## **Creation And Last Things At The Intersection Of Theology And Science:**

**Creation and Last Things** Gregory S. Cootsona, 2002-01-01 In this well written and concise volume Gregory Cootsona explores the doctrines of creation and eschatology the end of days in light of contemporary science He addresses what the relationship is between creation in the beginning and the new creation at the end of time how the doctrine of creation informs our lives as Christians and how we grow in faith and love in light of these doctrines The Foundations of Christian Faith series enables readers to learn about contemporary theology in ways that are clear enjoyable and meaningful It examines the doctrines of the Christian faith and stimulates readers not only to think more deeply about their faith but also to understand it in relation to contemporary challenges and questions Individuals and study groups alike will find these guides invaluable in their search for depth and integrity in their Christian faith

**One World Or Many?** Richard Tiplady, 2003 This book considers in detail the key drivers of globalization its contemporary shape and its implications for world mission It also looks at the impact of globalization on different contemporary issues affecting mission such as ethnicity the environment and global health as well as globalization s effect on more traditional missionary questions of the world religions contextualization theology and the church One World or Many is written by a variety of authors from all over the world This book was published in partnership with the World Evangelical Alliance

C. S. Lewis and the Crisis of a Christian Gregory S. Cootsona, 2014-01-01 C S Lewis has long been recognized as a beloved author of children s literature and an apologist for Christian belief to a skeptical modern world In this new volume Gregory S Cootsona shows us how Lewis can also serve as a guide to the ups and downs of the Christian journey Like many of us Lewis suffered from a variety of crises of faith and personal experience Like us he came to faith in a world that no longer respects Christian commitment or offers much room for belief in God Like us he felt the absence of God when those closest to him died Like us he wrestled with doubt wondering if God is real or simply the projection of his own wishes onto the screen of the universe Like us he knew the kinds of temptations he described with such poignancy and humor in The Screwtape Letters By examining these and the other crises of C S Lewis s life Cootsona shows us how Lewis found God in each one and how he shared those discoveries with us in his writing All those wishing to deepen and enrich their own spiritual journey will find much guidance and wisdom in these pages

**Mere Science and Christian Faith** Greg Cootsona, 2018-03-13 Emerging adults want to believe that science and faith can coexist peacefully and Greg Cootsona argues that they can In his book Mere Science and Christian Faith he holds out a vision for the integration of science and faith and how it can lead us more deeply into the conversations that confront the church today

**Maker** Melissa Cain Travis, 2018-07-03 Are We an Accident or Not The question of cosmic origins and our place in the grand scheme of things has been debated for millennia Why do we exist Why does anything exist at all Today s popular narrative based on advancements in science is that it all happened by natural random processes Melissa Cain Travis points to powerful evidence that the opposite is true that cosmology astronomy biochemistry and other disciplines strongly support what she calls The Maker Thesis which explains the origin rationality and intricacy of nature and the human mind s capacity to comprehend it Our universe is made up of numerous complex systems of order that both interact and coexist with each other as if in a carefully choreographed dance Follow along on a fascinating journey about how the structure of nature and the mind of man resonate in ways that point to a Maker who fully intended the astounding discoveries being made in the natural sciences today     The British National Bibliography Arthur James Wells, 2003     *The Oxford Handbook of Religion and Science* Philip Clayton, Zachary Simpson, 2006 The field of science and religion is exploding in popularity among both academics and the reading public This is a comprehensive and authoritative introduction to the debate written by the leading experts yet accessible to the general reader     Adult Study Guide Charles Wiley, 2004     **Science and Religion** J.W. Fennema, Paul Iain, 2012-12-06 The world is increasingly becoming one It is at the same time one endangered ecosystem and one thriving market place with material and spiritual goods on competitive display And the good and evil things of life cannot easily be sorted out The world is becoming one also in the sense that it is better understood today than it was in earlier times that the material good and the spiritual good though seemingly belonging to different realms of fact defined by their respective modes of existence together constitute effectively one and the same reality the modern world of science technology computerized administration and power that calls upon humankind to struggle for a just participatory and sustainable society and to strive for a society of the future that will be the world over both long lived and worth living The Second European Conference on Science and Religion held on 10-13th March 1988 on the campus of the Universiteit Twente Enschede The Netherlands was meant to be a modest market place a forum where standpoints and opinions could be presented and criticized It was meant to offer an opportunity to meet and to make acquaintances in the expectation that the exchange of thoughts would lead to new conceptual horizons that would challenge what so far had been considered as hard fact or what until now had been looked upon as a distinctive feature of a well established view either of the kingdom of the sciences or of the realm of religion     *Nature and Time* Dong In Baek, 2024-12-30 Unveil the intricate tapestry of faith and reason in Nature and Time Integrative Dialogues in History and Theology This insightful work bridges the gap between traditional Christian thought and contemporary scientific understanding Delving deep into the evolving role of natural theology it explores how human reason and empirical observation intertwine with divine revelation From the hierarchical dance between natural and revealed theology to the pressing political and ecological challenges of our time this book offers a fresh lens through which to view the divine in the modern world Journey through philosophical perspectives on time

understand divine action in new dimensions and grapple with the global struggle against oppression all while discovering the enduring relevance of natural theology By weaving together insights from ecology cosmology and neuroscience it fosters a dynamic dialogue that enriches both science and spirituality Whether a theologian seeking depth a scientist exploring beyond the empirical or a curious mind yearning for meaning this book invites the reader to a transformative exploration Engage with a framework that not only addresses the complexities of the world but also fosters a deeper understanding of the divine in every aspect of life

*From the Dust of the Earth* Matthew J. Ramage, 2022-05-06 In this book the author's fourth dedicated to applying Joseph Ratzinger Benedict XVI's wisdom to pressing theological difficulties Matthew Ramage attempts to square advances in the field of evolutionary biology with the Bible as interpreted through the teaching of the Catholic Church Distinguishing between evolutionary theory properly speaking and materialist philosophy Ramage's work both addresses the challenge of evolutionary science to Catholic teaching on human origins and argues that discoveries in evolutionary biology yield precious insight into the mystery of God's saving plan in Christ applying Ratzinger's principles to such issues as the meaning of man's special creation the relationship between sin and death and the implications of evolution for eschatology

Science and Religion Gary B. Ferngren, 2002-08 Written by distinguished historians of science and religion the thirty essays in this volume survey the relationship of Western religious traditions to science from the beginning of the Christian era to the late twentieth century This wide ranging collection also introduces a variety of approaches to understanding their intersection suggesting a model not of inalterable conflict but of complex interaction Tracing the rise of science from its birth in the medieval West through the scientific revolution the contributors describe major shifts that were marked by discoveries such as those of Copernicus Galileo and Isaac Newton and the Catholic and Protestant reactions to them They assess changes in scientific understanding brought about by eighteenth and nineteenth century transformations in geology cosmology and biology together with the responses of both mainstream religious groups and such newer movements as evangelicalism and fundamentalism The book also treats the theological implications of contemporary science and evaluates recent approaches such as environmentalism gender studies social construction and postmodernism which are at the center of current debates in the historiography understanding and application of science Contributors Colin A Russell David B Wilson Edward Grant David C Lindberg Alnoor Dhanani Owen Gingerich Richard J Blackwell Edward B Davis Michael P Winship John Henry Margaret J Osler Richard S Westfall John Hedley Brooke Nicolaas A Rupke Peter M Hess James Moore Peter J Bowler Ronald L Numbers Steven J Harris Mark A Noll Edward J Larson Richard Olson Craig Sean McConnell Robin Collins William A Dembski David N Livingstone Sara Miles and Stephen P Weldon

*Space, Time and Resurrection* Thomas F. Torrance, 2018-12-13 In this sequel to *Space Time and Incarnation* Thomas F Torrance sets out the biblical approach to the Resurrection in terms of the intrinsic significance of the resurrected one Jesus and demonstrates that the Resurrection is entirely consistent with who Jesus was and what he did The Resurrection is thus taken realistically and

treated as of the same nature in the integration of physical and spiritual existence as the death of Christ All this is elucidated in the context of modern scientific thought in such a way as to show that far from being frightened by modern science into a compromise of the New Testament's message of the Resurrection of Jesus Christ in body it actually allows us to take its full measure This classic volume from one of the premier English speaking theologians of the 20th century remains an important contribution to the field of systematic theology For this Cornerstones edition the preface is written by Paul D Molnar

**Science, Religion, and Health** Jay Harold Ellens, 2016-11-10 Psychology and theology interface at four levels theory development research process data collection and clinical operation At each level they connect in the model of humanness anthropology forming and functioning there and in that model of humanness it is in personality theory that psychology illumines theology and that psychology illumines theology A theologian who does not take full advantage of the way psychology illumines theology is not serious about the work of theology A psychologist who does not take full advantage of the way theology illumines psychology is not serious about the field and practice of psychology Science Religion and Health explains in readable style how that interface and mutual illumination works and why it is crucial for Christian psychotherapists and pastors

**T&T Clark Handbook of Christian Theology and the Modern Sciences** John P. Slattery, 2020-10-01 This handbook surveys the many relationships between scientific studies of the world around us and Christian concepts of the Divine from the ancient Greeks to modern ecotheology From Augustine to Hildegard of Bingen Genesis to Frederick Douglass and physics to sociology this volume opens the intersections of Christian theology and science to new concepts voices and futures The central goal of the handbook is to bring new perspectives to the foreground of Christian theological engagement with science and to highlight the many engagements today that are not often identified as science theology discussions The handbook thus includes several aspects not found in previous handbooks on the same topic significant representation from the three major branches of Christianity Orthodox Roman Catholic and Protestant multiple essays on areas of modern science not traditionally part of the theology and science dialogue such as discussions of race medicine and sociology a collection of essays on historical theologians approaches to nature and science T Catholic Protestant and Orthodox surveys of theology science scholarship in the 20th and 21st centuries and ten explorations in Christian theology today from Einsteinian physics to decolonial sociology The 24 chapters then span the volume offer the reader whether scholar student or layperson an essential resource for any future conversations around science and Christian theology

**The Theology of Amos Yong and the New Face of Pentecostal Scholarship** Wolfgang Vondey, Martin Mittelstadt, 2013-06-15 In The Theology of Amos Yong and the New Face of Pentecostal Scholarship Wolfgang Vondey and Martin William Mittelstadt gather a table of experts on one of the most influential voices in current Pentecostal theology The authors provide an introduction and critical assessment of Yong's biblical foundations hermeneutics epistemology philosophical presuppositions trinitarian theology theology of religions ecumenical and interfaith relations theology of disability engagement with contemporary culture and

participation in the theology and science conversation These diverse topics are pursued through the complementary perspectives that together shape Yong s methodology pneumatology pentecostalism and the possibility of renewal The contributors invite a more thorough reading of Yong s work and propose a more substantial engagement with the new face of Pentecostal scholarship Contributors include Andrew Carver Jacob D Dodson Jeff Hittenberger Mark Mann Martin William Mittelstadt L William Oliverio Jr David A Reed Tony Richie Christopher A Stephenson Steven M Studebaker Paraskev Eve Tibbs and Wolfgang Vondey     *Jürgen Moltmann and the Work of Hope* M. Douglas Meeks, 2018-10-31 These essays reflect on the future of Christian theology in light of the contributions Jürgen Moltmann has made in his prolific career as one of the world s foremost theologians They are not a prediction of what is coming in the future of theology since God s own actions and human history for that matter are not predictable Expressed here is hope for what future theology should take seriously from Moltmann s work Moltmann broke the mold of 19th and 20th century theology by focusing consistently on God s promises of a new heaven and a new earth The result was a theological imagination that is utterly realistic delighting in the creative tension of theology that lives in an unfinished open field of negations and possibilities Hope for the promised future of God casts its light on present sufferings that contradict that future The prominent themes here focus on the contradictions of God s promises and God s justice The essays see clearly the human domination that leads to the oppression of nature the hatred of the poor the dominance of one gender over the other the migration of those who find no home in their homeland and the wounds of neocolonialism For Moltmann these sufferings do not belong simply to ethics but to the heart of theology The doctrines of creation redemption and new creation are fully engaged in the political economic ecological and social problems of this time Here lies the way ecumenism will be reborn in the future The essays argue that theology should not turn aside from Moltmann s main theme of the resurrection of the Crucified One and of the presence of God s future in the present Hope opens our eyes to the work of God s Spirit of Life and the affirmation of eternal life in the present The future of Christian theology should not miss the theme of joy in the face of sin death and evil and the celebration of God s cosmic all inclusive future in which God will be at home in God s creation
