Bede The Schools And The Computus Variorum Collected Studies:

Understanding the Middle Ages Harald Kleinschmidt, 2000 Illustrations and narrative work together in this book to present medieval culture as one visual image Drawing extensively from a wide range of primary source material the breadth and originality of Kleinschmidt's study will have an important influence on scholarly perception of the middle ages as a period of continual change and continually changing attitudes **BOOK JACKET** **Studies in the Transmission of Wyclif's Writings** Anne Hudson, 2023-05-31 Wyclif's ideas caused a major upheaval both in the country of his birth and in the Bohemian area of central Europe that upheaval affected theological ecclesiastical and political developments from the late 14th to the early 16th centuries Some of those ideas were transmitted orally through Wyclif's university teaching in Oxford and in his preaching in London and Lutterworth but the main medium through which his message was disseminated was the written word using the universal western language of Latin The papers in this collection look at aspects of that dissemination from the organization and revision of Wyclif's works to form a summa of his ideas the techniques devised to identify and make accessible his multifarious writings the attempts of the orthodox clerical establishment to destroy them through to the fortunes of his texts in the Reformation period manuscripts written in England and those copied abroad mostly in Bohemia are considered Although most of the papers have been published previously a new edition of the important Hussite catalogue of Wyclif's writings is provided and three lengthy sections contribute new material and additions and corrections to previous listings of Wyclif manuscripts *Astronomies and Cultures in Early Medieval Europe* Stephen C. McCluskey, 2000-11-20 This book provides an overview of the astronomical practices that continued through the so called Dark Ages Like the astronomies of traditional societies early medieval astronomies established a religious framework of sacred time and ritual calendar here Christian feasts tied to a pre Christian ritual solar calendar the date of Easter tied to the Hebrew lunar calendar and the timing of monastic prayers in terms of the course of the stars Coupled with the remnants of ancient geometrical astronomy these provided the framework for the rebirth of astronomy with the rise of the medieval universities

Barbarians, Maps, and Historiography Walter Goffart, 2023-05-31 To complement his first collection of articles *Rome's Fall and After* 1989 Walter Goffart presents here a further set of essays all but two published between 1988 and 2007 They mainly focus on two types of historiography early medieval narratives with special attention to Bede's *Historia ecclesiastica* and printed maps designed to portray and teach history with special attention to the ubiquitous map of the barbarian invasions The wide ranging concerns represented extend from the underside of the Life of St Severinus of Noricum and further evidence for dating Beowulf to the questions whether the barbarian invasions period was a heroic age and how Charlemagne shaped his own succession Attention is also paid to the earliest map illustrating the Anglo Saxon Heptarchy and to the historical vignettes of the Vatican Galleria delle carte geografiche The collection opens with the appraisal of certain writings dealing with what is now called ethnogenesis theory To conclude Professor Goffart adds brief second thoughts about

each of these essays and supplies an annotated list of his articles that have not been reprinted **Illustrating the Phaenomena** Elly Dekker, 2013 In this volume all extant celestial maps and globes made before 1500 are described and analysed It also discusses the astronomical sources involved in making these artefacts in antiquity the Middle Ages the Islamic world and the European Renaissance before 1500 *Learning and Culture in Carolingian Europe* John J. Contreni, 2024-10-28 Nine of the ten essays in this collection appeared first between 1995 and 2005 Centered in the Carolingian age they explore how the seventh century Visio Baronti was read in the ninth century and how social and cultural imperatives transformed the life of scholarship schools and learning in Carolingian Europe Several essays consider the significance of numerical and scientific studies in the Carolingian curriculum including the impact of Bede's scientific works in the schools and on the thought of John Scottus Eriugena Another reconstructs Eriugena's early career in light of his Glossae divinae historiae Carolingian biblical culture is the subject of two essays including a reading of Haimo of Auxerre's commentary on Ezechiel that highlights the unfinished and unpublished commentary's critique of Carolingian society A poem in the Anthologia Latina long ascribed to Octavian the Roman emperor is restored to the monastic culture of the ninth century Finally an article on the Laon Formulary originally published in French in 1973 is here translated and revised

The Art of Words: Bede and Theodulf Paul Meyvaert, 2023-05-31 Medieval art is wordy inscriptions and poems commentaries and chronicles accompany and adorn it The Art of Words presents a series of detective stories by a renowned explorer of medieval philological evidence who here examines the thought and objects of the Venerable Bede and Theodulf of Orleans What physical objects did Bede have in mind for example when writing about the paintings of his monastic churches How did he conceive of the division of biblical books into chapters Why was the famous Libri Carolini made for Charlemagne never published Indeed what did it mean in the Middle Ages to publish something Pursuing the story of Bede's calendar shows how Valentine's Day began with a reference to birds To unravel the meaning of the image of Ezra in the Codex Amiatinus the author then demonstrates the importance of knowing the books that Bede knew and wrote The final topic is the celebrated Apse mosaic of Germigny des Près how it was saved from destruction and how Theodulf's words explain what we see Words matter and in these studies Paul Meyvaert constantly delights the reader with careful excavations of that place in medieval art and thought where images and words connect and collide *Bishops, Saints, and Historians* Robert Brentano, edited by William L. North, 2023-06-14 Throughout his career Robert Brentano attempted to understand the nature and style of ecclesiastical institutions in Italy and the British Isles the specific qualities of saints and the communities that formed around them and the ways in which seemingly cryptic archival remains of medieval administrative activity as well as chronicles and lives could reveal vital details about change and continuity in local and regional religious life and even the color of men's souls These issues are explored in the essays assembled in Parts I Bishops and II Saints Part III Historians brings together articles that examine the writing of history by both medieval authors and modern historians and includes

Brentano's reflections on his own practice as an historian The introduction by W L North offers a brief biography and introduction to reading Brentano's works followed by a complete bibliography of his publications *Brittany in the Early Middle Ages* Wendy Davies, 2023-05-31 This volume focuses on Wendy Davies's work on early medieval Breton texts and their implications Beginning with core analyses of the Redon and Land vennecc cartularies it continues with papers that tease out some of the key social implications of the 9th century Redon material on the nature of political power on rural communities on the settlement of disputes and on transmission of property While the Redon charters have long been known as a source of fundamental importance for Breton history the author's database established in the 1980s allowed much greater understanding of the role of individuals at all social levels and particularly peasant level than had previously been possible Attention to the detail of the east Breton past also includes papers on some of the results of her fieldwork on building stone in particular Early medieval Brittany is not merely interesting in itself and it is certainly not some Celtic backwater Breton evidence can usefully be differentiated from the evidence of other Celtic areas and has a significant role in wider issues of European history As well as papers on the familiar themes of kingship rulership cult sites and cemeteries the final section highlights the distinctive quality of the Breton evidence for the protection of sacred and personal space for slavery and serfdom and for village level courts **1994** Massimo Mastrogregori, 2013-05-08 Annually published since 1930 the International bibliography of Historical Sciences IBOHS is an international bibliography of the most important historical monographs and periodical articles published throughout the world which deal with history from the earliest to the most recent times The works are arranged systematically according to period region or historical discipline and within this classification alphabetically The bibliography contains a geographical index and indexes of persons and authors *Studies in Early Medieval Latin Glossaries* Wallace Martin Lindsay, Michael Lapidge, 2024-10-28 Glossaries are one of the most important sources for our knowledge of early medieval schools for they provide an accurate records of what texts were studied and how they were understood But they are also very difficult to access countless glossaries lie unpublished in manuscript the relations between them are unknown and their origins are obscure The most important contribution to solving these problems was made by Wallace Martin Lindsay 1858 1937 one of the greatest classical scholars ever produced in the British Isles who in a pioneering series of articles identified the principal glossaries and clarified their relationships he subsequently oversaw their publication in *Glossaria Latina* So comprehensive was Lindsay's work that the subject virtually stood still for half a century but recent advances in paleography and Insular Latin studies have drawn scholarly attention to glossaries once again Any future work on glossaries must be based on Lindsay's pioneering articles to facilitate such work these articles have been provided with comprehensive indices of the Latin lemmata and sources of the glossaries together with an account of recent work on medieval glossaries *Books and Libraries in Early England* Helmut Gneuss, 2024-10-28 The essays in this second volume from Helmut Gneuss are devoted to the study of books their readers and libraries in

medieval England especially in the Anglo Saxon period The selection opens with a survey of the history of the medieval English library followed by detailed studies of Anglo Saxon book production These also examine its relation in the 9th century to King Alfred s plan for educational reform and to the intellectual history of the 10th century Two articles deal with liturgical books and include the standard classified list of liturgical manuscripts To end there is an analysis of the earliest modern catalogue of books with Old English texts that by George Hickes and an investigation of the history of the Latin hymnal in Britain

in Anglo-Saxon England in the Light of Contemporary Manuscript Evidence Patrizia Lendinara, Loredana Lazzari, M. A. D'Aronco, 2007 The essays collected in this volume focus on a prominent aspect of Anglo Saxon culture educational texts and the Insular manuscripts which have preserved them The English imported manuscripts and texts from the Continent whilst a series of foreign masters from Theodore of Tarsus to Abbo of Fleury brought with them knowledge of works which were being studied in Continental schools Although monastic education played a leading role for the entire Anglo Saxon period it was in the second half of the tenth and early eleventh centuries that it reached its zenith with its renewed importance and the presence of energetic masters such as Aethelwold and Aelfric The indebtedness to Continental programs of study is evident at each step beginning with the *Disticha Catonis* Nevertheless a number of texts initially designed for a Latin speaking milieu appear to have been abandoned for instance in the field of grammar in favour of new teaching tools Besides texts which were part of the standard curriculum Anglo Saxon manuscripts provide abundant evidence of other learning and teaching instruments in particular those for a specialized class of laymen the Old English *læce* the healer or physician Medicine occupies a relevant place in the book production of late Anglo Saxon England and in this field too knowledge from very far afield was preserved and reshaped All these essays many by leading scholars in the various fields explore these issues by analysing the actual manuscripts their layout and contents They show how miscellaneous collections of treatises in medieval codices had an internal logic and highlight how crucial manuscripts are to the study of medieval culture Contributors Filippa Alcamesi Isabella Andorlini Anne Van Arsdall Luisa Bezzo Sandor Chardonnens Maria Amalia D'Aronco Maria Caterina De Bonis Claudia Di Sciacca Michael Drout Concetta Giliberto Florence Eliza Glaze Joyce Hill Loredana Lazzari Patrizia Lendinara Danielle Maion Ignazio Mauro Mirto Alexander R Rumble Hans Sauer Loredana Teresi
