*Creating the Technopolis* Raymond W. Smilor, George Kozmetsky, David V. Gibson, 1988      *Global Perspectives on Technology Transfer and Commercialization* John Sibley Butler, David V. Gibson, 2011-01-01 As we move further into the 21st century increasing emphasis is being placed on the importance of technology transfer Through new research and practices scholars practitioners and policymakers have made great strides in broadening our understanding and ability to implement technology transfer and commercialization processes The fruit of that research is collected in this timely volume Technology transfer is a dynamic area of study that examines traditional topics such as intellectual property management the management of risk market identification the role of public and private labs and the role of universities This volume reflects on how government business and academia influence technology transfer in different countries and how the infrastructure of a country enhances technology and contributes to each country s overall economy Interpreting and adopting the processes of technology transfer and commercialization or building innovative ecosystems is critical to seeing success in this digital age Those leading the surge toward building innovative ecosystems for technology transfer are the fellows of the Institute for Innovation Creativity and Capital IC2 Institute at The University of Texas at Austin Global in its scope of solving market economy problems for this volume the Institute has focused its lens on accelerated knowledge based development Here scholars from 13 countries come together to critique technology transfer from each of their respective nations The results of their contributions lend innovative insight to exactly how different nations are working to maximize technology transfer and commercialization in uncertain times Those with an interest in commercialization and technology transfer from students to scholars practitioners to policymakers will find this important collection of great value      **Technology-Based Regional Economic Development** Akio Nishizawa, David V. Gibson, 2024-10-08 Regional technology based economic development and the recruitment and retention of talent is a top priority of city regions in the United States and in countries around the world However policy recommendations from government officials industry leaders and academics are often ambiguous or are in conflict To address these issues this book deals with the complex intersection of institutional theory and national and regional policy initiatives It provides an overview of United States and Japanese technology policy development at the national level with case analyses of Austin Texas and Tsuruoka Japan to identify key regional strategies and processes that have resulted in successful endogenous technology based business development and job creation It offers an innovative analytical perspective to improve our understanding of how successful tech based regional economic development works in theory and practice The book s discussion is grounded on important technology paradigm shifts in the US and Japan from 1970 to 1980 leading to current realities To address the complex Puzzle of Space conundrum the authors describe similarities and differences in regional development processes in Austin and Tsuruoka They present a generalizable model indicating necessary and sufficient conditions linked to the building of new Small i institutions at normative and cognitive

levels of analysis in consort with regulative policy and innovations at macro level Capital I institutions The book clearly explains the relations between institutions and economic growth an important issue in contemporary economics The book s conclusions clarify critical success factors for endogenous regional development growth theory and lead to recommendations for policymakers who are searching for ways to achieve success

**Inequity in the Technopolis** Joseph Straubhaar,Jeremiah Spence,Zeynep Tufekci,Roberta G. Lentz,2012-03-15 Over the past few decades Austin Texas has made a concerted effort to develop into a technopolis becoming home to companies such as Dell and numerous start ups in the 1990s It has been a model for other cities across the nation that wish to become high tech centers while still retaining the livability to attract residents Nevertheless this expansion and boom left poorer residents behind many of them African American or Latino despite local and federal efforts to increase lower income and minority access to technology This book was born of a ten year longitudinal study of the digital divide in Austin a study that gradually evolved into a broader inquiry into Austin s history as a segregated city its turn toward becoming a technopolis what the city and various groups did to address the digital divide and how the most disadvantaged groups and individuals were affected by those programs The editors examine the impact of national and statewide digital inclusion programs created in the 1990s as well as what happened when those programs were gradually cut back by conservative administrations after 2000 They also examine how the city of Austin persisted in its own efforts for digital inclusion by working with its public libraries and a number of local nonprofits and the positive impact those programs had

**The Geography of Small**

**Firm Innovation** Grant Black, 2006-03-30 It has long been recognized that advances in science contribute to economic growth While it is one thing to argue that such a relationship exists it is quite another to establish the extent to which knowledge spills over within and between sectors of the economy Such a research agenda faces numerous challenges Not only must one seek measures of inputs but a measure of output is needed as well to estimate the knowledge production function The identification of such a measure was a compelling goal for Zvi Griliches if not the holy grail The dream of getting hold of an output indicator of inventive activity is one of the strong motivating forces for economic research in this area Griliches 1990 p 1669 Jaffe 1989 made a significant contribution to estimating the knowledge production function when he established a relationship between patent activity and R D activity at the state level Feldman and coauthors 1994a 1994b added considerably to this line of research focusing on innovation counts as the dependent variable instead of patent counts This work was particularly important given that many innovations are never patented Feldman s work also differentiated by firm size and showed that knowledge spillovers from universities play a key role as sources of knowledge for small firms

**NASA DoD aerospace knowledge diffusion research project. Report number 6, The relationship between the use of U.S. government technical reports by U.S. aerospace engineers and scientists and selected institutional and sociometric variables** , 1991 A study was undertaken that investigated the relationship between the use of U S government technical reports by U S aerospace engineers and scientists and selected institutional and sociometric variables Survey research is the methodology used for the study Data were collected by means of a self administered mail questionnaire The approximately 34 000 members of the American Institute of Aeronautics and Astronautics AIAA served as the study population The response rate for the survey was 70 percent A dependent relationship was found to exist between the use of U S government technical reports and three of the institutional variables academic preparation years of professional aerospace work experience and technical discipline The use of U S government technical reports was found to be independent of all of the sociometric variables The institutional variables best explain the use of U S government technical reports by U S aerospace engineers and scientists
