Creating Implementing And Managing Effective Training And Development State Of The Art Lessons For Practice:

The Transfer of Learning Sarah Leberman, Lex McDonald, 2016-02-17 The book addresses a crucial issue for all involved in education and training the transfer of learning to new and different contexts Educators employers and learners face the problem of ensuring that what is learnt in the classroom is able to be adapted and used in the workplace It focuses on adult learners in professional and vocational contexts The authors provide an accessible book on the transfer of learning which draws on multi disciplinary perspectives from education psychology and management The Transfer of Learning will be useful both for postgraduate students and for practitioners wanting to deepen their understanding of transfer and for those interested in practical applications It combines theory and practice from international research and the authors own case studies of transfer involving learners engaged in professional development and study towards qualifications Theories of adult learning change and lifelong learning are discussed in relation to the transfer of learning The purpose of this book is to emphasise to tertiary educators and trainers the importance of transfer and in doing so highlight the participants voices as central foci in coming to an understanding of the process By doing this it balances the literature which has to date emphasized transfer from a trainer s and or organization s perspective There has been little if any substantive material on tertiary transfer issues and yet demands are increasing for tertiary education providers to be more accountable and more focused on developing students ability to use their learning in everyday work situations The book is unique in that it adopts a phenomenological perspective and underscores the significance of the participants voices in understanding issues

Improving Learning Transfer
 Cyril Kirwan, 2016-05-23

In today's constantly changing business environment capable people are crucial to an organization's success and developing their capabilities through training learning and development initiatives is a major investment While measuring the return on that investment is important attempts to do so are much less valuable if they are not accompanied by a clear understanding of all of the factors that can affect the application of new skills and knowledge on the job in other words a clear understanding of what affects learning transfer So if organisations are to remain competitive and develop the highly skilled people that will contribute to their future performance improving learning transfer should be a priority Cyril Kirwan's book addresses this critical issue at a number of levels Firstly it explores what learning transfer actually is it's

about application of learning back at work as well as maintenance of that learning over time Secondly it describes the main factors that affect transfer in terms of trainee characteristics training design factors and work environment characteristics It also examines how those factors exert their effect which ones are more important how they interact with one another and in doing so constructs a practical learning transfer model for practitioners The book also describes in some detail what the various factors working for or against learning transfer look like in practice Finally using case studies it points the way towards what can be done before during and after training to improve the rate of transfer This highly practical book will help trainers development specialists and line managers ensure that their training is about real outcomes and not just inputs
