, Office of Minorities in Higher Education, American Council on Education, Washington, D.C.
