CoreStream Process Framework Timur Kady,2024-11-25 The CoreStream Process Framework is a taxonomy of cross functional business processes developed for benchmarking and management improvement purposes This framework organizes business processes into 11 categories and covers over 5 300 processes Each business process within every category is divided into six groups corresponding to the lifecycle phases of the respective business objects Each group is further subdivided into subgroups of operations organized according to their logical sequence preparatory core and final operations This principle also applies to the arrangement of the operations themselves In some cases based on best practices the operations are complemented with control actions As a result the business process

classifier represents a comprehensive and systematic hierarchy decomposition of business processes spanning from the level of key processes to the level of individual operations As of the release of this version the CoreStream Process Framework is the most complete and balanced business process classifier available suitable for use by any company regardless of industry product type organizational structure size or location Mastering System Center Configuration Manager Vangel Krstevski,2014-12-24 This book is perfect for IT administrators who are looking to enhance their skills on system and asset management A fair understanding of the core elements and applications related to SCCM would be helpful

*Environmental Politics and Foreign Policy Decision Making in Latin America* Amy Below,2014-12-05 Although the Kyoto Protocol an international agreement to address global climate change has been regarded by many as an unsuccessful treaty both politically and environmentally it stands as one of the world s few truly global agreements Why did such a diverse group of countries decide to sign and or ratify the treaty Why did they choose to do so at different times and in different ways What explains their foreign policy behavior Amy Below s book builds off the increasing significance of climate change and uses the Kyoto Protocol as a case study to analyze foreign policy decision making in Latin America Below s study takes a regional perspective in order to examine why countries in Latin America made disparate foreign policy choices when they were faced with the same decision The book looks at the decisions in Argentina Mexico and Venezuela via a process tracing method Below uses information obtained from primary and secondary documents and elite interviews to help reconstruct the processes and augments her reconstruction with a content analysis of Conference of the Parties speeches by presidents and country delegates The book complies with convention in the field by arguing that systemic national and individual level factors simultaneously impact foreign policy decisions but makes the additional claim that role theory most accurately accounts for relationships between variables *Environmental Politics and Foreign Policy Decision Making in Latin America* considers a variety of factors on individual national and international levels of analysis and show that the foreign policy decisions are best viewed through the prism of role theory The book also draws conclusions about the value of role theory in general and about environmental foreign policy decisions in developing countries which will be of value to both policy makers and academics
