Effective Fund-Raising Management Kathleen S. Kelly,2012-12-06 In a ground breaking departure from existing works almost all of which are how to manuals based on anecdotal evidence this is the first academic textbook on fund raising By integrating practical knowledge with social science theory and research it presents a comprehensive approach to the function from its legal and ethical principles to the managerial process by which gifts are raised Territory previously uncharted in the literature is explored such as the historical and organizational contexts of contemporary practice Explanations of programs techniques and publics introduce a new system for understanding fund raising s major concepts Unlike efforts in established fields most of the material represents original scholarship undertaken to produce a first time text The book s main purpose is to teach students about

fund raising a high demand high paying occupation that will continue to expand into the 21st century as the need for trained practitioners exceeds the supply During the last decade fund raising education moved into the formal classroom and away from an apprenticeship tradition of senior practitioners mentoring newcomers Yet until now there has not been a textbook to support this evolving professionalism Faculty have been reluctant to define fund raising as an academic subject in the absence of a theory based teaching resource and courses usually have been assigned to part time instructors hired from the practice This textbook addresses the void It is designed for graduate and upper level undergraduate courses dealing with fund raising as a primary or secondary subject Among its features each chapter points out research gaps and opportunities such as problems and theories for master s theses and doctoral dissertations and ends with a list of suggested readings The text is appropriate for the diverse academic areas in which fund raising nonprofit management and philanthropy are taught including public administration management arts and humanities education social work economics and sociology Because of its public relations orientation it is particularly suited for courses offered in that discipline Additional audiences are practitioners enrolled in professional development programs CEOs trustees and others interested in self study and scholars who need serious literature on the subject
